With most persons there is an error in life when the eye is open to the fact that the eye is not quite as com- plete as it is supposed to be. It is in this elongated axis, there is thus an elongated axis of vision, a book is held fur- ther off to be read. This deficiency can be remedied, when it is a by a Hence when this improvement on is first re- alized and the individual obtains proper aid to the eye, the result in the one case will be restitu- tion of original focal power, and in the latter case, preservation of the existing focal strength. It is therefore important that the pur- suer of science, the very acme of trans- parency and accuracy of focus should be employed to meet the requirements. The CELEBRATED PERFECTED SPECTACLES AND EYE GLASSES manufactured by **LAZARUS, MORRIS, & CO.,** and their copyrighted system of fitting them is claimed to meet the requirements of each particular case.
