### PROVINCE OF ONTARIO.

The Province of Ontario has a mineral bearing belt 1,000 miles long, by 100 miles wide, north of the Great Lakes from Ottawa River to Lake of the Woods, more easily reached by lake or railway than any other mineral district of the continent.

<b>NICKEL</b>	<b>GOLD</b>	<b>COPPER</b>
<b>SILVER</b>	<b>IRON</b>	<b>APATITE</b>
<b>ACTINOLITE</b>	<b>MICA</b>	<b>PLUMBAGO</b>

Exploration has shown the Gold districts of the Province to be extensive and rich, and new finds are constantly being made. In the Western fields the ore is mainly free milling, and wood, water and labor in abundance provide the requisites for economic working. The yield of gold for the year ending October 31, 1895, was \$50,281, and in the period from November 1, 1895, to September 20, 1896, it reached \$142,605.

Crown lands are sold at \$1.50 to \$3 per acre, or leased at 60 cents to \$1 per acre for the first year, and 15 to 25 cents for subsequent years.

The fifth report of the Bureau of Mines contains a geological description and map of the new gold fields of the Rainy Lake and Seine River districts—free on application.
