been with importers.

THE NICKEL MONOPOLY IS BROKEN AND ITS CHAMPIONS RUSH TO COVER

The World has burst the monopoly of the International Nickel Co.; he two governments, those of Ottawa and Toronto, that found themselves with it on their backs are rushing to get away from it; nickel refining plants are soon to be started in Canada; and, notwithstanding the ghost talk that nickel refining plants must be on the seashore, and therefore out of Ontario, these plants will be in Ontario, and in Ontario only; they will use Ontario hydro-electric power; and the province will soon be the seat of the greatest nickel-steel industry in the world, and many other associated industries.

And the credit for this significant change may come in part to The Toronto World and the men in parliament who sided with it in the fight LEAVE PLACE ON FIRE that has been carried on against this German-born octopus. And some very significant political changes will soon follow from The World's long and arduous campaign for the national policy of Sir John Macdonald.

And the power of the politicians and agents of foreign monop located in Canada is for a time at least soon to end. Even the Standard Oil Company may be one of these. The North Perth elections gave the coup de grace to a scandal that has hurt Canada in this great war for the freedom of the world and the ending of kaiser-born tyranny.

Sir Robert Borden, Hon. Frank Cochrane, Hon. W. H. Hearst, Hon. G. Howard Ferguson, The Globe newspaper and others, might "when found make a note on it." And Hon. Wallace Nesbitt, like Othello, will find one of his occupations gone. And Canadian soldiers will never again, we hope, have to face enemy bullets made of Ontario nickel. Or British warships and merchantmen run up against enemy warships and submarines built of steel and strengthened with Canadian nickel and armed with great guns built of the same Ontario alloy.

the nickel situation after the Perth elections. An evening paper quoted Hon Mr. Hearst as saying that nickel hadn't "On the right bank, the Germans un- sault. In the course of their retreat a particle to do with the result in North fits; yet two or three days ago it ac Perth! The World is sorry for Mr.

But, in the same paper, he is quoted as saying that the Ontario Gover has acquired rights in a new hydroelectric process for the economical treat-ment of nickel ore; that this process would be cheaper than the one now used by the International Co. at their New ersey plant; and that further infe tion will be forthcoming when the com-mission appointed by his government to

The World imagines that both Hon. Mr. Hearst and Hon. Mr. Cochrane are very much concerned about the nickel situ ation, and about the cold-blooded fact that both the Ottawa Government and From July 2 to July 8 107 officers, 1,-684 men, 8 guns, 10 machine guns and into camp by the International Nickel 4 bomb throwers were captured. A Co., a concern that at bottom is controlled by Germans, and which at this very moment is distrusted by the govern-ment of the United States, now very busy on supplying nickel armor plate for

The people of Canada are not now discussing what Mr. Hearst and the Ottawa government are going to do. but what they have done in connection with the international Nickel Co., and how it is that today Caradian nickel is largely used by Germany; how that Germany is in possession of large stores of Canadian nickel in the United States; and how that there is a German undersea vessel now in Baltimore loading up with Cana-dian nickel for the empire of Germany in this war if that vessel can success fully run the British blockade; and fur-ther how that she is to be followed, if successful, by other vessels on a similar rubber were obtained from British sources, and if such agreement were

If this is the attitude of Mr. Hears he had better call in some of his mem-bers and friends and some of the Conservative members of the Dominion boys who are at the front exposed to bullets made from Canadian nickel in the possession of German soldiers. Hon. Mr. Cochrane, minister of railways at Ottawa, who has been closely associated with Mr. Hearst in this nickel business is very much concerned about the situ der the circumstances, notwithstanding the statement put out by the Ottawa Government yesterday that they were utely confident that no Canadian nickel was falling into the hands of Gernan agents in the United States.

The Mail newspaper, which is very friendly to both governments, is certain ly much concerned about the situation, and it prints news that Captain Konig of the Deutschland has a perfect right to take nickel from the United States to Germany, if he can get there, and that he has the nickel in sight on the Baltimore docks; and if he has, according to an editorial from The Mail of Tuesday, this will be an end forever to all outsid centrel of the Canadian nickel eres and

The Toronto Globe is also very much The Toronto Globe is also very much concerned about the nickel situation after passing thru a panie over it; and its latest conclusion is that the government may have to take over the whole business of refining nickel in Canada and ewaing all the plants. The Globe didn't hold this view a short time ago. The Globe was very concerned not long ago that there should be no interference with that there should be no interference with the privileges of the International Nickel the runi

in its effort to secure an im-nevy. But The Globe carefully a concerns; in fact The Globe wasn't sure that this was the fact. One would have that this was the fact. One would have thought a newspaper that had so vigorously denounced this profiteering that existed in armaments would jump on the one company in America that held the whole situation for the other companies, and especially a company that seemed to be under the special protection of two Canadian governments. Now has The Canadian governments. Nor has The Globe ever concerned itself about the payment of the royalties which provincial law had imposed on the International Nickel Co., and which that company

In due time all the facts about this nickel scandal will be presented to the people of Canada, and they will be presented to the people of Canada in any by-elections that may happen along either in federal or provincial politics; and in the legislature and parliament when they happen to meet. We imagine, however, that some very radical change will take place immediately, arising out of this nickel scandal, and we would not be surprised to hear that Hon. Frank Cochrane had decided to withdraw from the responsibility of office, partly by reason of his loss of health, which everybody deplores; partly by reason of the anded the Hearst and Borden governnents in connection with nickel.

We also imagine that it will not be long before the government at Ottawa and the government at Toronto will be turning handsprings in order to recover the ground they have lost, and that the Induction of nickel outside of Canada, but no longer be able to head off any rival concern ever getting into the business. This is one feature of the story that has yet to be presented : How they have they have forced everybody from whom they bought nickel claims to sell them on the terms that this company dictatedone of the bitter experiences of a great many claim-owners who are residents and citizens of Canada.

Besides what Hon. Mr. Hearst says of the offer of his government to go in the refining of nickel, we are glad to hear that at least two Canadian co that the real facts have been partially about to embark in the bus that the monopoly of this America man company in Canadian nickel will soon disappear, and that Canada, having the monopoly of nickel, will be able to control it absolutely in the interests of control it absolutely in the interests of Canada and of the empire, and of the allies of the empire.

The North Porth electors did a great day's work! Hats off to them! The In-ternational Nickel Co, and the ar-mament trusts associated with it are on

: WAR SUMMARY:

THE DAY'S EVENTS REV EWED

RITISH troops again proved their superiority over German troops in fighting on even terms by retaking Mametz wood on Redmond cites the following passage the front between the Somme and the Oise vesterday after from Lord Lansdowne's speech: the Germans had recaptured it by heavy counter-attacks in the course of the preceding night. They also ejected the enemy from part of Trones wood, which he had re-entered, and they repulsed two heavy attacks launched against Contalmaison by causing them already off the statute books; therefore completely to break down under their fire. These successes were it will be permanent and enduring in won in sharp local fighting.

As was to be expected the successful wresting of the entire system of German front line trenches from the grasp of the enemy has attracted large hostile reinforcements to the Somme front. Altho these attacked the British with all their might and gained some ground, their successes, as seen from the foregoing, were short-lived Whether the British or the French, who did nothing yesterday on the Somme front, will keep hammering away there or will strike at some point in the German lines that has been weakened by the despatch of reinforcements to the Somme is still one of the secrets of Gen. Joffre. The recent moving of the Russlan contingents forward to the fighting lines may forecast the undertaking of an independent opera-tion by these forces. It will be noticed that these did not proceed to the front till some days had elapsed after the offensive in the Somme valley began. This fact may signify that they had been held discreetly in the background till the French Intelligence department ascertained the new dispositions of the troops of the enemy, brought
