

Fellows' Hypo-Phos-Phites

CONTAINS

The **Essential Elements** to the Animal Organization—Potash and Lime ;

The **Oxidizing Agents**—Iron and Manganese ;

The **Tonics**—Quinine and Strychnine ; and

The **Vitalizing Constituent**—Phosphorus,

Combined in the form of Syrup, with SLIGHT ALKALINE REACTION.

It differs in effect from all others, being pleasant to taste, acceptable to the stomach, and harmless under prolonged use.

It has sustained a high reputation in America and England for efficiency in the treatment of Pulmonary Tuberculosis, Chronic Bronchitis, and other affections of the respiratory organs, and is employed also in various nervous and debilitating diseases with success.

Its **Curative Properties** are largely attributable to Stimulant, Tonic, and Nutritive qualities, whereby the various organic functions are recruited.

From the *London Practitioner*, June, 1880.

FELLOWS' SYRUP OF HYPOPHOSPHITES.—This preparation is composed of the hypophosphites of iron, quinine, strychnine, manganese, lime and potash. Each drachm contains a proportion of hypophosphite of strychnia equal to one sixty-fourth of a grain of the pure alkaloid. The difference in action between the phosphates and the hypophosphites has been recognized by the introduction of hypophosphites into the British Pharmacopœia ; and this preparation is intended to present the tonic and nutritive bases which it contains in the hypophosphites, so as to increase the medicinal powers which they would have even in the form of phosphates.

In Cases where innervating constitutional treatment is applied, and tonic treatment is desirable, this preparation will be found to act with safety, and satisfaction.

Its **Action is Prompt**, stimulating the appetite, and the digestion, it promotes assimilation, and enters directly into the circulation with the food products.

The **Prescribed Dose** produces a feeling of buoyancy, removing depression or melancholy, and hence is of great value in the treatment of **mental and nervous affections**.

From its exerting a double tonic effect and influencing a healthy flow of the secretions, its use is indicated in a wide range of diseases.

Each bottle of Fellows' Hypophosphites contains 128 doses.

Prepared by JAMES I. FELLOWS, Chemist.
