

A PROPERLY TRIMMED FRUIT TREE

Mr. H. W. Green, writing to the *Rural New Yorker*, says his Dwarf Duchess Pears paid him twelve times as much as his apples, and that there was more money in pears at \$1.00 per barrel than apples at \$2.00. He has an orchard of 3,000 Dwarf Pear Trees.

Why You Should Plant Plum Trees

For several years old plum orchards have been pulled out or neglected, and no new ones put in to take their place. There will be a scarcity of this fruit in a short time. Heed our warning and put out plums this Spring. We have Red June, Abundance, Burbank, October Purple, and all leading European kinds. An orchard of 50 or 100 trees will pay big in a very few years.

PROFIT IN DWARF PEARS

The English market absorbs tons of Duchess Pears every year. This variety does best on Dwarf stock, and they can be set 10 feet by 10 feet and 435 to the acre. See how profitable others have found them:

R. T. Austin, near Boston, Mass., set out 500 Dwarf Pears, occupying about an acre of ground. They commenced bearing in three years and have borne regular crops ever since. An account kept of the sales for a period of six years showed an aggregate amount of \$3,498 00, an average of over \$500.00 an acre each season.

Wallace Power Sprayers Never Fail

Growers are now offering us other makes in exchange on ours. WE ORIGINATE, and are always A YEAR AHEAD OF OUR COMPETITORS. We have 16 different styles and sizes. No condition of spraying which we cannot cover. We guarantee every machine absolutely. When you buy a Wallace you take no other chances than to pile up a Good Bank Account—they will do that. Our Gasoline Engine outfits are being bought to replace the weaklings of other makes. Ours are Reliable and do not "give out" after a couple of years.

Messrs. J. W. Smith & Sons, Winona, Ont., say that the first machine in Canada is still good for a long time. They have now ordered a 3rd and arranged for a 4th. Besides apples, they have ordered 70,000 baskets for their other fruits. They go to see the general exhibition of Sprayers in operation each year and their action tells what their conclusion is. When our machines are considered best and most advantageous by men of this commercial calibre, do you not think it wise to get one and be sure of having your spraying done, and at smallest cost? Messrs. Gibson & Bowen, of Newcastle, Ont, got a Standard last year and turned a 25% packable apple crop and \$1,194.00 for it, into 90% No. 1 and \$4,300.00 hard cash. Their crop for this year has been contracted for at a cream price?

Wallace Machines will do it for YOU TOO at no cost for power. They possess an abundance of it and to spare. Send for Catalog and latest information.
