Charles Parker Tells About the Swansea Development.

IT IS RICH IN COPPER ORE

Volcanic Brown has a Clear Title to His Famous Properties and Will Soon Begin the Work of Developing Them-The Plascot-Other Mining News.

Charles Parker, M. E., returned Thursday from a 14 days trip in the Windermere mining division of East Kootenay. Mr. Parker's principal mission was to see the development done on the Swansea copper mne. In speaking of the Swansea property yesterday Mr. Parker said: That the three shafts sunk on the property are in ore throughout. The mineral ized zone is 30 feet wide on the surface, in which are three, if not four, lenses of ore. Lense No. 1 is known to be 70 feet deep, with a length of 242 feet. The width of the lense 's from 18 inches to three feet. Lense No. 2 is 24 inches wide and over 200 feet in length. Shipping ore from lense No. 1 returns by assays made in this city today \$82.06; ore from lense No. 2, \$103.42; on the center shaft at the depth of 65 feet the pay streak of seven inches in width returns \$129.17, and the whole mineralized zone, excluding pay streak, returns \$7.66. At 10 feet down from the surface the pay streak runs \$66.24. The last shot in the north shaft on the 10th, exposed first-class ore, running \$81.14 and second-class ore, \$15.51. Fifty per cent of

the ore is shipping.
"The development consists of three shafts, one of 90, one of 43 and one of 42 feet. There is one crosscut tunnel, which shows the width of the mineralized zone at a depth of 50 feet to be 25 feet. The vein has been traced for over 1,200 feet and proven by work so far done for a distance of 500 feet. There is about 65 tons of ore on the dump, and there is fully 1,500 tons of ore in sight. The intention is to sink to the 200-foot level and then to run a tunnel in from the north side of the mountain for a distance of 450 It will take about six months to finish this work and then the mine should be on a self-supporting basis.

"This property is owned and operated Derby Mining company, limited, held in and the shares are principally Rossland, Toronto and Scotland. There is ample money in the treasury for devel-

"The Pretty Girl mineral claim, owned by The Golden B. C. Mining company limited, London, Eng., situated at an ele vation of 9,500 feet on the Selkirk range has been opened up by a shaft and tunnel tunnel taps the vein at a vertical depth of 125 feet, showing up a width of pedded veins of seven feet six inches, and which has not yet been cut through. The average copper assay from this wid per cent and 45 ounces in silver. assay from this width is 35

"The Toby Creek country was thoroughly prospected last season, and at date has number of advance agents negotiating for purchase of meritorious claims. Among those in the field is William M. Brewer, will be in condition to haul ore over. Then consulting mining engineer, Victoria, at present inspecting a group of claims Toby creek for Victoria investors. an eminent geologist, his decision will or will not have a favorable turn on the aspect of affairs; having been closely con-nected with geological surveys in Alabama for the United States government, his opinion is awaited by prospectors with interest. Provncial Geologist Robertson has already spoken favorably of the Windermere division, which is sufficient to en-thuse investors with the opportunities at hand for conservative mining.

VOLCANIC ACTIONS STOPPED

R. A. Brown Has Secured Full Control of Ad His Property.

"Volcanie" (R. A.) Brown of Grand borks is in the city. He has been attending court at Nelson, where suits were pending involving some of his valuable n neral property. Some years ago Mr. Rrown conveyed the celebrated Volcanic c aim to the Olive Mining company, having a capital of \$20,000,000. Notwithstand big that it had millions of shares in the treasury it got into debt and not having the cash to liquidate the same it closed down and the property was seized under e ecutions and the Volcanic sold last fall. Everybody thought that Mr. Brown would lose the property, most of which he had acquired 10 years ago. Mr. Brown, however, was on the watch and discovering that the assessment work recorded last ear was wholly inadequate, he had the claims relocated and acquired them from the new least is, and promptly applied for certificates of improvements. than eigh retirns were entered to contest his rights. Most of the parties wer present this week at Nelson, and on the eve of trial a settlement was made whereby Mr. Brown becomes the owner of all grade. three properties, and the other parties will receive a portion of their claims against the company. Mr. Brown feels quite elated over the matter and is well satisfied with the terms of settlement. Attorney-General Martin and Smith Curcis acted for Mr. Brown.

He proposes as soon as he gets his certifeates of improvements to begin work on the Volcanic and Iron Cap. The ore body on these is from 400 to 1,000 feet wide, running to the top of the Volcanic, which is elevated 1,500 feet above the river. The one body is decomposed iron and oxides on the surface, and is so large that it can easily be seen from points of vantage 10 miles away. About \$25,000 has been spent in development. There is a tunnel in 481 feet, giving a depth of about 700 feet, and the breast of it is supposed now to be near the mine the ore will have to the ore body. It will further on give a depth of about 1,200 feet. The people Gand Forks look forward to the up of the immense ore bodies of these claims as a big advertisement for their the Granite Gold Mines, limited, with city and district. The ore on the surface capital of £120,000. Forty thousand share is low grade, assaying in gold and copper are taken by the vendor company, the from \$5 to \$12, but it is confidently believed that exploration will demonstrate 69,993 shares are offered for subscription rich ore chutes. Assays as high as \$82 in 10,000 shares being he'd in reserve. gold and 12 per cent copper have been got new company is formed to acquire the from select samples. The adjoining Gold Granite and Royal Canadian properties en Eagle company, whose vein is said to Captain Duncan will retain the direction run towards the Volcanic, is now showing of affairs at the mine. The directors anplenty of high grade ore, with averages of nounce that the capital necessary for the

The Volcanic has an iron cap from 200 to 500 feet wide, with assays up to \$10 visited the Athabasca mine and reports to 500 feet wide, with assays up to 510 visited the Athabasea mine and reports in gold and 12 per cent copper. A shaft that 27 men are working steadily there, and things appear to be "going strong."

The Ymir mine has now almost the full

to have large forces at work on all his and these are not considered necessary

THE LARDEAU COUNTRY.

The Rossland Surveys Are Making Good

Mr. G. E. Townsend has returned from a visit to the Lardeau country, whither he went for the purpose of examining properties in which he is interested. There was too much snow on the ground and he could not reach them, and so he will have to make the attempt again in a few weeks He reports that both the Canadian Pacific and the Great Northern have surveying corps in the field making prelimina surveys of the route to be followed. On the north fork of the Lardeau the sur veyors have reached Circle city, and on the south fork they are up to Ten Mile creek. He reports that the strike is raising hob with the Lardeau country as elsewhere. The Silver Cup and other properties are shut down.

The Norway Mountain Section.

Stephen Brailo returned Thursday from the Norway mountain section, where he has been for some little time. Mr. Brailo reports that the trail is in good condition now as far as Grenville mountain, a dis-tance of 23 miles from this city. The construction of the trail to Gladstone is making good progress. There are several experts in the section now, who are examining properties for their principals and there is a probability that some deals Mr. Brailo was at the mountain he put in several days in opening a claim, which he has staked alongside the Cascade, and on which there is a good surface showing. He thinks that it will prove a valuable property, as he is certain that it has the extension of the Cascade ledge.

Work on the Mascot

Superintendent Williams of the Mascot reports that tunnel No. 3 has been driver in for a distance of 715 feet. Work has been commenced on a crosscut in the face of this tunnel. It is being driven at right angles with the tunnel for a distance of 162 feet, where it will inter ect the winz which is being made from tunnel No. 2. This winze is down from tunnel No. 2, over 100 feet, and will have to be driven about 100 feet before it reaches the level of tunnel No. 3.

The Snowshoe Ledge Tapped.

On the Snowshoe, in the crosscut that is being made from the Southern Belle ledge to the Snowshoe ledge, the ore body was broken into Thursday. The crosscut has been driven for a distance of 100 feet. It will take a day or two yet to determine the extent and value of the ledge.

MINING BRIEFS.

The 60 men employed on the Yellow stone property have quit work. The com refused to pay \$3.50 for eight hours'

Jay P. Graves has sent word from Spokane to Greenwood, where he is manager of the Old Ironsides, Knob Hill, Lincoln, City of Paris and other properties, that he would pay \$3.50 for eight hours work.

Wilson Piper, foreman of the Evening Star, reports that the road in the vicinity of the mine is getting in first class shape, shipping will be commenced.

THE TRADE DOLLAR.

An Option Has Been Secured Upon Per Cent of the Treasury.

Republic, Wash., June 17.-[Special.]-James Harvey today secured a 90-day option on 60 per cent of the Trade Dollar stock from Patrick Clark, paying ten per cent dawn. A working privilege is includ-ed in the option. A large force of men will start to work in the morning on the property. The capitalization of the mine is \$1,000,000, and there are 250,000 shares in the treasury. The deal is regarded as very important. The price paid was 16 cents per share.

Will Take Over the Lake Shore.

Mr. J. C. Drewry, managing director; Dr. R. J. Wilson, of Toronto, and Mr Alexander Pridham, of Granville, president, of the Canadian Gold Fields syndicate, will leave today for Moyie Their mission is to take over the Lake Shore property there on behalf of their company. From Moyie they will proceed east. Mr. Drewry, while he is away, will visit Toronto and Montreal, and will be From Moyie they will proceed absent for three weeks.

Vein Met in the Rio Grande.

T. A. Helm, superintendent of the Ric Grande, near Ymir, is in the city. Mr. Helm reports that in the tunnel on the Rio Grande, which is in 120 feet, the vein No less has finally been encountered and has been crosscut for a distance of six feet. The face of the crosscut is still in ore, and hence the width of the vein has not yet been determined. The ore is of a shipping

The Tamarac Vein Widening.

The officers of the Kenneth Mining company, which is operating the Tamarac yesterday received a letter from the fore man from Ymir to the effect that in the north drift the ore body has widened out to three and a half feet. It narrowed down some recently, but in the 100 fee of drifting that has been run in the north drift the vein averages five feet in width The ore in this drift averages between \$1

PURCHASED A PLANT CERTIFICATE OF IMPROVEMENTS

Rathmullen Company Found Work Too Slow a Way

WILL SINK TO 300-FOOT LEVEL

to Become a Canadian Company — Tatte
Shipped from Trail — Two Dividends Declared — Notes.

A, intend, 60 days from the date hereof, to apply to the Mining Recorder for a certificate of improvements, for the pure clared - Notes.

The management of the Rathmullen Consolidated Mining & Development company Friday signed a contract for a hoisting engine, a sinking pump and two machine drills. The machinery is in stock and will be immediately forwarded to the company's property in the Summit camp. The contract was awarded to the Jenckes Machine company. It is expected that this will be in operation inside of two weeks. It will be used on the Maple Leaf in deepening the shaft to 300 feet. A much heavier plant will be installed as soon as railway connection is given to Summit. The ledge on the Maple Leaf has been crosscut, and it was found to be 30 feet in width. There is nine feet of shipping ore in this ledge and the remainder is of the concentrating variety. The work is not confined to the Maple Leaf. A shaft is being sunk on the Ben Hur, which is now down a distance of 20 feet. which is now down a distance of 20 feet.

The ledge on the Ben Hur is six feet in width, showing copper values of \$36.50.

The ore carries 9 1-2 per cent copper.

Prospecting is in progress on the La Belle Marie claim, on which a very fine ledge has been discovered. The Rathmullen has 16 claims in one group. All the claims will be crown granted before the snow

Will Be Made a Canadian Company.

The Rambler-Cariboo, at a meeting held in Spokane, Thursday, decided to rein-corporate under the laws of Canada. It s at present a Washington incorporation It was also decided to increase the capital stock from 1,000,000 to 1,250,000 shares. This will give 250,000 shares with which to do some development work and to thoroughly explore the property. The mine is at present upon a basis where it is more than paying all expenses of operation, but it is desired to explore the ore bodies at much greater depth than hitherto, and also to open up the veins at points which have not yet been touched. To carry on this extensive work more considerably, money will be needed, and hence the in crease in the capital stock. A Toronto proker, it is reported, has offer take 100,000 shares practically the present market price, and the matter of changing the company from American to Canadian will at once be proceeded with. As soon as the long tunnel is completed and the ore can be taken out at a slight expense, the mine upon a dividend-paying basis, and will be it is believed that it is only a question of a short time when regular dividends will

The Silver Belt.

Mr. H. H. Johnstone left Friday evening for the Silver Belt property, in the Lar-deau country. Mr. Johnstone took one man with him, and will engage a force in the Lardeau to push development on the Silver Belt. He expects to have the property shipping ore by the fall.

Dividend Declared.

weeks ending June 2, 1899, are as follows One thousand seven hundred and ninety two tons of Silver King and 1,173 tons of custom ores were smelted, yielding, approximately, 26 tons of copper, containing 26,930 ounces of silver, 378 tons of lead bullion, containing 366 tons of lead: 75.870 ounces of silver: 578 ounces of gold

Work Started on Referendum

A crew of men have begun operations on the Referendum, on the north fork of the Salmon river. It was feared that the snow was still on the ground, but a letter received from the foreman yesterday said the snow was all gone.
