Butchers' Market Stalls.

Butchers' Market Stalls. Detroit Ness: When Detroit was a village a few butchers were furnished with a place of business at the city's expense, and for that early day with its bucolic methods the scheme was not so bad. It is otherwise with a metropolis. In village days all of the butchers were furnished with quartars, and none were discriminated against. In these days a few retail butchers are fostered by the city government as against the greater number. There are 428 retail butchers in the city of Detroit. Out of this greater number the insignificant few of 15 are in the central market. The 16, are poli-tionam. The remaining 413 build or rent their own places of business, and have not as yet tried their strength in politics, either to turn the 15 out or to build a vast struc-ture where low rent might prevail. <text><text><text><text><text><text><text><text><text><text><text><text>
