Kill the Gophers Early!

Get right after the gophers as soon as they show themselves this spring. Every female killed early means dozens less to destroy your crops during the season.

You'll have little trouble getting rid of the pests if you use the new poison,

"GOPHERCIDE"

(Registered)

It's a preparation with a base of Strychnine, and all its killing power. But in "Gophercide" the extremely bitter taste and the difficulty of dissolving strychnine have been entirely overcome.

"Gophercide" dissolves easily and completely in warm water, without any acid or vinegar. One package makes a half-gallon of solution, which will poison, through and through, a gallon of wheat—enough to kill over 350 gophers. As the poison penetrates the wheat, it does not wash off when exposed to rain, but keeps its killing power.

Thorough tests throughout the Prairie Provinces have proved that "Gophercide" is the most convenient and most effective gopher exterminator known.

Get a 50c. package, place the poisoned grain at the gopher holes, and you will get all the evidence you want inside one hour.

If your druggist hasn't "Gophercide", order direct from our nearest Branch.
