who derive pecuniary benefit from the
appreciation of gold. How long must International hotel, which adjoins the theatre, and which was full of summer guests, caught fire several times, but by almost superhuman efforts the structure was saved. The Clifton, Ontario, fire brigade did most effective service at the

Apples are so plentiful a crop in Huron and other western counties of Ontario that it is feared there will not be enough men available to handle them at the opportune moment. It is estimated that there will be 500,000 barrels in Huron county alone, with similar large yields in adjoining counties. The price will be about 50c. per barrel.

The cheese factory at Vernon River Bridge, Ontario, is doing a rushing business. During the two months of June and July 699,188 pounds a milk were re-ceived at the dairy station, and 955 pounds of cheese manufactured.

A revolt is said to have broken out in the ranks of Ontario Liberals over the action of the party bosses. No less than thirteen protests against the return of Conservative members are alleged to have been sent to Toronto to be filed with the proper officer, along with the deposits. Singular to say these protests vanished from view al together, and inquiries concerning the fate of the all-important documents meet with no response. The men who forwarded them are highly indignant. James Sutherland, the Liberal whip, is blamed for the suppression of the protests, and all sorts of harsh epithets are being applied to him by the faithful, one of the mildest being that of Addington, North Victoria. Brockville and Muskoka are constituencies whence a howl of indignation is going up against the men who have sold the party, for that is the way in which the complainants speak of the matter. Threats of making it hot for Mr. Sutherland are heard on every side. It does not seem to be known that Postmaster-General Mulock camped for a time at Osgoode hall, and personally directed the Liberal operations in regard to the

The Nights in New York Almost as Insufferably Hot as the Days.

Men, Women and Children Dropping Dead on the Streets-

The Death Roll.

New York, Aug. 13 .- During the past six nights the thermometer has fallen but a few degrees from the limits registered during the hottest part of the day. The heat on Monday night held almost stationary at 81 degrees until 4 o'clock Tuesday morning. As soon as the sun began to ascend the thermometer did likewise, until all previous records for August 11 were broken. The highest previous record for August 11 was 93 degrees in 1893, and 92 humidity, which was far worse than the boiling sun, stood at 70, and down on the streets it was not less than 5 degrees warmer. A thermometer hung in the portico of the city hall in this city, within reach of the heat radiated from the asphalt walk, but still in the shade indicated 112 above zero.

The heated term in New York and vicinity has not come to a close, but its violence has subsided appreciably. At 10:30 this morning the thermometer in the weather observer's tower indicated 82 degrees against 85 degrees for the same

hour yesterday.

The department of public works has carts are patrolling the streets of these sections and flooding them with water from the corner hydrants. Young and old rush in groups under the streams from the hose, and the night scenes among the tenements as the relief par-

and horses died as though stricken by a their tools and find shelter during the hours when the sun was the hottest.

night and day, until many of them have succumbed to the strain.

Records at the headquarters of police ment since its institution, and his services have been greatly appreciated by Professor Robertson, who is sorry to lose him, though Mr. Ruddick's new position is, of course, a more desirable one than he has hitherto held and the loss hit
