

THE CRITERION.—156 Fifth Ave., New York. Prof. John Uri Lloyd's famous satires, the first of which, "The Mother of Sam Hill's Wife's Sister," was published in the September Criterion (1901), are resumed in the January number with the fourth paper of the series, "Sam Hill, Sheriff of Knowlton, Kaintuck," and purport to be related by "Chinnie Bill Smith," the famous story teller of "Stringtown on the Pike." These satires, written exclusively for the Criterion, will be illustrated by Martin Justice, whose character studies are second to none in the magazine field. Prof. Lloyd's inimitable style and daring, yet kindly humor, will be a rare treat to the Criterion readers. A deeper meaning will be read between the lines of these unusual papers by thoughtful minds. The next paper, "Why a Kentuckian Stands With His Back to the Stove, the Testing of Milinda," by Sam Hill, will appear in the March Criterion, and the remaining stories during the year 1903.

Notes.

SANMETTO IN CYSTITIS, URETHRITIS, PROSTATITIS AND GENERAL INFLAMMATION OF THE GENITO-URINARY TRACT.

I am an earnest friend of Sanmetto. It is a valuable and ethical preparation. From years of experience in its use I have learned to rely upon it in cases of cystitis, urethritis, prostatitis and general inflammation of the genito-urinary tract. In cases where its use is indicated its curative properties are most remarkable. I am satisfied if the profession will carefully discriminate in their cases they will always be well pleased with the results obtained from the exhibition of Sanmetto. I shall continue its use where indicated.

W. E. J. MICHELET, M. D.

Chicago, Ill.

SANMETTO IN ENLARGED PROSTATE COMPLICATED WITH CYSTITIS.

Dr. J. M. Minick, of Wichita, Kan., President of the Kansas State Board of Health, reporting his experience with Sanmetto, says: "I do not explain the action of Sanmetto from any ulterior motive or for publication any further than I candidly believe it is a God-send to men who are afflicted with enlarged prostate gland complicated with chronic cystitis, with a constant desire to micturate, especially at night."

THE TREATMENT OF INFLUENZA AND COUGHS.

We excerpt the following from the *Toledo Medical Compend* by David E. Bowman, M. D., Toledo, Ohio, Professor of Obstetrics, etc., Toledo Medical College. "The elimination of the toxins is too frequently overlooked in these cases. Formerly, in their efforts to relieve the distressing symptoms, the profession have used remedies which produced stomachic disturbances, arrest of secretions, constipation, etc. I find nothing better to overcome the congested condition, in these cases, than two laxative-Antikamnia and Quinine Tablets given every three hours. If needed follow with a scidlitz powder or other saline draught the next morning, before breakfast. This will hasten peristaltic action and assist in removing, at once, the accumulated matter. Heroin hydrochloride has been so largely used for coughs and respiratory affections that it needs little or no recommendation in this class of cases, but the favorable synergetic action of this drug used with antikamnia, is, I believe, not sufficiently appreciated. Antikamnia & Herion Tablets will be found useful by every practitioner, particularly during the winter and spring months. The antikamnia not only adds potency to the respiratory stimulant and expectorant qualities of the heroin, but it prevents the slight nausea which may at times follow its administration alone."
