The Woman In Business

A New York real estate agent has been telling of some of his business experiences with women. Mrs. A., he says, wanted to find a house that would fit her carpets and wasted several weeks on the job. Mrs. B. had six children of her own, but wanted a guarantee that no other children would be allowed in the building. Mrs. C. signed a lease with a clause that no dogs should be brought in and then deliberately brought several into her family and told the agent such restrictions in a lease were of no account.

An ideal combination is to soap the body all over, using tepld water before plunging into a cold bath. But there are many good folks who cannot face a cold bath daily and who after taking one are apt to be cold and shivering all the day through. For these the best plan is, after a warm bath, to sponge the throat and chest with cold water, which is most stimulating and espe-cially so where the bather suffers from chronic colds. To insist on a cold bath is just as unwise as to have a bath is too warm and to remain in it too long. That is the more general

ANIMALS IN CUBA.

Game In Plenty and One Species of Semi-domesticated Snake.

Throughout Cuba game is abundant. Deer, though not native, have flour-ished and multiplied greatly. Rabbits are plentiful; also the wild boar, so called, the wild pig, the wild dog and the wild cat of the island. Wild fowl, especially ducks and pigeon, abound, the former crossing from the southern states during the winter season, while the latter remain on the island the year round. Pheasants, quail, snipe, wild turkeys and wild guinea fowl are also numerous, with several varieties of game birds, such as the perdiz, tojosas,

abiches and the guanaros. The only distinctive native animal is the jutia or hutia, ratlike in appearance and black. It grows to a length of sixteen or eighteen inches, not including the tail. While eatable, it is

not especially palatable. Cuba has more than 200 species of native birds, including those already mentioned as game birds, many pos-sessing the most beautiful plumage,

but those with song are rare.

In swampy localities crocodiles and American alligators (caimans) are found, and, although these frequently grow to an enormous size, but little attention is paid to them by the na-

Chameleons, small lizards, tree toads and similar harmless silurians of diminutive size are very common, while occasionally the iguana and other large varieties of the lizard species are seen. Few varieties of snakes exist in Juba. One of these, the maja, from Cuba. ten to fourteen feet in length, is a semi-domesticated reptile, if such a term may be used, for it is most frequently found about the huts, farm-houses and small villages, its favorite living place being in the palm thatches of the old buildings, while its favorite food is poultry. Another snake, named the jubo, is more vicious in disposition than the maja, although never reaching more than one-third its size. It is not poisonous. The other varieties are still smaller in size, are seldom seen and not venomous.

PASTED HIS OWN BILLS.

The Most Memorable Engagement Edwin Booth Ever Played. Edwin Booth once told a little company of his intimates that the most romantic, memorable and delightful engagement that he ever played in his life was one in which he was obliged to

paste his own bills. It was in the early years of his career, long before his famous hundred nights' run of "Hamlet" at the Winter Garden in New York, and at a time when romance and enthusiasm were still young in his heart. He had played with varying success in many parts of the country, journeying even to San Francisco and the few camps in the gold bearing country that were large enough to supply him with audiences. Here he had done so well that he felt encouraged to try his fortune in still remoter climes and accordingly em-barked from the Golden Gate for the Hawaiian Islands, where, in the Hono-lulu theater and under the direct patonage of the dark brown royalty that then held sway, he played an engage-ment to which he locked back in after years with much pleasure and satis-

faction. "But after the play was over," said Booth, "I found it necessary to climb down from the high plane of art to common ground and take steps to nnnounce my repertory to the public. This was done almost entirely by way of posters, and I could not trust the job to the native boys, because they alyou to the latter boys. Ways ate the paste and threw away the bills. My actors would not do it, because they were such eminent artists and thoroughbred gentlemen, so I had to do it myself. Many a time have I taken off the costume of Iago or Hamlet or Othello and gone out with a bucket of paste and a roll of paper to bill the town,' as we say here in America, for my next appearance."

Gentlemen,—In June, '98, I had my hand and wrist bitten and badly manglad by a vicious horse. I suffered greatly for several days and the tooth cut's refused to heal until your agent gave me a bottle of MINARD'S LINIMENT, which I began using. The effect was magical; in five hours the pain had coased and in two weeks the wounds had completely healed and my hand and arm were as well as ever.

St. Antoine, P. Q. A puny child is always an anxiety to the parents. There seems gener-ally no reason why the little one should be weak when it is so well fed. should be weak when it is so well feed.
But the fact is that it does not matter how much food the child takes if
the stomach cannot extract the nourishmeet from it. No binefit can be
derived from just eating. That is
the condition of many a sickly child.
The stomach and organs of digastion
and nutrition are not doing their
work, and the body is really starving.

KNOW THY COUNTRY.

Precept That Every Citizen Should Take to Heart.

Juvenal said, "This precept descends from heaven-know thyself." To this we add-know thy country. Know its area, its population, its products, na-tive and exclusive, agricultural and mineral. Know its present output and its possibilities. Know its states, its territories and large cities and what they are severally noted for. Know its geography and typography, its constitution, principles and history, its literature, its art and its sciences, its philosophy, discoveries and inventions. know its relation to other nations, both political and financial. Know its possessions — Alaska. Hawali, Porto possessions — Alaska, Hawan, Followick of their history severally, the customs and languages of their people and the sources of their wealth. Many men know these things now and love their country and are serviceable to their fellow citizens in proportion to their knowledge. It costs labor and the sacrifice of so pleasure to acquire this knowledge, but to the genuinely manly man, whose robin strikes it. The robin picks it up parting his own practical enthusiasm and shakes it and shakes it until it to other lives, there are a relish and a shakes the spines out of it—the fur, as delight in the search for knowledge that compensate a thousandfold.

How to Stain Floors.

Here is a good recipe for staining floors and also for staining around the carret in a bedroom: First get the floor perfectly clear. If there are cracks between boards fill them, then mix linguished by the carries of the conditions of the conditions of the carries of t seed oil and burnt umber together, a tablespoonful to a pint of linseed oil. Stir it thoroughly. If you wish it darker, put in more umber; if lighter, use more oil. Put it on the floor with a clean paint brush. Rub it evenly. After a few days, when dry, put on a second coat. Try a little of the str in on a piece of wood first to get the color you wish. When it gets solled or dusty mop it off with a little warm borax water, which will clean it nicely and not hurt the stain. You can retouch it now and then if it needs it. This finish resembles a hardwood floor.

There are too many people who would rather be out of food than out of style.
