

## INDEX OF INVENTIONS.

|                                                                                                                                           |      |
|-------------------------------------------------------------------------------------------------------------------------------------------|------|
| Animal pokes, S. N. Gustin.....                                                                                                           | 1837 |
| Army equipments, G. H. Palmer.....                                                                                                        | 4791 |
| Barrel lifter, A. J. Small.....                                                                                                           | 4793 |
| Bed, spring, E. B. Dodge.....                                                                                                             | 4807 |
| Blacksmith's tuyere, V. R. Taylor.....                                                                                                    | 4816 |
| Boiler, anti-incrustation battery for, J. F. Donoghue, and G. Crompton.....                                                               | 4853 |
| " injectors for, W. Randall.....                                                                                                          | 4807 |
| " tube expanders, O. Pagan, T. L. Ricart, and M. A. Montejó.....                                                                          | 4895 |
| Book, salesman's check, W. Fingland, and B. J. Draper.....                                                                                | 4833 |
| Boot and shoe heels, machine for trimming, C. Laliberté.....                                                                              | 4834 |
| " tip, H. W. Merrill and J. W. Holt.....                                                                                                  | 4858 |
| " making the shanks of, L. Bradford.....                                                                                                  | 4801 |
| Boxes and pans, metallic, H. Martin.....                                                                                                  | 4822 |
| Broom handle painting machine, E. A. Kitzmiller.....                                                                                      | 4838 |
| Car-coupler, J. B. Smith.....                                                                                                             | 4806 |
| " truck, L. B. Stillson.....                                                                                                              | 4893 |
| Carriage, children's, W. Haney.....                                                                                                       | 4830 |
| " top, E. R. Sookwell.....                                                                                                                | 4853 |
| Churn dasher, J. E. Finley.....                                                                                                           | 4794 |
| " egg beater and ice cream freezer combined, J. L. Gregory.....                                                                           | 4856 |
| Coat measurers and drafting scales, H. G. McLellan.....                                                                                   | 4780 |
| Collars, threaded, forming sheet metal, A. Taplin.....                                                                                    | 4857 |
| Concrete blocks veneered with marble, H. Hagau, J. Bryce, and J. G. Gibson.....                                                           | 4782 |
| Curtain fixture, N. Campbell.....                                                                                                         | 4898 |
| Docks, floating and pontoons, J. L. Clark, and J. Standfield.....                                                                         | 4810 |
| Door fastening, pocket, H. W. Murdoch, and M. E. Snider.....                                                                              | 4811 |
| " and window sashes, machine for mortising, &c., W. Abercrombie.....                                                                      | 4802 |
| Drilling, rock, machines, G. W. Reynolds.....                                                                                             | 4857 |
| Ear ring, W. P. Yeoman.....                                                                                                               | 4787 |
| Egg beater, churn and ice cream freezer combined, J. L. Gregory.....                                                                      | 4856 |
| Electric battery, frictional, G. M. Mowbray.....                                                                                          | 4875 |
| Feed apparatus, regulators for, George Henry.....                                                                                         | 4779 |
| Fertilizer holder and distributor, W. F. Wheeler.....                                                                                     | 4852 |
| " preparation of, B. Ackerman.....                                                                                                        | 4820 |
| Fire extinguisher, D. J. Topley.....                                                                                                      | 4864 |
| " J. S. Wallace, and E. Tucker.....                                                                                                       | 4892 |
| Floodway for warehouses, J. H. Morrell.....                                                                                               | 4865 |
| Fly trap, D. E. Roe.....                                                                                                                  | 4821 |
| Fuel, securing combustion of, &c., J. C. Ramsden.....                                                                                     | 4843 |
| Furnace, hot air, E. E. Gold.....                                                                                                         | 4798 |
| Gas burner, A. G. Baylis.....                                                                                                             | 4784 |
| " process and apparatus for manufacture of, from petroleum, &c., T. S. Dickerson.....                                                     | 4796 |
| " retort, F. H. Date, and F. H. Eichbaum.....                                                                                             | 4881 |
| Gases of fuel, utilization of, J. C. Ramsden.....                                                                                         | 4843 |
| Glass furnaces, J. Nicholson, Jr.....                                                                                                     | 1771 |
| " H. Ragot.....                                                                                                                           | 4884 |
| " relief letters, coloured, J. A. Egginton.....                                                                                           | 4842 |
| Grain drilling and seeding machines, J. C. Baker.....                                                                                     | 4835 |
| Hame fastening, P. Foster.....                                                                                                            | 4845 |
| Harvester rakes, J. H. Myers.....                                                                                                         | 4839 |
| History and statistics, teaching apparatus, N. Loverin.....                                                                               | 4792 |
| Hoe, horse, J. M. Munro, and A. P. Johnson.....                                                                                           | 1896 |
| Horse collar, W. Hardy.....                                                                                                               | 4808 |
| " rake, A. S. Walbridge.....                                                                                                              | 4874 |
| " apparatus for breaking, J. Z. Walling.....                                                                                              | 4826 |
| Ice cream freezer, churn and egg beater combined, J. L. Gregory.....                                                                      | 4856 |
| Iron and steel, art of welding, purifying in smelting and puddling furnace, and composition for that purpose, (extension), D. Lister..... | 4860 |
| Ladder, extension step, R. S. Van Zandt.....                                                                                              | 1873 |
| " step, J. L. Isaacs, and R. Halliday.....                                                                                                | 4818 |
| Lamp, L. J. Atwood.....                                                                                                                   | 4789 |
| " extinguisher, E. F. Chapin and E. O. Presby.....                                                                                        | 4894 |
| Light apparatus for producing artificial, G. H. Greenough.....                                                                            | 4868 |
| Lime kiln, J. B. Robert.....                                                                                                              | 4799 |
| Lock, W. Griffith.....                                                                                                                    | 4855 |
| Lock, door, A. J. B. Berger.....                                                                                                          | 4800 |
| Lubricating compound, G. B. Peters.....                                                                                                   | 4851 |
| Mangle, clothes, G. R. Prowse.....                                                                                                        | 4876 |
| Matting roller, G. H. Longmore.....                                                                                                       | 4866 |
| Measure, lip for sheet metal, A. Cummings.....                                                                                            | 4872 |
| Middlings separator, A. Crabtree.....                                                                                                     | 4869 |
| Milk cooler, N. E. Smith.....                                                                                                             | 4883 |
| Mortising machine, S. Duck.....                                                                                                           | 4879 |
| Mower and reaper, W. N. Whiteley.....                                                                                                     | 4863 |
| Mowing machine, B. Atwood.....                                                                                                            | 4811 |

|                                                                                                            |      |
|------------------------------------------------------------------------------------------------------------|------|
| Music, apparatus to facilitate the study of, E. Draper.....                                                | 4785 |
| Nut lock, C. Hutchinson.....                                                                               | 1831 |
