Six Persons Have Been Drowned and Two Hundred Square Miles of Territory Are Under Water.

Seattle, Wash., Nov. 16 .- A heavy rainfall on Wednesday, 2.48 inches, in four hours, and a chinook wind, which melted recent fresh snows in the Cas cade Mountains, coming simultaneous ly, are the cause of the heaviest and most disastrous floods in the history of the Puget Sound region. The valleys of the White, Duwamiss,

Cedar, Green, Stuck, Black and Puyalup Rivers are under water, flooding 200 square miles of territory. This includes practically every acre of land lying back of the eastern shores of the Sound and extending from Seattle to Tacoma.

The power plant at Electrin is submerged and Seattle and Tacoma are dependent on their local auxiliary stations for power to move street cars

dependent on their local auxiliary stations for power to move street cars and provide electric lights. The local plants, however, have fuel enough to operate several days.

All traffic over the Northern Pacific and the Tacoma-Seattle Interurban Traction is at a standstill. A week will be required to repair the damage to the road, after the water subsides. These low lands are thickly occupied by small towns, hop fields and darry farms. The damage done to fields and herds will run into hundreds of thousands. Seattle's milk supply comes sands. Seattle's milk supply comes from them, so this city will be without

milk for days. Six persons have been drowned. To the north, the Skagit, the largest river in the state, is on the rampage and railroad traffic in that direction is also at a standstill. The greatest loss by the streams to the north has been done to the lumbering interests, where millions of feet of logs and shingle bolts have been carried into the Sound and out to sea.

out to sea.

High tides, combined with the floods, have converted all the river deltas, which are great tracts of fertile farms, into muddy torrents. Hundreds of farm houses and villages are submerged to the second storeys and many people are homeless.

the second storeys and many people are homeless.

The loss to the Northern Pacific alone will run nearly \$150,000 and the total loss in the district will run to a half million. The drowned are:

D. W. Kellner, drowned Sunday near Anburn: two unknown men, employed as log-runners at Bloomhuests Camp, about a mile and a, quarter south, on the Green Siver; J. C. Viele, drowned in the White River, east of orillia; Patrick Culhane, drowned in the White River, east of Orillia; Patrick Culhane, drowned in the White River, east of Orillia; Patrick Costello, missing from O'Brien, believed to have met his death at some point north of that place.

Worst Over. Worst Over.

No rain has fallen in the flood district since an early hour on Thursday morning and while in some places the overflooded territory is as deeply covered with water as at any time since the freshet started, the feeling thruout the welleys today in general is out the valleys to-day in general in that the worst is over and that if con litions which now prevail continue fo another 12 hours, all further dange will have passed. From up-river points that is to the southward of Auburn along Green and Stuck Rivers, some reports say that the streams are rapidly receding, but north of here in the lower country adverse advices are still to be

Important Mining Transaction Which Seems to Have Been Consummated.

Something is doing in the O'Brien roperties of Cobalt. E. P. Earle, president of the Nipissing Mines Company, and W. B. Thompson, board member of Hayden, Stone & Co., of New York, both heavily interested in Cobalt, were at the King Edward yesterday for a few hours, leaving for New York again

Messrs, Ferland & Russell of the

Messrs. Thompson and Earle were closeted for hours with somebody in-terested in the O'Brien properties, and David Fasken was present as coun-sel. To Mr. Fasken is given the credit for ending the litigation over the O'Brien properties, and his recent visit to New York was in connection with the assumed transfer of the proper-

It is surmised, owing to the departure of Messrs, Thompson and Earle for New York last night, that the O'Brien interests have been taken over by the Nipissing people, that the Canadian participants in the deal will be the same as those represented in the Nipissing, and that mining operations on the O'Brien will be pushed with renewed vigor.

It is expected that Messrs. Thompson and Earle, with others of their associates, will return to Toronto early will be spread among Cobalt stocks.

She Was Wild With Pain.

From Willow Creek, Ont., Miss E. Diegel writes: "A few years ago I was drenched with rain and got lumbago; it was like a steel rod piercing my back. I also had earache and was just wild with pain. I applied bat-ting soaked with Nerviline to my ear and rubbed on Nerviline for the lumbago. That rubbing relieved and in a few hours I was well. No other liniment could do this." It's the pene-trating power of Nerviline that makes it superior to all other liniments. Nothing beats it, 25c, at all dealers.

Fatally Hurt in Hunt. Ingersoll, Nov. 16.—(Special.)—Word was received here to-day that Henry Herron of Avon, a short distance from here, who was injured while hunting deer near Burk's Falls, was not likely to recover. Mr. Herron belonged to the Black Creek Hunting Club, of which several Ingersoll men are members

SUITS

Can you always tell when you are getting an all-wool, well tailored suit? Isn't it worth a good deal to you to know that what you are buying is all it is claimed to be? The only way to know that, is to know you are buying in a straightforward store. Our reputation for quality is a guarantee. \$18, \$20, \$22, \$25

OVERCOATS

We don't like repeating, as a practice, but as a special emphasis we say again: We are offering the greatest value in Canada, in our Overcoats at

tion of Stricken Ones Till Late in Afternoon.

Mr. and Mrs. Jack Wright of this

Mrs. Wright, two sons and one daughter, aged about 21, retired as usual last night, the two sons sleeping in the upper flat. This morning the boys were around the house but appeared to be dazed thru inhaling the gas, and it was 3 o'clock this afternoon before they recovered sufficiently to realize the condition of the rest of the family.

A doctor was immediately summoned, but when he arrived he found the daughter had been dead for some time; the father and mother are now in a very serious condition, with but slight hopes of their recovery. An inquest will be held.

Brantford, Nov. 16.—(Special.)—Edward Gains, colored, was killed this afternoon instantly while working on a brick pressing machine in the Brantford Brick Company's yards. The man climbed up the machine in order to see how many forms there were still to be pressed, and fell, his head being crushed between a lever and a support on the machine. No one saw the man fall He was found very shortly afterwards and was dead.
