

ideals of his thought. Lord Strathcona's Reply. Lord Strathcona, on rising to reply, was greeted with applause. His address was brief but sincere in its expressions of thanks for the reception that had been accorded him.

"I have not merited in the smallest degree what you have been kind enough to say about me, but I am assured that what you have said has been spoken from the heart.

"I have grown up with this country. It was seventy-one years and old since I came to Canada. Then it was in connection with a company of adventures of England, trading to Hudson Bay, which did service in the best interests of the Dominion in conserving to the old country and the Dominion the vast district in which the city of Edmonton has been placed.

"What changes I see in Western Canada since my last visit here. From the very moment of my coming to Manitoba there was evidence of such progress as would not have been considered possible a few years ago.

"Boundless Fields of Wheat. "What a sight it was—all these fields of fertile wheat and grain stretching from Manitoba to the Rocky mountains. That sight was worth coming miles to see.

"It is not well to think that all this great development has been accomplished by Britishers. And are you not all Britishers equally loyal with me another to the United Kingdom.

"The honor I most appreciate," he concluded, "was an unexpected one, it was the conferring on me of a degree by the University of Alberta.

"This concluded the ceremony and the party left immediately on return to Government House.

FIRST GUN FIRED IN GREAT CONTROVERSY

"Kindly rush the following wire to all the principal home and foreign geographical societies of all nations, including Japan, and Brazil: The North Pole was reached April 6, by Peary's Arctic expedition under Commander Peary." (Sept.) Peary.

Made a Weak Showing. Copenhagen, Sept. 7.—Today's great meeting of the Peary controversy might have been and was generally expected to be, in spite of Dr. Cook's own denial beforehand, a great occasion on which Dr. Cook would stand forward and give his friends, especially in Denmark, some real justification for the strategy and faith with which he had inspired them. It must be said at once that never since the news of his success reached the civilized world, never since he landed at Copenhagen, has the American explorer made so poor, so weak a showing. To the very last minutes of his address some listened eagerly and hopefully for some statement which might be an answer to his accusers. It never came.

There is no denying that since last night, when the news of Commander Peary's success reached here, closely followed by charges and innuendoes, which remain unanswered, except by monosyllabic contradictions, there can be felt some change in even loyal Copenhagen's mental attitude.

Wild Story From Cook. Doubtless he is. Last night Dr. Cook was the honored guest of the editor and the staff of the Politiken. Tonight that paper prints in spaced type a story which purports to be an interview with Dr. Cook in which he says he feared he might meet Commander Peary as the pole and was anxious to get back as soon as possible for if Commander Peary met him Commander Peary would certainly have shot him.

That there is not a word of truth in this need not be said; but the mere fact that it was printed an hour and a half before Dr. Cook addressed the meeting is certainly significant of a considerable change in the mental attitude here. Commander Peary's dispatch was widely quoted at the banquet after the address. Another dispatch reminding the people of the Mount McKinley matter was the subject of talk among the banqueters. Such things as these and many others, less tangible cannot be disregarded in attempting to describe the effect of Dr. Cook's address tonight.

London Chronicle Disbelieves Cook. London, Sept. 7.—The Chronicle's correspondent at Copenhagen flippantly accuses Dr. Cook of deceiving the whole world, saying: "This man Cook, that was produced a particle of proof that what he says is true. He declines to produce any proof and the statements upon which his story depends are denied by men of renown in Arctic exploration. The statements that he submitted a diary of his observations to the astronomical observatory at Copenhagen are untrue. It is said that Professor Torp and Stromgren examined Dr. Cook exhaustively, mathematically, technically and scientifically for two hours and were entirely satisfied, especially in points where observations are cast. The correspondent visited Professor Stromgren, and in the presence of witnesses asked these questions:

"Have you seen any of Dr. Cook's manuscripts?" "No," answered the professor.

"Have you seen any diary or journal of Dr. Cook's?" "No."

"Have you seen Dr. Cook's original observations?" "No."

"Did Dr. Cook state he had no original observations at Copenhagen?"

"Yes." Professor Stromgren then gave out a written statement as follows: "I state I have not seen any of the observations of Dr. Cook. My impression of the trustworthiness of Dr. Cook's claims rest on the conversation about his observations which was shown to me.

Knep Peary Reached Pole. London, Sept. 7.—The Copenhagen correspondent of the Daily Telegraph says that a letter was received there today from a Danish woman at Jakobshavn, Greenland, in which the writer says it was known there on August 14th that Commander Peary had reached the Pole.

Indian Harbor, via Cape Ray, Newfoundland, Sept. 7.—Despite his many hardships in the Arctic regions, Commander Robert E. Peary appears to be in the best of health and spirits. He is enthusiastic over his success in reaching the goal for which he has so long striven. When told that Dr. Cook's magnificent cable of Dr. Peary, those on board the steamer Roosevelt expressed surprise, but declined to make any statement other than that no traces of any previous expedition had been found.

Arctic Club Secretary Found. New York, Sept. 7.—Captain B. S. Osborne, secretary of the Arctic Club of America, today declared he had three affidavits from former members of the Peary crew that would make a scandal. Captain Osborne declined to make known the character of the affidavits. "I did not at first believe that Commander Peary had been to the Pole," continued Captain Osborne. "I have changed my mind on that subject and I now think that he has been to the Pole, but certainly cannot attempt to dim the lustre of the achievement of Dr. Cook, who is the real scientific of the expedition. Peary is coming home to fire the first gun in the battle, at a time before Dr. Cook can get here, but he poorly merits the title of discoverer of the Pole with his counter claim to being the first at the Pole. The statements that I have made from the three men who were with the Peary expedition on the last trip will be unpleasant reading for him.

To Arrive in New York September 21. New York, Sept. 7.—According to a message received today by cable from Dr. Frederick A. Cook, by William L. Cook, Brooklyn, the explorer will arrive in New York September 21, on board the Oscar II, of the Scandinavian Line.

St. Johns, Newfoundland, via North Sydney, N.S., Sept. 7.—Commander Peary was still at Indian Harbor, Labrador, at nine o'clock tonight, according to wire dispatches from that point relayed to St. John's through Cape Ray. It is not certain when he will sail thence with the Roosevelt.

Telegraphic Arrangements. Ottawa, Sept. 7.—As there is no telegraph operator at Chateau Bay, the point from which Commander Peary proposes to send his story of his discovery of the North Pole, instructions have been sent by the government to change the government telegraph stations under the Marine and Fisheries Department, to its present, Mr. Wm. Moore, at Red Bay, thirty miles west on the coast, to inform Commander Peary on his arrival.

A messenger has been sent from Chateau Bay to Red Bay, thirty miles west on the coast, to inform Commander Peary on his arrival. A messenger has been sent from Chateau Bay to Red Bay, thirty miles west on the coast, to inform Commander Peary on his arrival.

Reception Awaits Peary. New York, N.Y., Sept. 7.—Arrangements are being made to give Commander Peary the most extensive and welcome ever accorded a private citizen. Warships, yachts and sailing craft of all descriptions will participate. The initial steps were taken today by the Peary Arctic Club.

THE MARKETS. (Continued from Page One.) closed practically the same as those of last Saturday, with big packers as buyers. Local shorts covered on the early advance, because of higher prices for hogs. Outside packers sold November lard.

CHICAGO LIVE STOCK. Chicago, Ill., Sept. 7.—Choice hogs for the shipping outlet were abnormally scarce and sold 5 to 10c higher at top being made at 8.45, against 8.20 a week ago. Under the 80 line there was no improvement, the bulk of fresh receipts comprised common packing stuff. The bulk of the fresh cattle supply went into the western division, coming from Montana and the Dakotas. That trade was 25c lower than the close last week. As of Monday's purchases were on hand, the market was very slow. Sheep and good lambs were about steady. Otherwise the live mutton market was weak to lower.

Hogs—Strong receipts 9,000; 5c higher; quality fair. Mixed and butchers, 7.80 to 8.40; good heavy, 7.95 to 8.40; rough heavy, 7.50 to 7.80; light, 7.50 to 8.37; pigs, 7.25 to 8.10; bulk, 7.50 to 8.30.

Cattle—Steady; receipts 7,000; 10c lower. Beaves, 4.25 to 5.00; cows and heifers, 2.25 to 5.40; stockers and feeders, 3.00 to 5.00; calves, 5.50 to 7.75; Texans, 4.15 to 5.40; westerners, 4.25 to 6.50.

Sheep—Receipts 23,000; 10c lower. Sheep, 2.90 to 4.70; lambs, 4.25 to 7.65.

King Edward in Fine Health. Marienbad, Sept. 3.—King Edward, having completed the cure, started by train today for London. Dr. Ott pronounced His Majesty's health as perfect. He says he was astonished at the robust condition of the British monarch, declaring that his strength is equal to that of a sound man ten years his junior. King Edward has invited Dr. Ott to visit him at Sandringham in November.

Sunday School Lesson

(By Rev. Dr. Lincoln.) September 12th, 1909. Close of Paul's Third Missionary Journey.—Acts 21: 1-17.

Golden Text.—The will of the Lord done. Acts 21: 14. Verses 1-3.—Where was Paul bound for? Had Paul clearly received Divine instructions to go to Jerusalem or was he simply gratifying his own desires? (See Acts 20: 16, 22-33.)

It is a devoted man has a longing to go to a place, or to do a thing, is it safe for him to conclude that the longing is of God? Because there is danger involved in a journey, or an enterprise, in connection with our religion, should we allow our chivalry alone to be the incentive for us to undertake it?

Is there any ground for the opinion that good men have sometimes rushed unnecessarily into danger? Verse 4. If Christians have to tarry in a town should they hunt up the followers of Jesus? If these disciples were told "through the Spirit" that Paul should not go up to Jerusalem why did he not heed them?

If there is no record that Paul had a direct call from God to go up to Jerusalem; would that, taken in connection with the fact that every one of the morning Regina Leader of August 31, and September 1 and 2, with respect to the drawing up of a transfer in the city clerk's office and leaving therefrom the clause reserving certain spur track rights to the city and to further enquire into all matters connected with the handling of the city's warehouse sites property since the year 1907. The resolutions passed unanimously and steps will at once be taken to arrange for the enquiry in question. City Clerk Hunter handed in his resignation to Mayor Williams, which will be formally dealt with at the next regular meeting of the city council.

Should a company of Christians, when bidding good bye to one another on the wharf, or at the railway station, feel as free to get down on their knees and pray, as they are to stand and shake hands? Why is it that Christians are not as willing to be seen talking to God by praying, on the street, as they are to be seen talking to their fellow men? Verse 8.—Who was Philip, and why is his name mentioned in this gospel story? Should Christian parents train their children from infancy to know God, to be skilful in prayer, in faith, and in good works?

Is there not a way for parents to train their children, so that the promise can be realized with absolute certainty in Joel 2:28 "Your sons and your daughters shall prophesy, and in that day every one shall be able to see and hear, and shall be made of the Spirit of the Lord." Which is the more desirable, to have a son or a daughter, noted for spirituality and soul saving, or for money making? Verse 11-12.—Did this noted prophet Agabus (See Acts 11: 27-28) join with the rest of the saints in saying, that the Holy Spirit told them, that Paul ought not to go to Jerusalem? Is there any way to consistently suppose that both parties to this controversy were right? Suppose Agabus and the others were right in persuading Paul not to go to Jerusalem, but that Paul still thought he ought to go, what would be Paul's duty in the circumstances? If a good man says he has a message from God for us, are we under obligation to obey whether our judgment may concur or not?

Verses 13-17.—Can you recall in all history a greater example of fortitude and an every than here displayed by Paul? Lesson for Sunday, Sept. 19th, 1909 Review.

REGINA'S CIVIC SCANDAL.

Implicated Aldermen Were For Investigation Before Supreme Court Judge. Regina, Sept. 2.—Another step in the track site transfer sensation which has been burning at the top of public interest for the past three days, in which two city aldermen, J. R. Peverett and Thomas Wilkinson, and the city clerk, J. Kelso Hunter, are implicated, was taken tonight when at a meeting of the city council specially convened by Mayor Williams for that purpose, alderman Peverett moved, seconded by alderman Wilkinson that an investigation be instituted, a judge of the supreme court being appointed for the purpose to enquire into the charges contained in the morning Regina Leader of August 31, and September 1 and 2, with respect to the drawing up of a transfer in the city clerk's office and leaving therefrom the clause reserving certain spur track rights to the city and to further enquire into all matters connected with the handling of the city's warehouse sites property since the year 1907. The resolutions passed unanimously and steps will at once be taken to arrange for the enquiry in question. City Clerk Hunter handed in his resignation to Mayor Williams, which will be formally dealt with at the next regular meeting of the city council.

Meanwhile his work has taken charge of the city clerk's key to the various offices and vaults hitherto under his charge. This step followed inevitably upon the question raised by Alderman Darke during the meeting as to the property of the city clerk continuing in his position with the custody of all the documents relating to the charges since he himself was one of those whose conduct was to be the subject of the investigation.

Spanish Reinforcements to Front.

Madrid, Sept. 6.—Official confirmation has been given to the report that the Government has ordered the dispatch of the Twelfth Division of Melilla under the command of General Alvarez de Sotomayor to aid in crushing the insurgent Moors of the Rif district.

The Poor Fellow.

Berlin, Sept. 6.—The Crown prince has been stung on the cheek by a wasp. The clerk is greatly swollen, and painful. A physician is attending the prince. He will not be able to attend the army manoeuvres beginning tomorrow in Wurtemberg.

CLOUDBURSTS BRING DEATH TO THOUSANDS

Flood Causes Scarcity of Corn, Which May Result in Famine—Water, Wind and Hail Cause Great Damage and Loss of Life in Central America. Mexico City, Sept. 4.—A dispatch received here from Morelia, the capital of the State of Michoacan, says that floods have ruined a large section of the Samora district. A terrible cloudburst in the La Mondaja and La Geata mountains caused the rivers and streams to overflow and miles of fertile valley are under water. A branch of the Central Railroad has been washed out for a distance of 18 miles and the villages of Apacuaro, Santiaquillo and Cerillo are under water.

Famine May Result. The scarcity of corn resulting from the flood may lead to a famine. The affected district is some hundreds of miles south of Monterey and 200 miles west of Mexico City. Farther details have been received here of the flood that swept the town of Tula, in the State of Tamaulip, last Saturday. A wave between forty-five and fifty feet high rushed down the river and engulfed the lower half of the town. Two hundred houses and the San Juan bridge were carried completely away. Many lives were lost. The storm raged with great severity for three days around Tula. The wind destroyed houses and huts rendering hundreds homeless and blew down trees without number. Terrible are the conditions at Monterey, the correspondents declare they are just as bad at Tula and vicinity.

Water, Wind and Hail. The destructive wave as it swept boiling down the valley, was accompanied by a cyclonic wind and a hail storm that destroyed the crops in every direction. The entire northern section of the state is said to have been laid waste. It will be six or eight months before the highways can be restored. Thirty bodies have already been recovered and many bodies of shepherds and mountaineers are being washed down into the valley below.

General Moir Takes Relief Work. Simultaneous with the arrival of Monterey on Wednesday night from Galena of General Bernardino Reyes came the Federal announcement that General Moir, under secretary of war, would proceed to Monterey on a special car to take charge of the relief work made necessary there by the recent floods. This is considered a high honor and is more likely, he says, to be in engines than cars.

Newfoundland's Premier Back. St. John's N.F., Sept. 3.—Premier Morris arrived here this afternoon from England.

ONTARIO TABOOS TOWNSITES.

Will Not Sell Any Land for Speculation Along G.T.P. Winnipeg, Sept. 3.—It was learned this morning from three Winnipeg sources that the Ontario government will not sell any land along the transcontinental railway through that province for townsite purposes. Instead, the province will arrange for the survey of new towns and the proceeds from the sale of the property will go into the public treasury. The line traverses Ontario through a rich mining and timber district, and as there is water power available everywhere, it is safe to say that upon the completion of the road many towns will spring up. The only land owned by the Transcontinental railway is the right of way, 100 feet in width, through the province.

Local syndicates and capitalists have approached the Ontario government time and time again with regard to the purchase of land along this line, but all without avail. The government time and time again with regard to the purchase of land along this line, but all without avail. The government time and time again with regard to the purchase of land along this line, but all without avail.

Simple Injuries with Serious Results. Morris Quatman, an eleven year old Windsor boy, has just died as a result of a scratch on his wrist. Pussan entered the wound, which was caused by falling off his bicycle, and despite the physicians, the boy died. Such incidents are not infrequently met with, but they ought to make people realize the danger that may lie even in the smallest flesh wound.

Take a simple illustration. When a dirty knife, a rusty needle, a splinter of dirty wood, a barbed wire fence, or a thorn scratches the hand, the latter is usually washed with soap, which the air about me is full. Directly these germs are introduced through the breach in the skin, a battle rages between them and certain organisms in our blood.

When the invading germs are too strong for Nature's defenses, in a few hours the finger will become hot and swollen. A little later the wound may exhibit a whitish appearance in the middle of the swelling, and we have what is known as a festering or poisoned wound.

The way to avoid such serious results is to cleanse the wound and apply Zamb-Buk. Zamb-Buk is a powerful antiseptic, soothing, and healing qualities are not to be found together in any other preparation. It is not only a unique healing balm, but it is also a skin food. For all skin diseases and injuries—cuts, bruises, burns, eczema, chafing, ulcers, rashes, etc., it is without equal. It is also used widely for piles, hemorrhoids, etc. Zamb-Buk is sold in 10c and 25c packages.

Zamb-Buk must not be confused with ordinary ointments. Zamb-Buk is a unique preparation, possessing antiseptic, soothing, and healing qualities are not to be found together in any other preparation. It is not only a unique healing balm, but it is also a skin food. For all skin diseases and injuries—cuts, bruises, burns, eczema, chafing, ulcers, rashes, etc., it is without equal. It is also used widely for piles, hemorrhoids, etc. Zamb-Buk is sold in 10c and 25c packages.

Enthusiastic Over Western Crop. Ottawa, Sept. 3.—M. J. Butler, deputy minister of railways and canals, who has returned from a three weeks' trip of inspection to the Pacific coast, is enthusiastic about the prospects for a big grain crop. From what Mr. Butler could gather he believed the railways are in good shape to handle this year's big crop. Should there be any shortage of railway equipment it is more likely, he says, to be in engines than cars.

Newfoundland's Premier Back. St. John's N.F., Sept. 3.—Premier Morris arrived here this afternoon from England.

EARLY THRESHING THIS YEAR.

Present Perfect Weather Lends to Rapid Harvest. Winnipeg, Sept. 3.—With the present period of perfect weather, the farmers have been making remarkable progress in threshing operations and reports from all districts are that the work will be finished much earlier than expected. If the weather conditions continue favorable this season harvesting and threshing will be one of the shortest on record, and the eastern harvesters will be able to return home much earlier than in other years.

Local telegraph companies report that the grain rush began nearly two weeks earlier than last year, having now been in swing a week, whereas last year it did not start till September 9th.

DEATH IN SCRATCH

Simple Injuries with Serious Results. Morris Quatman, an eleven year old Windsor boy, has just died as a result of a scratch on his wrist. Pussan entered the wound, which was caused by falling off his bicycle, and despite the physicians, the boy died. Such incidents are not infrequently met with, but they ought to make people realize the danger that may lie even in the smallest flesh wound.
