

\$100.00 in Gold

Is not half the worth of a Souvenir Range with Aerated Oven. For the saving of time, labor and fuel is very important. But, after all, comfort is more than gold, and in perfection of service is absolute satisfaction. A Souvenir in any home is suggestive of the costly and more luxurious comforts of life. You can buy one at almost any price—about 400 different styles and sizes of Stoves and Ranges. Just depends on the kind you select. They are perfect in design, construction, finish and durability, and for utility and convenience of service, unequalled. In fact, they represent all the improvements that can be successfully combined in a modern stove. We give a guarantee with every sale. Please write us for particulars, etc.
