A Stitch in Time Saves Nine

Old Proverb

And Ceresit used in constructing the basement of a building will eliminate all possibility of leakage in the future.

But if Ceresit has not been used and the basement does prove damp and unusable, it is a comparatively easy matter to remedy it by applying a plaster coating of Ceresitized Cement Mortar to the inside of walls and floor.

Ceresit is equally effective either in preventing future leakage or remedying present conditions of leakage. It is the only waterproofing for cement that gives protection against both dampness and hydrostatic pressure.

Write for the "Book of Evidence."

It tells the complete facts.

DEALERS WANTED IN UNOCCUPIED TERRITORY.

St. Charles Country Club, Winnipeg. Stained with Cabot's Creosote Stains. G. W. Northwood, Architect.

Reliable Shingle Stains

Shingle stains can be as cheap and wormless as the maker's conscience will allow. Kerosene is the favorite cheaper, mixed with coarse and adulterated colors. Such stains are not worth applying, because they cost as much to apply as good stains, and the colors wash off and fade, and your shingles are made dangerously inflammable. *Don't accept any stain that smells of kerosene or benzine.*

Cabot's Creosote Stains

are made of refined Creosote and no kerosene. The colors are lasting, clear, and beautiful. They are the original and standard shingle stains, and every gallon is guaranteed.

You can get Cabot's Stains all over the country.

Send for samples and name of nearest agent.
