Text—Psalms, 16th chap., 11 v.: "Then wilt shew me the path of life; in thy presence is fulness of joy: at thy right hand there are pleasures for evermore." Some months ago the doctor preached a series of sermons touching death and hea-ven which have brought out a number of pamphlets and sermons in England and the States refuting his arguments. Last evening he gave his first answer in a ser-mon on "three lives, three sleeps, three deaths," to be followed by a sermon on "Heaven as a place" next Sunday evening. Of the three lives referred to, the first is the physical life. The second is the spiritual life which implies that we must be born into it like as in the physical life. A clergyman once astomished his bishop by telling him he was born in Dublin and Liverpool—the first being his ordinary bitts; the second his conversion. The third is the life after death—the scriptural life everlasting life, a life without cessation an initiation or sleep, "He that believeth on me hath everlasting life." The first of the three deaths is the physic cal, which we must all experience. The second is the death of sin, the bible clearly
