

Get More Power from Kerosene WITH THE HART-PARR Tractor

All the power you need for better plowing, discing, hauling and belt work, with KEROSENE, is what you get when you buy a Hart-Parr Tractor.

Specifications
 Power—Pulls three plows—30 HP on belt.
 Motor—2 cylinder twin, 4 cycle. Valve in head. 750 R.P.M.
 Motor Frame—Cast steel, one piece. No bend. No twist.
 Carburetor—New Dray kerosene shunt.
 Bearings—S.K.F. and Hartz.
 Speeds—Two forward, 2 and 3 m.p.h.; one reverse.
 Transmission—Selective sliding gear.
 Radiator—Perlex—shaft driven fan.
 Lubrication—Madison-Kipp force feed.
 Weight—3000 lbs.

Delivers its full power without over-speeding, and runs smoothly under varying loads without throttling.

The new Hart-Parr is a sensible tractor, four wheels, twin cylinder, direct drive to pulley, simple, and all parts easily accessible.

The Dray Kerosene

Shunt, exclusive on the Hart-Parr, enables it to develop more power than any other tractor its size, and more power than any other tractor for fuel consumed.

If you can use power on your farm you should find out all about the Hart-Parr Tractor, because it gives power for all farm jobs at the very lowest cost.

I AM THE $\frac{3}{4}$ H.P. PETER PAN THROTTLING GOVERNOR ENGINE

AND I DESERVE A PLACE ON EVERY FARM
 I will run your Cream Separator, Washing Machine, Churn, Tool Grinder, Grindstone and Fanning Mill at just the right speed.

Order Direct Today

Complete, \$41.00 exactly as illustrated, including pulley

J.-H.P. Light Weight—Portable—Silent—Vibrationless—Economical—Trouble-proof—Constant Unvarying Speed and Power—Every Engine Fully Tested—All Wearing Parts Adjustable

AN IDEAL CHRISTMAS GIFT—SERVICABLE THE YEAR ROUND
 There has long been a demand for just such an engine as I. Being governed like a steam engine, I can adapt myself to any work within my power, as I will turn over at any speed at which I am set from 300 to 3000 R.P.M. I am light and can be easily carried from one job to another. I eat only when working, and then with a small appetite.
 My Carburetor is very simple and is my one big feature. Outside of the governor and the valve control block there is but one moving part in my carburetor. All you have to do is to keep my spark plug clean and the dirt out of my carburetor and I will give you no trouble.
 I have few parts and provision is made to take up wear. I am more durable, longer lived, more efficient and freer from trouble than any other engine made.
 Send direct to Macleod's Limited, Winnipeg for me, or if I am too small for your work, write them to quote on one of my big brothers, who range up to 15 H.P. My number is R.M. 380—PETER PAN Engine weight, crated, 112 lbs. \$41

I will run the Fanning Mill at a uniform speed, ensuring better separation of the grain than is possible by hand operation or by any other kind of gasoline engine.

Made to Separate

Wild Oats from Barley and DOES IT!

Made in Three Sizes:—

- MODEL A—3-ROLL MACHINE
- MODEL C—6-ROLL MACHINE
- MODEL D—12-ROLL MACHINE

This is not a Fanning Mill—it is The Twin City Wild Oat Separator—made for a specific purpose—to take Wild Oats out of Tame Oats, Wheat and Barley—and it does it—thoroughly and satisfactorily. It is a brother of the famous "Bull Dog" Fanning Mill—made in the same factory—built to fill an absolute need by people who know! It is the outcome of practical experience—yet, a marvel of simplicity in construction—so simple that a child can operate it and do just as good work as an experienced man. If the "Bull Dog" or any other fanning mill would do the thorough work we guarantee this machine to do—it would never have been manufactured.

That's Why You Should Own One

Because Long Bearded Barley cannot be separated on a flat surface (it goes wherever the oats do) the Twin City Wild Oat Separator came into being. Note the cleaner is made with a hopper which empties into the two upper rolls made of galvanized wire and corrugated. These corrugations make the grain tumble on and rather than slide on its side as when passing over flat sieves. This, ill-shaped kernels go through the revolving rolls—flat plump Barley or Tame Oats remain for your seed. Its action is just as positive in cleaning wheat and in taking out mustard.

This machine can be purchased with or without bagger and with special power attachments. It will pay for itself in grading oats alone, even if you only intend sowing 30 acres. This is the age of the specialist—it pays to buy the right machine for the right job. Better write for our prices tonight—you'll never regret it.
