habitable and fertile more than 1. Schenectady, N.Y. The machine yield an annual crop value of be- ph ween \$50,000,000 and \$75,000,000.

It has supplied home sites for more than half a million people. Only Maine, of all the New England states, than those contained on these once arid lands. Flourishing communities American town have snrung up in the sections that irrigation has reclaimed. More than 80 per cent of the settlers are native-born Americans; hardy, venturesome souls of the type that crossed the plains in the days of '49 and won the West to civil-

It is interesting that all of this work has been acomplished at no expense to the American taxpayer. The initlands and contributions from the States benefited have supported the service through the years.

A MECHANICAL KIDNEY.

Removing every drop of blood from human body, cleansing it of impurities and then returning it to the circulation may seem like an impossibility, yet that is exactly what German scientists purpose to do, utilizing the 'artificial kidney," an amazing device invented by Dr. John J. Abel, profes-

sor at Johns Hopkins University. The "artificial kidney" was develop-London Thates: The limiting factor ad by Doctor Abel to be used in treatin the output of houses has hitherto ing victims of bichloride-of-mercury seen the lack of skilled building oper- poisoning, scarlet fever, acute nephatives. The most disastrous result of ritis, and similar toxic states. Its politics has been that labor has left kidneys. Doctor Abel has used it sucthe industry; new labor has hesitated cessfully on animals, but if the Gerworkmen has declined ever since the ced intentions, their experiments will

> tery, and another connection is made to a vein. Thus the blood passes through, and the impurities are strain-"celliodin," which, however, does not remove the vital corpusoles and proteins. An extract called "hirudin," obtained from Hungarian leaches, Famous Recipes for prevents the blead from clotting as it passes through.

Doctor Abel was prevented from continuing his early experiments with the apparatus when the war made is impossible to obtain hirudin. If the artificial kidney is successfully used on human patients, it is likely to prove one of the most sucessful weapons ever given to medical science

for treatment of disease. BAYS FROM THE ANIMALS?

CONCORD POUND CAKE.

(This New England town, famed for its authors, sent us this recipe).

1 seant Supful Crisco. 1½ cupfuls flour.

1/2 teaspoonful baking powder. 14 teaspoonful salt.

5 eggs beaten light.

11/2 cupfuls sugar.

1/2 teaspoonful ground mace. 1 teaspoonful vanilla.

1 tablespoonful milk. Cream well together Crisco, flour haking powder and salt. Beat eggs light, add sugar and beat until very light. Add ground mace and vanilla, beating well, and add tablespoonful milk and beat well. Bake in a slow oven at a temperature of 325 degrees,

of chees and goshes. He makes long dead insect and a dead leaf were used row tubes of crepe, richly embroidered resulted in no ray impressions on the | Tunics are generally long, and slenplates. Monsieur Nodon offered as der, although they may flare slightly.

## Important Notice

in connection with our **Box Front Competition** 

—All Cigarette Box Fronts must be carefully torn or cut off from every package.

—All Box Fronts have the same value and must be put up in bundles of 100 plainly marked with the competitor's name and address.

-No entry will be eligible for a Prize which is not sent in over the real Christian name and surname of the Competitor.

—We will not be responsible for Box Fronts received in broken parcels or without proper name and address.

We reserve full right to reject an entry or entries, which do not comply with the above conditions.

### Closing Date

Tuesday, September 30th, 6 p.m.

Box Fronts received after the above date and time WILL NOT be given consideration under any circumstances.
