

Dread of Asthma makes countless thousands miserable. Night after night the attacks return and even when brief respite is given the mind is still in torment from continual anticipation. Dr. J. D. Kellogg's Asthma Remedy changes all this. Relief comes, and at once, while future attacks are warded off, leaving the afflicted one in a state of peace and happiness he once believed he could never enjoy. Inexpensive and sold almost everywhere.

SUCCEEDS WHERE DOCTORS FAIL

Lydia E. Pinkham's Vegetable Compound Often Does That.—Read Mrs. Miner's Testimony

Churubusco, N. Y.—"I was under the doctor's care for over five years for backache and had no relief from his medicine. One day a neighbor told me about your Vegetable Compound and I took it. It helped me so much that I wish to advise all women to try Lydia E. Pinkham's Vegetable Compound for female troubles and backache. It is a great help in carrying a child, as I have noticed a difference when I didn't take it. I thank you for this medicine and if I ever come to this point again I do not want to be without the Vegetable Compound. I give you permission to publish this letter so that all women can take my advice."—Mrs. FRED MINER, Box 102, Churubusco, N. Y.

It's the same story over again. Women suffer from ailments for years. They try doctors and different medicines, but feel no better. Finally they take Lydia E. Pinkham's Vegetable Compound and you can see its value in the case of Mrs. Miner. That's the truth of the matter. If you are suffering from any of the troubles women have, you ought to try this medicine. It can be taken in safety by young or old, as it contains no harmful drugs.

Muscular Rheumatism Subdued.
When one is a sufferer from muscular rheumatism he cannot do better than to have the region rubbed with Dr. Thomas' Electric Oil. Let the rubbing be brisk and continue until ease is secured. There is more virtue in a bottle of it than can be fully estimated.

SPRAYING NOTES

With the prospect of the new Fruit Marks Act regulations coming into effect this season the question of finish and quality of fruit is one which should more than ever attract the attention of growers. The new regulations which are much more specific in their statement of what constitutes blemishes for the higher grades than the act now in force, make it extremely desirable that the sprays to be used should be carefully selected.

The wholesale use of Bordeaux mixture, accompanied as it generally is by lack of finish and often by an actual russetting of the fruit, should be practised with extreme caution. Russetting may now be responsible for as high a percentage of loss in the highest grade (extra fancy) as a moderate infestation of scab. Whereas Bordeaux is responsible for much russetting of the fruit, it is likewise admitted that lime sulphur is capable of actually improving the finish of the product and is in addition an efficient fungicide.

As the russetting is naturally caused by these sprays given after the bloom has fallen, the use of Bordeaux previous to that stage may be advocated where deemed advisable. Undoubtedly the old 4-4-40 Bordeaux is the greater sinner in respect to russetting injury than the newer recommendations of 3-10-40, 4-8-40, etc., and the later formulae should be used in preference to the older one. Taking into consideration control of scab, finish of fruit and quality; in short, the pack, out, the following recommendations for orchard use would seem to be the most commendable:

1st spray—either Bordeaux or lime sulphur.
2nd spray—either Bordeaux or lime sulphur.
3rd spray—lime sulphur.
4th spray—lime sulphur.

The absolute necessity of applying three or more sprays should be understood. Trees not sprayed, or poorly sprayed, will not only produce poor quality of fruit and less of it, but, on account of foliage injury brought on by fungus diseases as well as insect pests, are in no condition to form a crop of fruit buds for the succeeding year.

In order to determine possible reduction of crop by the use of spray mixtures and actual count of some thousands of bloom was made last season at the Central Experimental Farm and the following results noted:

Where lime sulphur, specific gravity .007, was used 17.4% of the blooms set fruit. Where Bordeaux 3-10-40 formula was used, 17.7% of the blooms set fruit. There was practically no difference in the set of the two plots to the spray used.

These results do not indicate a loss due to the use of lime sulphur as a spray for orchard use in the Province of Ontario.

Calcium Arsenate for Potatoes
With the advent of calcium arsenate as an insecticide it should, on account of its cheapness and insecticidal properties, displace the use of Paris green on potatoes, which is always liable to be attended by foliage injury. For the control of fungus diseases of potatoes Bordeaux mixture of the 4-4-40 formula is to be highly commended. Lime sulphur should be avoided. As an insecticide, to be combined with the Bordeaux, use one to one and one-half pounds dry arsenate of lime to every forty gallons of the spray mixture. This combination has proved on the Experimental Farms to be a thoroughly efficient control for blight and potato.

AID POSTAL SERVICE

The United States has had a regular aerial postal service for four years, and it is now an established part of the system. Within the last three months 10,000,000 letters have been carried by air mail with an almost total absence of accident. In 1920 the cost per mile of the service was \$8; in 1921 it had dropped to \$6 a mile. The New York Evening Post says that the development of motors which will use heavy oils as fuel instead of the most expensive grades of gasoline promises to reduce the cost of commercial flying, as well as lessen the risk of conflagration where volatile "gas" and electric sparks travel together.

Europe has a number of regular passenger air services, and the other day two aeroplanes on the Paris-London route collided. The most notable achievement on this side of the Atlantic this year was the flight of Vincent Astor's air yacht from Palm Beach, Florida, to New York, a distance of 1,210 miles, in 9 hours 56 minutes flying time, a speed of 120 to 130 miles an hour having been maintained. The yacht left Palm Beach at 5.48 a.m. on Monday last and alighted in the Hudson River at 5.04 p.m., only one stop having been made. It flew generally at an altitude of 1,800 feet, but passed through three storms, and at times was only 20 feet above the water. In this country Quebec has been foremost in

The Only Asphalt Shingle That Is Tapered

Winthrop Tapered Shingles are the *only* tapered asphalt shingles manufactured. They have three outstanding features that make them a perfect roofing:

- 1—They are the big butt shingles—the only asphalt shingles that give a shadow line, which so improves the appearance of a roof—something architects have long wanted in Asphalt Shingles.
- 2—They are scientifically constructed. They are tapered. Being thicker at one end than the other, the butt of the shingle overlapping lies flat on the upper part of the shingle in the row below. No rain or snow can accumulate underneath—wind cannot get under them and blow them off.
- 3—Being tapered extra thickness and weight are distributed where extra thickness and weight are needed—in the part exposed to the weather.

We have obtained a special license to manufacture these shingles under the brand

Brantford
Winthrop Tapered
Asphalt Slates

Quality of materials and production methods are of the usual high Brantford Roofing standard.

Brantford Winthrop Tapered Asphalt Slates are made from carefully selected felt saturated and coated with a special blend of asphalt. Real quarried, crushed slate, in its natural colors (red or green or blue black) is embedded into and encrusted on them while the asphalt is hot. They are unaffected by climate. The colors are permanent, and never need staining. They are highly fire-resistant and they are tapered.

Distributed under Brantford Roofing trade marks, through Brantford Roofing Dealers. Stock carried, information furnished, service rendered by our dealer in your district.

Write for our valuable history of roofing "Shelter." On every page is a photograph of a different kind of a roof, in a different part of the world. It will be mailed free to responsible parties.

making commercial use of the aeroplane, which has been found highly valuable for forest patrol. The organization which has been effected throughout the country by the Canadian Air Board has laid the basis for commercial development on any scale. It seems a certainty that regular air postal services, which have passed the experimental stages across the line, will become in the near future permanent features of the Canadian postal system.

Wedding Announcements and Invitations of the finest quality at The Guide-Advocate.

One of the most effective vermifuges on the market is Miller's Worm Powders. They will not only clear the stomach and bowels of worms, but will prove a very serviceable medicine for children in regulating the infantile system and maintaining it in a healthy condition. There is nothing in their composition that will injure the most delicate stomach when directions are followed, and they can be given to children in the full assurance that they will utterly destroy all worms.

Farmers, Attention!

DELCO-LIGHT Reduced to \$495
"Electricity for every Farm"

I wish to call your attention to the fact that Delco-Light is reduced to below pre-war prices.

Every progressive farmer today is interested in electric light and power for the farm, especially for the benefits which the women on the farm derive from its use, in regards to washing, churning, ironing, separating and pumping, not to mention the convenience and safety of the lights.

An exploding lantern in your barn would set you back the price of quite a few Delco-Light plants.

Therefore with Delco-Light and wiring reduced to its present basis electricity is within reach of every farmer.

Don't Wait Until Fall. Get it NOW and have its benefits.

If interested give me a call and let me tell you all about it. It cost nothing to find out.
