WHY YOU SHOULD BUY SIMONDS SAWS

Because this steel will take a temper to hold a cutting edge longer than any ordinary saw—the Simonds Saw, Crescent Ground, will cut 10 per cent. more timber with the same expenditure of time and labor, than any other brand of saw made to-day. No saw has ever yet been returned owing to the above warranty not being fulfilled.

Because Simonds Crescent Ground Cross-Cut Saws do away with all binding in the kerf, and enable the operator to push as well as pull the saw.

Because they cost no more than unmarked, inferior brands.

Simonds Saws with the name "Simonds" stamped on them.

The illustration shows a one-man cross-cut saw, and is known to your hardware dealer as No. 237. Ask for it.

Write direct to the factory for any other particulars.

Always buy a saw with a sharp cutting edge—not a soft saw—because the former lasts longer and keeps its edge better.
