On Getting 100 CENTS For \$1.00

Ours is the System School

From the time the clock in the office rings the assembly in all rooms, till the same clock rings the dismissal, the student feels the influence of a perfect organization.

We call the roll twice a day.

We have no late students.

We shift all classes by the ringing of electric bells, hour after hour.

We maintain perfect order and discipline in all rooms.

There is not one minute of time lost to the worker by interruptions, disorder, or lack of system. He gets 100 cents worth of tuition for every \$1 of fees paid to us.

The crown of the whole system, however, is our daily report.

The parent who is paying out good money for a student does not need to wait for a month for a report of progress—he may inspect one daily.

Just try to duplicate that one feature in any other school, business or otherwise, and you will see why we are proud of our perfect system.

We want you to write for our Catalogue so that we may go further with you in this matter.
