... MOST WONDERFUL DISCOVERY OF THE AGE. ...

Excelsior Egg Preserver

It is no pickle; you simply treat the eggs with **Preserver**. After treating lay them away in a cool, dry place, in a box. The idea is to lay down a supply when eggs are cheap.

The **Preserver**, used according to our directions, will stop all decay of the animal matter of the shell, and, at the same time, seals every pore of the shell, which will keep the yolk in the centre of egg, where it is always found in fresh eggs, as the air cannot escape, nor can it work in, and we guarantee the egg to be as fresh in one year as the day it was treated. It costs less than one cent per dozen to lay them down, and a child can do it; it requires no skill. **Preserver** will be appreciated by all your customers.

FOR SALE BY ALL WHOLESALE DRUGGISTS.
