EASTER LILIES
FROM BERMUDA.

BULBS are the easiest to grow of all flowering plants. They may be grown in glasses with water—or planted in pots of earth placed in a dark place for three or four weeks, till they make roots; then brought into the room, when they will immediately begin growing, and ere long fill the house with delicious perfume as the beautiful flowers develope.

Failure with flowering bulbs, is caused by using poor bulbs.

The bulbs which we have imported are Holland grown—the very best—and you can succeed with them as well as the most expert florist.

No reason why your home should not be made beautiful by these lovely flowers, which require little attention and produce such gorgeous blooms.

Try a selection of varieties. Don't think they're hard to grow. You'll be surprised and delighted with them.
