

HOW TO GET SOME PEOPLE VERY RICH

Have you ever stopped to think how much money other folks have and how very easily they get it? Have you ever seen some new street car or truck and thought, "I wish I had that money" and in fact you will find that some years ago they learned how to make a little money do a whole lot of work and they now enjoy the benefits.

The lucky people who have plenty of money, have found how to make their money work for them, how to make their money make more money and how to get more money all the time.

There is no use expecting to get rich by placing your savings in a bank where you will get **THREE CENTS ON EVERY DOLLAR** every year. If you invest in such a bank, you cannot hold new insurance where they get 50¢ on putting the money in the bank.

Will you ever stop to think that you could, with the money you have, build up your capital in very few years, and then in a rich man's—happy world?

Will you let me tell you how to do it, will you let me tell you some good advice? Advice that you don't have to take unless you are satisfied that it is a good advice.

It won't cost you anything to read this advertisement through. I am quite positive that you will understand my proposition. You will see how easily money can be made if you have the right opportunity.

A FINANCIAL OPPORTUNITY

THE STORY OF AN AMERICAN BUSINESS AND POLITICAL COMPANY, LIMITED.

J. R. COYNE, President and General Manager.

I have been raising chickens and dogs all my life as a farmer. Two years ago I saw the opportunity for establishing a large plant, and I gave the whole of my time to the business, getting up every other business.

During the first year I made \$1,000,000 in income. I sold 200,000 chickens, dogs and eggs for hatching to clear \$18,000 in eight months, and all this done by turning over the money made out of the business. It proved that I struck it right in time.

FOURTH: It is a man who is at all well informed, will observe the claim that the poultry business in both Canada and the United States is the most important industry. As a matter of fact, it is the most important, not only in this, but in every other civilized country; for poultry and eggs are more essential to the welfare of a society than anything else. The entire industry really relies on the actual value of poultry and eggs as a source of food.

The raising of chickens for brood-up purposes and the raising of eggs for hatching is one of the branches, deriving from the unlimited demand for high-class poultry, the most profitable all over the country, and if you take with them you will soon find out that they make money.

From the time I have had a unique method of raising, I am dealing with farmers, who are the best class to sell to. Farmers have money in the fall after they have sold their crops, but at other times, principally in the spring, many a farmer would go without purchased eggs unless he could buy them from me on AN EASY CREDIT. I build up my business by selling everything I raise on a year's time, settled by a lien note. Farmers are used to buying on time. They buy plows, tractors, hay, horses and so forth everything on credit. Will you not sell them, your chickens and dogs on credit?

ABOUT EGGS: We sell our eggs for hatching at 20 cents apiece. We can point out several large egg plants who are getting 10 per cent, on their investment who do not get 20 cents a dozen, not apiece, all the year around. So if there is money to be made, we can get 20 cents a dozen, then ought to be able to make a large profit by selling our eggs at 20 cents apiece. **WE CAN POINT OUT SEVERAL LARGE EGG PLANTS WHO ARE GETTING 10 PER CENT, ON THEIR INVESTMENT WHO DO NOT GET 20 CENTS A DOZEN, NOT APiece, ALL THE YEAR AROUND. SO IF THERE IS MONEY TO BE MADE, WE CAN GET 20 CENTS A DOZEN, THEN OUGHT TO BE ABLE TO MAKE A LARGE PROFIT BY SELLING OUR EGGS AT 20 CENTS APiece.** We sell more eggs of 150, 200, 250, 300, and even get 40¢ for a set, but as a rule we will average \$25 on the total shipment. You can see the margin of profit left.

As to brooding, the orders are always coming in faster than I can fill them, and that is the reason why I want to increase my capital by selling more of my brooding orders.

I honestly believe that, if I can secure the cash capital necessary to keep the stock and increase our plant, I can sell 200,000 eggs for hatching next spring, out of that income, and covering the plants and the dogs, we could clear \$25,000, which is only 15 cents each egg—I have 2 cents for each of production, advertising and income. This gives you an idea of the possibility for making money.

MY PLAN

I have the largest plant of its kind in the world. The plant can be seen. The stock is 8 miles east of the City of Chatham. Forty buildings with a bearing space of 50,000 square feet, contain 124,000 cock turks, 35,000 chickens, 200,000 eggs and 2,500 cock pups, and with that output, the profits paid to our shareholders would stagger anybody, even those that always expect to get what is nearly impossible to get.

MY COMPANY

My company is incorporated with a capital of \$100,000 divided into 200,000 shares of \$50 apiece. I sold my stock, stock notes, good will for \$25,000, and have left me for about \$75,000 worth of shares, except my expenses and the interest on the same. I have about 500 shareholders living all over Canada and the States. I now have for sale 15,000 shares at \$5.00 apiece which will bring in \$75,000, sufficient amount to carry on, and enable us to double our money in a very short time.

MY OFFER TO YOU TO-DAY

I will sell you one, two, five, ten or a hundred shares, or more if you want at \$5.00 a share of par.

As a matter of fact, I will sell you one share at \$5.00 and I will send you the same amount in the form of a dividend check. I have a few dollars invested now in my Company which will enable you in the near future to draw a regular income from the large profits of the Company as they are earned.

It is truthfully my joy to you that you have an opportunity to become interested in the largest plant of its kind in the world, which is a company, and remember that it is by no means an ordinary one, the business has been successfully worked on from a little brooding stock for several days previous to the day in the world, and this has been worked out of the profits made in the business only. It may be a new proposition altogether, but study my offer, and just figure that if I was able to clear \$14,000 in 6 months out of a small stock, and with such a prospect, that you could, if you wish, to get a profit of \$100,000 in 6 months out of a small stock. My business will be established all over the world.

As to the interest of the shares, I want to have enough money to pay and have my shares sold to you. I don't intend to pay any more 3 per cent interest on some poor fellow who puts his money there and gets **THREE CENTS EVERY YEAR**. I want to have enough money to buy all the stock that we will need to fill orders if we cannot produce enough to fill orders. I can fill every other man's business, working hard to make money, and anxious to have the best chance possible, and I know that as soon as you will become interested in my Company, I know you will like it, and I know that you will also like to get the fat dividends we will pay yearly.

ALL YOU HAVE TO DO, IS TO BE IN THE BLANK FOR AS MANY SHARES AS YOU WANT TO BUY, AND TO SEND SOME OF MY ADDRESS AT ONCE WITH YOUR REMITTANCE, EITHER BY CHECK, MONEY ORDER, REGISTERED LETTER OR BANK CHECK.

To J. R. COYNE,
Chatham, Ont., Canada.

I hereby apply for and agree to take and subscribe for _____ Shares of the
par value of FIVE DOLLARS of the Capital Stock of THE GOLDEN KENNEL AND POULTRY COM-
PANY, LIMITED. I hereby enclose the sum of _____ Dollars,
being payment of Five Dollars per share on the above shares. Send me a receipt and also a Stock Cer-
tificate as soon as the stock will be allotted to me, to the following address:

Name

Address

Now don't delay, don't put this off, better all down right now and think the matter over, study my proposition for all the life in world; if there is some special information you want to know about, write me, I will be glad to tell you and will reply to your requests. I have no high priced advertisements to send, because I don't wish to make any money, but I prefer to make it and let you decide on the merits of my offer which is really a financial opportunity for everybody who has a few dollars and desires to make his money work for him. Address all letters to J. R. COYNE, Chatham, Ont., Canada.
