

MR. McDUGALL'S MEETING IN APPLETON.

We had the pleasure of attending Mr. McDugall's meeting in the village of Appleton on the evening of Monday last. There were present a large number of the electors, so many that it was found necessary to hold the meeting in the open air. Robert Teskey, Esq., was elected chairman. On the platform were Messrs. McDugall, Galbraith, Rosamond, and John Scott, who each in turn addressed the meeting, and were replied to by Mr. McDugall, in his usual masterly style. We have not room this week for any sketch of the speeches, or even comment upon them. At the close of the meeting, it was moved by Thomas McNally, seconded by William Young, that this meeting heartily approves of the course the Hon. Mr. McDugall has pursued for the past eight years, as the representative of this constituency. Carried.

Moved by Duncan Stewart, seconded by Andrew Wilson, that the Hon. Wm. McDugall be requested to come forward again as a candidate for the representation of North Lanark at the ensuing election. Carried.

We observed a few individuals in the crowd who were anxious to make a show of opposition to those motions, and held up both hands against them, but the resolutions may be said to have been carried almost unanimously. It is very creditable to observe that the best of good order was observed during the whole length of the meeting, though the proceedings lasted until midnight.

As was anticipated, the emigration to Manitoba is assuming very large dimensions. The *Manitoba Liberator* of the 15th inst. mentions the arrival of quite a number of farmers, accompanied by their families, and bringing with them a large amount of stock as well as farming implements. It is said they are almost entirely from Ontario, though some are from the adjacent parts of Minnesota. The *Liberator* adds that it is reported as many as 2,500 were, at the time of writing, on the road to the States, and that 800 at least were expected during the season by the Canadian route. This may very possibly be exaggerated, but there is no doubt the influx of settlers is very large, and is altogether likely to increase in volume.

SLAVE BOULEVARD.—The British Government allows to captains of slave vessels on the African coast a premium of four pounds sterling a ton on each vessel, captured, or five pounds a head on each slave found on board the slave. From the report of these bounties, the slave trade does not seem to be flourishing as well as formerly. During the eighteen months ending January, 1872, only twenty-four vessels were captured in all, and of these only six were restored to their owners. Seven hundred and twenty-two Africans were found on them, of whom two hundred and eighty-four were returned to the vessels, and three hundred and seven were manacled, the other sixty-two dying between the capture and condemnation of the vessel. In one case, where only two slaves were captured, the captain ordered the eight hundred and eighty pounds to be paid to him, but the captain was careful to calculate it by the ton.

An ingenious patent is now being worked by which leather for the sides of boots and shoes is rendered impervious to wet and damp by exhausting the air from the pores of the leather, and filling them with a substance which unites with and adheres to the fibre, thereby strengthening without impairing the elasticity of the material. It is stated that the patent, known as "Patent Water-proof," is not only likely to be employed for the above-mentioned purpose, but that when applied to leather, it becomes more pliable and supple, and the leather is rendered more durable, and will prevent splitting.

The authorities of California have engaged a professional artist, at a salary of \$15,000 per year, to attend to the setting out of forest trees in different parts of the State. They never did a worse thing. Our forefathers found two fatal diseases when they landed on this continent—the Indian and the forest. They at once proceeded to exterminate both, and their duty, transmitted to their children has been nearly successful. We may never regard the Indian as a friend, but our feelings toward the forests have changed. We want trees judiciously distributed everywhere—on the mountain side, in the fields, along country roads, in front of city residences, in parks and gardens; wherever space, however tiny, may be found.

We understand that, one day last week, a Yankee swindler succeeded in operating upon Mr. Wells, a broker in Prescott, to the amount of three thousand dollars. It was one of the most villainous swindles ever perpetrated in Canada, and should prove a warning against having any similar transactions with strangers from that side of the St. Lawrence, no matter what they say of themselves, unless they are fully and satisfactorily accredited by respectable parties.

We would direct the attention of the public in this place and neighborhood to the political meeting to be held by the Hon. Wm. McDugall, on Saturday next, the sixth of July, at 2 o'clock, p. m. The other candidates are also expected to appear at the meeting and state their objections.

DOUBTFUL.—Mr. Rosamond appears to be extremely ill-favored with Mr. McDugall. Low, vulgar abuse of him through his organ, appears to constitute his entire stock in trade in politics. Perhaps Mr. R. expects by this means to build up his own reputation. Vain hope!

CRICKET.—A match took place on the Lanark Cricket Ground, on Monday last, between the Mississippi Boys, of Carleton Place, and the Lanark Cricket Club, which resulted in favor of the latter, by 1 run and 8 wickets to spare. The score will be published next week.

Lord Tenterden and Sir Russell Palmer left Geneva on Friday, and the other arbitrators left on Saturday. The conference is now over.

Don't forget McDugall's meeting at Carleton Place, at 2 o'clock, p. m., on Saturday next.

THE TREATY IN THE HOUSE OF LORDS.

THE CLAIMS WITHDRAWN FINALLY. London, June 27.—When the House of Lords assembled this afternoon there was a full attendance of Peers and visitors' gallery was crowded, announcement having been made that Earl Granville would make a statement relative to Alabama claims arbitration. Shortly after meeting of the House Earl Granville stated that he had just received a telegram from Geneva wherein he was informed that the tribunal of arbitration to be constituted during the summer, Earl Granville then proceeded to make the following statement. The Board of Arbitration under Treaty of Washington met at Geneva on 15th instant. The Agents of the United States presented a printed argument referring to the points wherein his Government relied. The English Agent presented an argument but made a statement that whereas differences still existed between the two Governments, England asked for an adjournment of the Board. The United States Agent was unable to answer, and the tribunal adjourned until the 17th, and again until the 19th, the second time because the American representatives were still without instructions. At the meeting on the 19th the arbitrators made a statement on the question at issue between the two Governments, carefully guarding themselves. The purpose of their statement is that after a careful perusal of everything said by the representatives of the United States in urging the indirect claim, the arbitrators have, individually and collectively, concluded that the said indirect claim, which constitutes upon principles of international law a good foundation for awards of damages between nations, and should be wholly excluded from consideration, and would have been, even if no disagreement had arisen as to the competency of the tribunal to decide the matter. The arbitrators informed the agents of both Governments of their decision. They asked Lord Tenterden what observation he had to make, and he replied none. A similar question having been put to Mr. Davis, the American agent, he said he had to reply to make at present, and asked for an adjournment. An adjournment until the 28th was thereupon agreed to by the arbitrators; but the American agents received instructions earlier than they expected, and the Board was informed on Tuesday last that the United States would not further insist on the indirect claims before the tribunal, and that they might be excluded from all consideration.

At this point Earl Granville was interrupted by loud cheers. He continued to say that Lord Tenterden then asked for an adjournment of one day to allow him to obtain facts from London. At the meeting of the Board, to-day, England on the ratification of the statement withdrew the request for a long adjournment, and the argument by counsel on the details of business before the Tribunal is now proceeding. Earl Granville then continued and heartily cheering concluded with an expression of hope, that the relations of the two great kindred nations would be harmonized and strengthened by the treaty of Washington.

The excitement occasioned by the statement of Earl Granville had subsided, Lord Cairns arose and congratulated the House upon the favorable decision of the Tribunal of Arbitration. Had it, said he, been otherwise, the position of the English Government would have been awkward. Earl Granville declared that the ground for the indemnity indulged in by Lord Cairns.

At half-past ten o'clock last night O'Neill's grain store was discovered to be on fire. In a few minutes the whole building was in flames. The alarm being given, the whole village turned out with buckets and worked most vigorously to keep the fire from spreading to the Great Western Railway buildings and Fuller's and Campbell Bros. grain stores, in which were some 60,000 bushels of grain. O'Neill & Co. had about 700 bushels of oats and 300 or 400 of wheat, and about 1,500 lbs. of wool. Most of the wool and part of the oats were saved. The cause of the fire is a mystery. We cannot learn whether there was any insurance or not. The loss must be at least \$15,000 to \$20,000.

A gentleman in Germany recently applied to a lady for her daughter's hand. "What fortune have you?" was the first question as usual.

"Oh, I have 50,000 francs net."

"Well, I'll tell you," he said, "I have bought several bottles of wonderful hair wash from a perfumer who offers 50,000 francs to any one who will prove that it fails to make the hair grow out again. Now as my hair has not grown out, I have notified the perfumer, and, as soon as I receive the sum I shall lay it at your daughter's feet."

It is unnecessary to add that the mother asked time for consideration.

It is calumny to say that men are nervous to heroic action by ease, hope of pleasure, recompense—anger plums of any kind—in this world or the next. The messenger of death is mortal here, and the poor, weary, soldier, hired to be shot, has his honour of a soldier different from regulations and a shilling a day. It is not to taste sweet things, but to do noble and true things, and vindicate himself under a God's heaven as a God-fearing man, the poorest son of Adam dully longs. Show him the way of doing that, and the dullest drudge kindles into a hero.

A Wisconsin boy of seven years, named McAulay, fatally shot a Plymouth of the same age a few days since. The boy had been playing with a pistol to his father's boy, who had been going to his father's office to obtain a gun, and then induced the boy to go among some bushes, where he shot him, the ball taking effect in the abdomen. McAulay returned home, remarking that he had "killed a rabbit." An hour later a gentleman riding by, attracted by a groan, and found the little fellow lying on the ground, and able to tell who shot him. He was taken to his father's house and there died.

A disturbance between Mrs. James Clear and Mrs. Hannah Kelly, of Jersey street, Easton, New Jersey, on Monday, resulted in Mrs. Clear's son, James Kelly, being shot in the head by Mrs. Kelly. Mrs. Kelly then rushed in and whipped both Mrs. Clear and her son, and soon after Mrs. Kelly was arrested for assault and battery, while her opponent got clear, as Jersey law does not prohibit the painting of one's neighbor's children with vermillion.

CHATEAU, June 27.—A ship-carpenter named Wm. Welber was accidentally killed this afternoon. While driving a spike the hammer slipped from his hand, and fell on a spike in a plank, seven feet long, which entered his skull. He lived but two hours after.

A Memphis dentist and the gentle partner of his joys and sorrows have been held to trial for \$6,000 for neglecting a little girl nearly to death.

CARE OF BEES IN JULY.

The surplus honey-boxes should be all hives a little before while clover comes into full bloom. In the early part of the season the instinct of bees prompts them to rear brood, and they will store honey in the boxes. If they had honey abundant they rear the more brood. Later in the season brood rearing gradually diminishes and the instinct then to store honey for winter use. We must take advantage of this instinct and give them every possible facility, and when the weather is warm, and very strong in numbers now and gather large amounts every day. Give all that they store the full complement of brood. They take possession and begin to fill them much more willingly while honey is abundant than when the supply is scanty. Properly managed, they will be very strong in numbers now and gather large amounts every day. Give all that they store the full complement of brood. They take possession and begin to fill them much more willingly while honey is abundant than when the supply is scanty. Properly managed, they will be very strong in numbers now and gather large amounts every day. Give all that they store the full complement of brood. They take possession and begin to fill them much more willingly while honey is abundant than when the supply is scanty. Properly managed, they will be very strong in numbers now and gather large amounts every day. Give all that they store the full complement of brood. They take possession and begin to fill them much more willingly while honey is abundant than when the supply is scanty. Properly managed, they will be very strong in numbers now and gather large amounts every day. Give all that they store the full complement of brood. They take possession and begin to fill them much more willingly while honey is abundant than when the supply is scanty. Properly managed, they will be very strong in numbers now and gather large amounts every day. Give all that they store the full complement of brood. They take possession and begin to fill them much more willingly while honey is abundant than when the supply is scanty. Properly managed, they will be very strong in numbers now and gather large amounts every day. Give all that they store the full complement of brood. They take possession and begin to fill them much more willingly while honey is abundant than when the supply is scanty. Properly managed, they will be very strong in numbers now and gather large amounts every day. Give all that they store the full complement of brood. They take possession and begin to fill them much more willingly while honey is abundant than when the supply is scanty. Properly managed, they will be very strong in numbers now and gather large amounts every day. Give all that they store the full complement of brood. They take possession and begin to fill them much more willingly while honey is abundant than when the supply is scanty. Properly managed, they will be very strong in numbers now and gather large amounts every day. Give all that they store the full complement of brood. They take possession and begin to fill them much more willingly while honey is abundant than when the supply is scanty. Properly managed, they will be very strong in numbers now and gather large amounts every day. Give all that they store the full complement of brood. They take possession and begin to fill them much more willingly while honey is abundant than when the supply is scanty. Properly managed, they will be very strong in numbers now and gather large amounts every day. Give all that they store the full complement of brood. They take possession and begin to fill them much more willingly while honey is abundant than when the supply is scanty. Properly managed, they will be very strong in numbers now and gather large amounts every day. Give all that they store the full complement of brood. They take possession and begin to fill them much more willingly while honey is abundant than when the supply is scanty. Properly managed, they will be very strong in numbers now and gather large amounts every day. Give all that they store the full complement of brood. They take possession and begin to fill them much more willingly while honey is abundant than when the supply is scanty. Properly managed, they will be very strong in numbers now and gather large amounts every day. Give all that they store the full complement of brood. They take possession and begin to fill them much more willingly while honey is abundant than when the supply is scanty. Properly managed, they will be very strong in numbers now and gather large amounts every day. Give all that they store the full complement of brood. They take possession and begin to fill them much more willingly while honey is abundant than when the supply is scanty. Properly managed, they will be very strong in numbers now and gather large amounts every day. Give all that they store the full complement of brood. They take possession and begin to fill them much more willingly while honey is abundant than when the supply is scanty. Properly managed, they will be very strong in numbers now and gather large amounts every day. Give all that they store the full complement of brood. They take possession and begin to fill them much more willingly while honey is abundant than when the supply is scanty. Properly managed, they will be very strong in numbers now and gather large amounts every day. Give all that they store the full complement of brood. They take possession and begin to fill them much more willingly while honey is abundant than when the supply is scanty. Properly managed, they will be very strong in numbers now and gather large amounts every day. Give all that they store the full complement of brood. They take possession and begin to fill them much more willingly while honey is abundant than when the supply is scanty. Properly managed, they will be very strong in numbers now and gather large amounts every day. Give all that they store the full complement of brood.
