The National

Stands First.

This is no vain boast. Others may claim this place, but the National Cream Separator soon proves its superiority when brought into competition with them.

The National is as represented. The closeness of its skimming has not to be sacrificed to keep up its advertised capacity.

It makes smooth cream, which is easy to churn.

Its turns easily, is quickly cleaned, having so few parts, and these easily adjusted.

Its milk tank is conveniently low, and its gearing enclosed.

There are more than a hundred reasons why folks who try it like the

Empire

Cream Separator

better than any other, but the reasons may all be summed up in this:

The Empire does better work, gives less trouble and makes more money for the farmer.

Our books about the Empire Way of dairying are free for the asking. Send for them.

Blue Ribbon is no doubt the Queen of Binder Twine. It runs six hundred and fifty feet to the pound, and is manufactured from most select Manila Fibre. Six hundred and fifty foot Twine is the only Twine manufactured entirely from Manila Fibre. Dealers should beware of so-called "Manila" Twines which are advertised to measure less than 650 feet to the pound. They are mixed Twines. Write for Samples.
