CITY GUIDE AND BOOK OF FACTS

A Combined Geography, History, Description and Panorama of the World, Its Peoples and Their Occupations WITH FARM AND HOME ONE YEAR, ONLY 50 CENTS

A good general Atlas of the World is, next to the Dictionary, the most practical and useful work in any library. It is a modern necessity for reading ~ well as study. The scope of this Atlas is such as to make it a great encyclopedic work, as well as valuable for its geographical information. In addition to and in connection with the 112 pages of maps, charts and illustrations are 200 pages of FACTS—statistical, historical, geographical, descriptive, entertaining, etc., etc. No similar work has ever been produced containing such a vast amount of information in so attractive a form, and at such a ridiculously small expense to the purchaser.

Colored Maps

LL of the maps in this Atlas are printed in contrasting colors, thus bringing out in the most striking way the contrast between states, counties, land and water, etc. etc. In connection with each map is an index so that every place can be readily found. Every railroad station at which any train faster than a way freight would stop, is shown in the maps of states. In foreign maps the general maps of the continents contain all countries and all important places. In American cities all stations, hotels, public buildings,
