

The closest attention is given by the Principal and Faculty to all matters affecting the health of the Students. An experienced Teacher is in charge of Physical Training. Pupils are required to take daily out-door exercise, under such supervision as may be deemed necessary.

A large and pleasant Room in the main College Building is devoted to the Library and Reading Room. The Library contains a good collection of Books of reference in every department of College work. The Reading Room is well supplied with the Daily Papers and current Periodicals and Magazines.

Special lectures are arranged, from year to year, upon various subjects interesting to the Students of the College. These lectures are intended to broaden, liberalize and improve the reading of the students and the instruction received in the class-room from their Teachers.

The Physical and Chemical Laboratories are well equipped for purposes of experiment and illustration, and students have the advantage of doing practical work under the immediate direction of the teacher, who is an Honour Graduate in Science and thoroughly familiar with approved methods.

*Courses of Study.*—In the Senior School the College furnishes two regular Courses of Study—the Matriculation Course and the English Course. The successful completion of either of these courses will entitle the Student to the College Diploma. In addition to this, Graduates in the Matriculation Course are given a Certificate of Matriculation by McMaster University. This Certificate will admit a student into any University in Canada. The Junior School provides full Courses of Study for those not sufficiently prepared for the Senior School. The Special Departments of Music, Art, Commercial Work and Household Science have fully organized Courses.

Provision is made also for Candidates for the Normal School Entrance Examinations of the Education Department.

The Matriculation Course can be adapted to meet the cases of any who desire to give more attention to the Languages, either Classical or Modern.

The Matriculation Course or the English Course may be completed ordinarily in four years. A fifth year Course can be arranged on consultation with the Principal.

The work of the Fifth Year, except Elocution and Chorus Singing, is taken in McMaster University.

There are two courses in Music—Vocal and Instrumental. On completion of either of these, with the required literary work, the Musical Diploma of the College will be given.

*Commercial Department.*—The aim of this Department is to give not only the ordinary preparation for business life, but to go much farther, and equip a student to act as a Private Secretary or to take full charge of an office. The course is especially adapted to develop the student's initiative and sense of responsibility. This course is especially recommended for those who desire a thorough commercial training, combined with subjects of general culture.

*Department of Household Science.*—The courses in Moulton College in this Department have been very carefully planned by experts, and in the cooking course individual equipment has been provided, so that each student has all the apparatus for the work of the course. The Junior School of Moulton College consists of a Primary Form, and a Preparatory Form which prepares for entrance into any of the regular College Courses. The subjects taught are Reading, Writing, Arithmetic, Spelling, Grammar, Composition, History, (Canadian and British),
