# **FURS**

A little illustration on the top corner of an advertisement helps sell the goods advertised, but no illustration we have found yet will depict in any adequate way the superior quality and finish of the garments we have on view this year.

The very best way for you to do is to call at the big show rooms, Corner of Yonge and Temperance Streets.

These show rooms are the most sumptuous of their kind in Canada.

They contain a display of Furs not possible to find elsewhere on the Contin-

Remember four points: Canada is the best country in the world in which to purchase Furs. We have been furriers in Canada for half a century. We buy direct from the trappers. We make all our own garments in our own factory.

#### BOY BABY HAD HORNS.

Mother Prostrated at Hideous Face of Her First Child.

New York, Sept. 4.- A boy baby, with two horns over two inches long on its forehead, eyes one inch and a nalf in diameter and a jet black face, was born on Wednesday last to young parents at 107 Howard-street, Newark, and died two hours later. Dr. B. H. Greenfield, the attending physician, photographed the child, which had the lineaments of the traditional imp. The hands and feet were very long, the wrist, measured ten inches. The norns were two inches apart on the forehead, near the hair line, and were soft and boneless and of a reddish color. The eyebrows began at the bridge of the nose and curved up to the hair of the

# APPLE CROP OF ONE-THIRD

Government Report for August Issued-Peaches Likely to Be Brought From Michigan,

The first crop report for August, issued from the fruit division of the department of agriculture, Ottawa, and only out yesterday, shows conditions practically unchanged since the July report. The weather has been on the whole most favorable. A few wind storms have been reported, but the effects have been local and not in the large commercial orchards. Insects are slightly more numerous than last year, especially the codlin moth and San Jose scale. Fungous diseases have not developed abnormally during the month. The apple crop is now so far advanc-

The apple crop is now so far advanced that a fair estimate can be made of the crop, the most serious disturbing factor being the usual September windstorms. The southern Ontario (Lake Erie) district will give a very light—crop of winter apples. Three fourths of the orchards have reported a total failure in early and fall varieties. Lake Huron district and central counties east to York will give a light to medium crop, with very few more than enough for local use, Some fall apples will be available for shipping purposes. Lake Ontario district will show a medium crop of good fruit. Ben Davis, russets, and spys showing in a few cases a full crop. The early and fall apples are relatively a better crop than the winter fruit. British Columbia will be the only province, giving a mewill be the only province giving a medium to full crop. The Dominion as a whole will produce about one-third as many apples as last year, but the fruit will be freer from scab, but somewhat more infected with codin moth. There is also a general consensus of online more infected with codin moth. There is also a general consensus of opinion that the present favorable weather conditions and light crop will cause the appies now on the trees to fill out much better than usual. It is also certain that much fruit that would be wasted in years of plenty will this year find its way to the morket, so that the final result in barrels will be larger than present indications might otherwise justify.

Pears. Pears.

With the exception of British Col-urable, all districts show a light pear crop. No full crops are reported except in keiffers, Bartletts and clapps are better than later varieties.

Plums are reported a medium crop in the Niagara and Georgian Bay dis tricts, with much uncertainty on ac-count of rot and curculio. British Columbia is harvesting a very full crop of plums, that with a larger acreage would seriously affect the market. The Japans have been a good crop every

Early peaches have been a medium to full crop. The later peaches are a medium, and in some orchards a full crop in Niagara district, but almost a total failure in Essex and Kent. Kingsville and Leamington do not expect to ship any peaches this season to distant markets. The acreage everywhere has been so reduced by winter killing, San Jose scale and general neglect, that the aggregate of good late Canadian peaches placed on the market will be much below the average. This will lead probably to the importation of peaches from

bly to the importation of peaches from Michigan, where the crop is good. Grapes. Black rot is not nearly so prevalent as for the last two years. A full crop of grapes is almost assured.

Tomatoes.

Early tomatoes have been a heavy crop and later yields are showing well. Foreign Countries. Conditions in Europe and the United States are unchanged. The crop is everywhere short, and good prices are being paid for good fruit. This has stimulated shippers to send forward immature fruit. Several shippers have been prosecuted under the fruit mark act for branding such fruit No 1. or XXX
