

Miscellaneous.

The total estimated net cost of the British navy for the current year is round numbers \$54,000,000.

A tidal or earthquake wave has occurred in Lake Huron, causing considerable consternation, but no damage. It flowed from west to east.

Two San Francisco physicians disagreed in consultation, and each cured the other. The patient laughed, perspiration was induced, and he recovered.

The sewing machine companies have reduced prices 50 per cent. in consequence of the expiration of the last of the patents held by the large manufacturers.

Private advices to New York from Constantinople, say that the steamer *J. Brown* arrived there Thursday with \$1,000,000 worth of munitions of war from New Haven, Conn.

Over 9,000 horses, and 35 mules were taken in France last year. The French war steamer was established in 1865, and the consumption has since increased yearly. A healthy carcass is worth \$40.

The carpenter and blacksmith shops of Messrs. C. A. Clinch & Sons at Musquash were destroyed by fire, on the 20th inst., and to relate George Burton, aged 23, third son of C. F. Clinch, lost his life in the flames.

A Bucharest telegram reports a terrible accident on a Roumanian railway. A train containing Russians collided with a freight train, killing and wounding many. Among the killed was a prominent Russian general.

A bonded warehouse in Dublin, containing 200,000 gallons of whiskey, was burned on the 16th inst. By explosions during the fire several buildings in the neighborhood were damaged.

A safety envelope to prevent tampering has been devised. On the flap the words "attempt to open" are printed with a double set of chemicals, the first impression containing nitroglycerine, and the second green ink. If the flap be tampered or moistened in any way the magic printing will appear.

John B. Gorton, there is likely to be a big rush of visitors from the county on the occasion of Gorton's lectures, which takes place in the Rink on the 26th, 28th, 29th, Saturday, Monday, and Tuesday. The W. & A. line have made a concession in the way of low fares for intending visitors.

HYMENAL.—A worthy couple were married this morning in St. Mary's Cathedral. The blushing bride was a lady of seventy, and was wed to the altar of Hymenal for the fifth time to-day. The bridegroom—a bachelor—was sixty-two years of age. Both people are residents of Halifax.—Reporter 14th inst.

Great consternation exists among the farmers of Long Island, N. Y., in consequence of the reappearance of the potato bug, which the recent warm weather has brought out in immense numbers in the vicinity of Farmingdale, along the Long Shore Railway. Many farmers have their land under potatoes, and if the crop is destroyed, will be reduced to penury.

Thomas Belton, clerk for Claffin & Co. of New York, has been arrested. He had been stealing from his employer's dairy for six years, and had over \$10,000 deposited in different savings banks. When arrested thirty-five packages of thread and eighty-five thousand needles were found fastened about his legs and body.

Advices from the vicinity of Green Bay, Wisconsin, reports fires in the woods north of the city, which are fully along the line of the North Western Railway, from Marinette to Ishpeming, Mich., a distance of 129 miles. It is now almost a continuous blaze of fire, extending back at some places in the forest to a distance of from twelve to fifteen miles.

SINGULAR DROWNING ACCIDENT.—On Saturday evening last, at St. John, a young named Lawrence, whose father does business on King Street, was found drowned in the bath room at the rooms of the Y. M. C. Association, to which he belonged. He was subject to fits, and was alone when he entered the bath room.—Herald.

THE LATE STORM IN KING'S CO.—The Kentville "Chronicle" says six head of cattle perished on the North Mountain on Thursday night last during the storm. Several other cattle were frozen to death. The depth of snow on the North Mountain on Thursday was 14 inches on the level. A bank on the East Hills Harbor road was 33 inches deep.

FIRE AT BEAR RIVER.—On Thursday afternoon last, a carpenter shop, filled with the most inflammable material, belonging to Messrs. John Turnbull, caught fire on the roof, and burned to the ground, despite the utmost exertions of those present. There was an insurance on the building of \$800. A barn belonging to Mr. Turnbull also caught fire, but was saved. Other buildings in the neighborhood had narrow escapes.

FISH BREEDING IN NOVA SCOTIA.—Mr. A. B. Wilnot on Saturday transported 80,000 young salmon from the breeding establishment at Bedford, N. S., by the railway, to be placed in East, West and Middle Rivers, in Pictou County, N. S. Mr. Wilnot has invented a very ingenious contrivance for carrying the young fish on the train, whereby a plentiful supply of fresh water is constantly supplied to them.

A REMARKABLE ESCAPE.—A despatch to the "Chronicle" says two of the crew of the *Goose* were out of the forecastle on Sunday the 13th inst., by an American schooner's crew and landed at Barrington on Monday—a remarkable escape—as the men had been imprisoned in the forecastle since the vessel captured on Wednesday night. Four others were rescued and landed at Barrington on Saturday. It would seem, therefore, that seven men were drowned.

A despatch has been received at Boston announcing the total wreck of the ships "Uncle Toby" and "Geneva," and the barque "Shamrock" on the coast of Peru. The vessels belonged to New England ports.

Five European steamships sailed from New York on the 19th inst., with full cargoes. The shipment of grain aggregate 168,000 bushels, and of cheese 25,000 boxes. A large quantity of fresh beef was also shipped. There was not sufficient freight room for all offering.

A PAIR OF DARING VOYAGERS.—Thor Crapo of New Bedford, with his wife, will start from that port on Friday next, the 25th inst., to cross the Atlantic to London in a boat thirteen feet in length of the keel. It has been constructed expressly for the trip, which Crapo expects to accomplish in forty days. He is a seaman, and has been a mate in the merchant service. If the couple make a successful voyage of it, Capt. Johnsen will still bear off the palm of having made the trip alone. Crapo's boat is three feet shorter on the keel than Johnson's—Cape Cod Advertiser.

Cape Breton papers report the demise of four men, whose combined ages make up the 375 years. They all belonged to the parish of Columbia, Grand Narrows, and their four deaths have occurred since March 17th. The eldest, Peter Desveaux, was 102 years of age. On the 20th inst. he died, and his wife, the eldest of whom, by his second marriage, is not more than 11 years of age. After raising a large family of sons and daughters at Little Bras d'Or, where his first wife died, he removed to River Dennis, and there, in his 94th year, married a second wife, who was not more than 80 years of age.

THE CENTENNIAL MEDAL FOR PARKS' COTTON YARN.—The Medal for Cotton Yarn, awarded by the British Judges to Messrs. Wm. Parks & Son, at the Centennial Exhibition, is one of which the recipients have good reason to feel proud, as the goods were sent to them, and for which the medal was awarded, was not specially prepared for the purpose of exhibiting them. Messrs. Parks were induced at the last moment to do so in order to help the display made by New Brunswick. Consequently the goods they sent were taken from the stock which they were supplying daily to their customers, and it is very satisfactory to them to find that these goods were considered to be the best of their kind sent from Canada.

In the Turkish village of Tourkial there is quite a Christian element, though subordinate in number to the Muslims. On the night of the 16th the latter made a concerted general attack upon the Christians. Scenes of frightful atrocity were presented. Many were put indiscriminately to the sword. Many of the elder women shared the same fate, and the younger ones were brutally outraged. The cries of the victims were distinctly heard by the outposts of the Roumanian army. It is further corroborated by the reports of two Bulgarians who managed to escape by crossing the Danube. Their accounts of the outrage and murder of old and young, and the cruel deaths inflicted, is horrible beyond measure.

TERRIBLE FAMINE IN CHINA.

A terrible famine is raging in the Chihli and Shantung districts of China. In a village visited by Europeans the inhabitants were putting an end to their sufferings by suicide, and in one family the father and mother had buried their children alive, that they might not witness their agonies. The people have devoured the grass and the foliage of the trees, and the efforts of the Government and the priests have been insufficient to meet the needs of the famishing multitudes. China is so densely populated, and the facilities for internal traffic so inadequate, that a failure of crops in any large section of the empire is sure to cause awful distress.

WOODSTOCK, N. B., BURNED—ANOTHER TREMENDOUS FIRE.

WOODSTOCK, N. B., May 17.—A fire broke out about two o'clock this morning and spread with such rapidity that in less than two hours the largest part of the business portion of the town was in ruins. The area in which the conflagration swept is about the same as the fire of 1860, but the amount of property destroyed largely exceeds that of the latter. At least sixty buildings, exclusive of outbuildings, are burned. These include the large brick Commercial block and Connell wooden blocks having nine stores in them, Allan's brick buildings, McCoy brick building, D. P. Brown's brick building, the American, formerly the large hotel, Donaldson's Exchange, Dr. C. F. Connell's house. Every dry goods store in town is destroyed with two lively stables, Connell's of Col. Baird, Dr. Smith, Dibble, H. R. Baird, Lindner and Dibble's hardware stores, Bridges Brothers' and Jewett's jewelry store, and many of the other places of business—groceries, provision dealers, liquors, clothing, and boot and shoe stores. The fire extended from the Neduxnekiak bridge, which was saved with difficulty, north to the engine house, or three entire blocks on each side of Main Street; West from Main Street one block each side of the Connell Street, and East from Main Street one block, or six blocks according to the street boundaries, in all. But a small portion of the contents of any of the stores was saved; many goods were burned after removal to the streets.

It is impossible yet to estimate the probable aggregate loss. It is only known that the fire commenced in a harness maker's shop on the corner of Queen and Main Streets, how can only be conjectured.

An accident to the suction hose prevented early efforts to pump a stream from the engine, which aggravated the calamity.—Special Despatch to Halifax Recorder.

Telegraphic News.

Special Dispatches to the Morning Chronicle.

EUROPE.

LONDON, May 17.—Commanders of Turkish fortresses along the Danube have published manifestos urging the inhabitants to withdraw further inland to Bohemia. Enormous masses of Turkish cavalry are said to be visible opposite Galatz, and are crossing the Danube. General Sko Hebert's division of Circassian Cossacks, intended to head the advance of the Russian invasion, is passing through Bucharest to-day, en route for the Danube. The crossing of the river is believed not to be immediately imminent. It seems as though the Russians have quietly and dextrously placed Roumanian troops where they could be headed with their own.

The news that the Russians have some floating batteries on the Danube is confirmed. They are described as small but ingeniously made, consisting of three pontoons joined together. Each battery carries one gun. The pontoons were floated down the Pruth and joined by the marined detachment. Besides the Russians have some large steamers, which have been armed.

Turkish gunboats are still refuged at Matchin, whence they do not attempt to come down the Danube.

A Constantinople dispatch says that the capture of Sookmook Kale and the rising of the Circassians, who massacred the garrison and burned the town is officially announced.

A despatch asserts that Persia has declared her intention not to join Russia. Extensive military preparations are being made in Constantinople.

Reports have been received of the massacre of returned Raynaks at Curdun, on a more fearful scale than any that has yet happened in the people's dispatch says that the capture of Sookmook Kale and the rising of the Circassians, who massacred the garrison and burned the town is officially announced.

An iron clad has left Sookmook Kale for Batoun to obtain arms for the Circassians.

LONDON, May 17.—The "Times" despatch from Gurgur is as follows:—A great battle is impending. Already heavy cannonading is in progress. For several days the Russians have been concentrating a large force at this point, preparatory to the crossing of the Danube. The army is in fine condition and good spirits. Opposite to us is Rutchuk. The Turks are in strong force. That they resist our advance is certain, and to-morrow or the day after may witness a bloody struggle. Infantry are present in great numbers and are on the march, while great activity prevails in all departments of the army.

Turkish monitors are hurrying towards this spot, and more advanced ones taking up positions in front of, or near to a point where the Russians hope to lay their pontoon bridges. To-night the scene on the Danube is magnificent—shells bursting in the air, and distant camp fires lend enchantment to the scene, and signal rockets ascend and fall as the night wears away. The cannonade grows heavier and heavier and it will not take long to destroy Rutchuk, which place is the weakest in the Turkish line of fortresses. Further down the river the sky is reddened by flames of burning Turkish. The town was fired by Russian guns in Oltenitz. It will be comparatively easy for the Russians to cross at that point. News has just reached us that Matchin, some five miles distant from that point, has been set on fire by Russian artillery.

LONDON, May 20.—The "Times" Berlin despatch says the Turks will confine their preparations to the strengthening of Danubian fortresses; these are being made more or less formidable, but strengthening their garrisons detracts from the number of field forces. With all reinforcements recently brought up the Turks, it is believed, have no more than 200,000 combatants north of the Balkans to resist 250,000 Russians.

LONDON, May 21.—The "News" Budapest despatch says every day makes it more obvious that the Russians are in a hurry to cross the Danube. Present indications tend to the impression that no crossings further west than Thurova are intended to be attempted before June, and probably not before the Czar reaches the army headquarters, about the 15th proximo. The Czar's coming to join the army is unquestioned. He will be accompanied by the Grand Duke Prince Gortschakoff, and a great part of the diplomatic chancellors.

The Russians occupied Kraj on Friday night, and Oltenitz on Saturday. They will occupy Turn-Severin and Kalafat on the 25th.

The Russians are bombarding Nikopolis. The evacuation of Skupetchna is ordered.

LONDON, May 21.—The rice crop of China is reported a failure. The report that the Russians are in flames from the effects of the Russian fire is unconfirmed.

A correspondent of the "Telegraph" says:—From Kars, where intelligence that yesterday the Russians attacked the outer lines with furious determination, having preceded their attempt by heavy bombardment, the Russian forces were directed to retreat. The Russians were obliged to retreat, leaving upon the field 300 corpses, and a large number of wounded.

The Roumanian and Russian authorities issued a decree on Friday prohibiting all traffic on the Danube. This completely jeopardizes the large post-trade of Hungary. Andrusy has decided to take immediate steps against this measure being carried out and although he doubtless will be joined by the other powers he will not wait for their co-operation.

New Advertisements.

PARIS, May 16.—Republican journals are exclusively occupied in the discussion of manifestos of Republican Senators and Deputies. They declare that the Republic of France are surprised, but not alarmed, and are confident of the future.

UNITED STATES.

BOSTON, May 18.—A severe thunder and hail storm is reported in Vermont, Rhode Island, and Massachusetts.

At Greenfield, Mass., John Hayes was instantly killed by lightning, and several men knocked down and more or less injured.

In Vermont a terrific hail storm considerably injured vegetation and damaged other property. One of the hail stones measured five inches in diameter; another ten inches in circumference, and a third six inches in diameter.

In Rhode Island hail stones fell to the depth of three inches. Houses and mills were injured and much glass broken.

It is stated that the following expedition of 100 Russian infantry crossed the Danube in boats a little below Renia. The Turks allowed them to come well within range, when they opened such a fire that they were compelled to retreat to their boats with heavy loss.

The Russians have crossed the Aluta and entered Little Wallachia, which, it is expected, will be occupied solely by Roumanians.

It is reported that the Turks altogether captured 200 Russian vessels in the Danube, containing over 130,000 hectolitres of wheat.

A despatch asserts that Persia has declared her intention not to join Russia. Extensive military preparations are being made in Constantinople.

Reports have been received of the massacre of returned Raynaks at Curdun, on a more fearful scale than any that has yet happened in the people's dispatch says that the capture of Sookmook Kale and the rising of the Circassians, who massacred the garrison and burned the town is officially announced.

An iron clad has left Sookmook Kale for Batoun to obtain arms for the Circassians.

LONDON, May 17.—The "Times" despatch from Gurgur is as follows:—A great battle is impending. Already heavy cannonading is in progress. Andrusy has decided to take immediate steps against this measure being carried out and although he doubtless will be joined by the other powers he will not wait for their co-operation.

The Times Berlin despatch says in consequence, it is supposed, of the appointment of a semi-ultramontane Cabinet in France, the reinforcement of Alsace and Lorraine garrisons is likely to be carried into effect. There is no anxiety as to MacMahon's immediate intentions, yet it is apprehended ultramontane members of the new government may eventually prevail over the Duke de Gaze and induce more activity in the foreign policy of France.

Merchant's Gargling Oil.

A Liniment for Man and Beast.

"Whether for use on man or beast, Merchant's Gargling Oil will be found an invaluable Liniment, and worthy of use by every individual in the land. We know of no proprietary medicine or article now used in the United States which shares the good will of the people to a greater degree than this. Yellow wrapper for animal and white for human use only."

Extract from a letter from Geo. A. Smith, Danville, Va., July 24, 1873.—"I am selling more Gargling Oil than all the liniments put together, and I am keeping the different kinds. I think it is the best remedy for horses in existence, and can say it without fear of successful competition."

Extract from a letter from Rhoades & Co., Bloomington, Ind., Sept. 17th, 1873.—"It is the popular horse liniment in this country."

Extract from a letter from Geo. A. Smith, Danville, Va., Aug. 9th, 1873.—"I sell more of your Gargling Oil than all the other liniments combined, and have seen it used on horses and cattle from twenty drops, on sugar, or mixed with cream in any convenient form, and repeated at intervals of three to six hours. Yellow wrapper for animal and white for human use only."

Merchant's Gargling Oil as a Family Liniment.

We are now, and have been for some years, preparing the Oil free from stain, to be used as a common liniment for human flesh, extending the coloring ingredient which has been used in the past. This Oil possesses all the medicinal properties of that prepared with the dark tints for horses and cattle, and will be found one of the best remedies for all purposes where a liniment is required that has ever been manufactured.

From J. K. Fisher, Uniontown, Pa., Jan. 31, 1875.—"Your Gargling Oil is doing much better here than formerly, since its virtues have become known; and the bottles put up for family use, without stain, are much sought for."

For the Gargling Oil called "Family Oil," although prepared intentionally for human flesh, answers as well for beasts; vice versa, the dark Oil answers as well for human flesh, only it will stain and discolor the skin, but not permanently. Yellow wrapper for animal and white for human flesh.

Merchant's Gargling Oil as an Internal Remedy.

Merchant's Gargling Oil is a different liniment and emulsive. It can be taken internally when such a remedy is indicated, and is a good substitute for pain killers, opium and anodynes. For Croup or Spasms of the Stomach, Cholera, Asthma, or Internal Pain, the dose may be from fifteen to twenty drops, on sugar, or mixed with cream in any convenient form, and repeated at intervals of three to six hours. Yellow wrapper for animal and white for human flesh.

THE PETRIFYING SILICATE PAINTS.

As supplied to the Admiralty, Board of Works, Austrian Lloyd's, Woolwich Arsenal, Cunard Company, &c.

For House, Ship and General Use, Indoors and Out.
