LONDON, Aug. 11.—Dora of the Laughing Brown Eyes, third wife and unnumered affinity of Ferdinand Pinney Earle, New York poet, artist and record wooerlescribed by him at the time of their marriage in June, 1911, as "the dearest, sweetest and loveliest of them all"-informs The Toronto World correspondent today that she is about to seek her free-

She is now only twenty-five, twelve years younger than Earle. Her maiden name was Helen Theodora Sidford. From her father, an English architect, she inherited artistic tastes, and is an artistrof pronounced talent. She is a very attractive young woman, of tall, slight, graceful figure, with expressive blown eyes, a fine complexion and vivacious manner.

"How did you come to give yourself to a man of Earle's matrimonial record?" was a-sked.

"I knew nothing of his past until after our marriage." she replied. "Whatever his reputation in America. I had lived in a quiet English town, and had never heard of his antecedents. After our marriage his life story was cabled from America to the London newspapers. Clippings were sent to me on the continent on our honeymoon by my mother.

"I met Earle before my daughter did," said Mrs. Sidford, who was present at the interview. "He was accompanied by his mother when I was introduced to him. He and his mother visited me, and I returned the call at their hotel. Before he met my daughter he heard she was an artist, and suggested getting up a sketching party. I thought his instruction would be valuable to my daughter in her work, and brought them together. I supposed that he had come to Oxford, as many Americans do, to follow a course of study."

"Our marriage took place months after I met him," Mrs. Earle resumed.

"His mother seemed particularly desirous that we should marry. Perhaps she thought it might reclaim him, but she gave neither my mother nor myself the slightest inkling of his past. I was utterly deceived as to his character."

Earle's love affairs were first brought to public notice in 1908, when he took to his home Miss Julia Kuttner and informed his wife that the newcomer was his affinity and soul mate. The rightful Mrs. Earle at that time was formerly Miss Emile Marie Fischbacher, daughter of a bookseller on the banks of the Seine in Paris, whom Earle had married in 1903, and by whom he had a son, Harold Erwin.

False mustaches, wigs and masks are frequent. One man wears a big sun bonnet, another come abright colored parasol, at foot in diamter, still a third has featherpuff in each hand with which he tickles the neck of each pretty girl that passes and there are thousands of them. The girls are not mere spectators either, they take the offensive in hundreds of cases, tipping off stiff straw saliors and showering the crowd with confetti. On the first night of Carnivel, no will be still, Now as it draws to midnight, the packed area contracts, but there is no thinning out of the crusit.

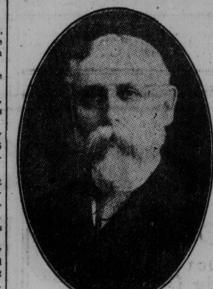

"Grand Old Man" There.

"Grand Old Man" There. Adam Brown, postmaster of the city, and on many scores worthy of the sobriquet, "Hamilton's Grand Old Man," sobriquet, "Hamilton's Grand Old Man," was the most striking figure at the luncheon tendered at noon by the reception committee to a number of the more distinguished guests of the city. He has passed his eighty-sixth year, and by his vitality typifies the spirit, of the week. Like Sam Blake, at the Anglican Synod; like Sir William Meredith in the courts of law, is Adam Brown, the very personification of solidity.

He stood up in the banquet hall of the Royal Hotel to propose the toast to "The City."

Growth of Population.

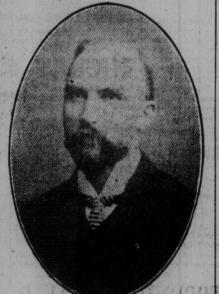

Mr. Gourlay quoted statistics showing that Hamilton's population has increased 62 per cent. since 1903, the capital invested in her industries 480 per cent., the wages paid her workmen 286 per cent., and her products 222 per cent.

cent.

"And your prosperity is not only manufacturing, but agricultural. You have the best farmers' market in Canada, and as a result there is no unwork land in the neighborhood of your city."

President J. A. Hunt of the London Board of Trade said that Hamilton's quick growth was largely due to her early development of electrical energy. Bishop Clark of Niagara, and Chairman H. J. Waddie of the reception committee were present, but did not speak.
