

McGILL UNIVERSITY, MONTREAL.

FACULTY OF MEDICINE.

SUMMER SESSION, 1882.

THE Seventh regular Summer session of the Medical Faculty of McGill University will begin on the 17th of April, and continue twelve weeks. The classes are chiefly practical and demonstrative and are designed to supplement and extend the teaching of the regular winter courses. The experience of the past sessions has been very encouraging, both in regard to the numbers in attendance, and the diligence with which the classes have been followed; and the Faculty hopes that the students will endeavor to take one or more of these extra sessions, the fees for which have been placed so low as to be almost nominal. The special advantages of attendance upon a summer session are—1. The benefit derived from the practical and demonstrative classes. 2. Dresserships and clinical clerkships are more easily obtained at the Hospitals, and the student has more time at his disposal to follow up the cases. 3. Cases of midwifery are obtained in greater numbers at the Lying-in-Hospital. 4. Systematic study can be carried out more effectually than at home.

The advantages offered by the City of Montreal for the practical study of Medicine and Surgery are unequalled in the Dominion. In the wards of the General Hospital there is always, and more particularly in the summer months when navigation is open, a large collection of interesting medical and surgical cases. In the out-door department, there is a daily attendance of between 75 and 100 patients, which afford excellent instruction in minor surgery, routine medical practice, and diseases of children. The Eye and Ear Department will afford an opportunity of studying practically and under skilled direction, these important branches.

At the University Dispensary there will be this year, in addition to the Demonstrations on Gynecology, Demonstrations on Diseases of Children and Diseases of the Skin.

Dresserships and clinical clerkships can be obtained on application to the physicians and surgeons in attendance at the Hospital.

The Faculty has made arrangement for the following courses:—
