

## EXPECT FIRST SHIP OUT OF LOCAL PORT EARLY NEXT MONTH

No Excess of Demand Over  
Available Freight  
Accommodation.

800,000 BUSHEL  
INC. P. R. ELEVATOR

Good Outlook at Present  
Time For General  
Cargo Space

A Montreal despatch last night stated that there was a steady demand from the Canadian pool and United States exporters for ocean grain room from West Saint John and that it had been reported the bulk of the available freight for December had been engaged.

Local agents of shipping companies agreed that there had been a good demand for tonnage but did not expect any excess of demand over the available freight accommodation.

It was said that the new concrete grain elevator of the C. P. R. in West Saint John was filled and had 800,000 bushels of grain and the grain was coming along rapidly for the C. P. R. second elevator on the West Side. The filling of the second elevator is to commence at once and its capacity is between 600,000 and 700,000 bushels. No grain has yet arrived for the C. N. R. elevator on the East Side of the harbor.

### FIRST STEAMER.

While the first passenger steamer of the winter port season, the Montrose, is expected to arrive in Saint John on Nov. 28, local agents did not expect the first grain shipments out would be made until the first week in December.

Percy Turcot, agent of the McLean Kennedy Limited, did not think there was any danger of there being a shortage of ships or any excess of demand for ocean grain space during December. He said the ships were available and could be in port when they were needed. December had always been a slack month for ocean freight from Saint John and the busy time generally came in January. He had only heard of one tramp steamer being booked to come to Saint John for grain up to the present time.

D. W. Ledingham, agent of Furness, Withy & Company Limited, and the William Thomson Company Limited, said there was a good demand at the present time for general cargo space and while grain carrying was the backbone of overseas freight business, general cargo paid better when it was obtainable. The vessels of the two companies, he represents, would be carrying general cargo during the early part of December and had sugar and automobile freights for their earlier sailings. The first of their steamers to load grain would be the Manchester Corporation, expected to arrive here early in December.

### BUSY SEASON HERE.

H. C. Schofield, local agent of the Robert Reford Company Limited, said that all grain cargoes were booked in Montreal. The firms which he represents will have five steamers sailing from Saint John in December and they are preparing for a much busier season this year than last.

The first of their steamers to load grain this season will sail in the first week in December.

It was decided to send out a circular letter to all the members and adherents setting forth the financial needs of the church. An every person canvass by teams from the session and board of trustees was decided upon and will be begun at the close of a supper to be held on Monday night.
