Farmers' Market

WINNIPEG MARKET LETTER

A gain in oats prices of three cents per bushel for contract grades and one-half cent more for lower-grades was made during the week. Friday's and Saturday's markets displayed the greatest strength, with a lot of strong buying of futures and a keen demand for cash oats of all grades. The real source of this demand was not definitely known, but the heaviest purchases looked like government business. The advance in price brought a lot of oats onto the market. During the week the U.S. government business. The advance in price brought a lot of oats onto the market. During the week the U.S. government period corn showed a big percentage of low grades, and the report was differently construed as bufflish or bearish. Meanwhile the movement of corn to the markets is very slow, and big premiums are paid for any that arrives, as much as 70 cents per bushel being paid over December shipment values.

The barley market has been quite dull and prices a little lower. Offerings are fairly liberal and receipts averaging over 40 cars per day. Prices in the American markets have been considerably lower recently and have affected our market to some extent.

Flax shows a gain of 10 % cents for the week, and a very large premium for delivery during this mont h. This is bringing out a lot of flax as shown by daily car receipts.
