New York, July 21.—The Herald's special Arom St. Paul says that lumber stealing by Canadians along the northern border of Minnesota has become so extensive that the Government has concluded to put a stop to it. A large expedition, headed by four agents, will leave Duluth about August, and will start in a northwesterly direction, its destination being the western portion of Rainy Lake. The four officers of law and the interior department will be instructed to continue their work as far as in their own judgment seems best, and no time is fixed for their return. The expedition was decided on by the heads of the interior and land departments after an examination of the report by a special agent who made a trip, along the northern boundary of the state. He reported that on Big and Little Rainy rivers great quantities of logs were being run into the lake and across to the Canadian border. Trees had been cut from government land. Work was being carried on under the direction of Canadian lumber firms, and was performed by Canadian half-breed Frenchmen and by some of the dwellers on this side of the line, who were probably not aware that they were engaged in a fraudulent enterprise. The special agent estimated that in these two rivers there were 75,000,000 feet of logs, and perhaps as much more was being gotten away with at other points along the boundary line. An effort will be made to secure this in the name of the government, and as soon as logs have been found by agents and branded with the government stamp, which the agents take with them, they will be held at all harvards.

The body of Marie Wender, the pretty wife of a postoffice official, was discovered with a bullet wound in the left breast and her throat cut. There is no clue to the murderer. The husband of the woman was away from home much of the time. It is suspected that the couple did not live happily together, and that Mrs. Wender had a lover. The husband has not been seen since the crime was discovered.
