

EATON'S DAILY STORE NEWS

TODAY

THE STORE LAUNCHES A GREAT

MADE IN CANADA CAMPAIGN

With Special Displays and Demonstrations of Made in Canada Goods

"Buy Made in Canada Goods," is the Slogan For February

MEN'S SHIRTS, \$1.48

A Special For The First Day of the Campaign

They're Shirts of Unusual Quality

The materials are soft, firmly-woven corded zephyrs, that wear long and wash splendidly, and the shirts possess such details of good finish as deep yoke at shoulders, double reversible cuffs, four buttons on coat opening and reinforced sleeves, in 33, 34 and 35-inch length. There's a most extensive variety of patterns from which to choose, including single, cluster and novelty stripes of blue, black, green, mauve, brown and pink, many in two and three-tone effects. Sizes 14 to 17. A Made-in-Canada special. Today, each, \$1.48.

Main Floor, Centre.

AT \$2.45

ARE TWEED HATS

In Grey Donegal Effects

And with rolled or flaring brims. Some are all-wool; others wool and cotton. Sizes 6 3/4 to 7 3/4. This is another "Made-in-Canada" special. Today, \$2.45.

Main Floor, James St.

MEN'S SUITS AT \$23.75

Is Another "Made in Canada" Special And a Splendid One

taking in as it does suits of all-wool tweed, and cotton and wool worsted finished materials. In single and double-breasted, two and three-button, semi-form-fitting models, with notch or peaked shaped lapels. In browns and olive, pick and pick patterns, and brown fancy checks. Coats have lustre and twill body linings. Vests have five buttons; trousers have five pockets, belt loops and cuff bottoms.

The young men's double-breasted suits are in sizes 34 to 39; the men's single-breasted suits are in sizes 36 to 42. Special, today, \$23.75.

Main Floor, Queen St.

STORE OPENS AT 8.30 A.M., CLOSES DAILY AT 5 P.M. Closing on Saturdays at 1 p.m.

THE T. EATON CO LIMITED

PRECIOUS METALS ROUND SUDBURY

A Little of Truth About Undisclosed Values Coming Out.

The report of the Ontario Bureau of Mines, summarized in Saturday's World, contains special details of nickel production and precious metals concentrated in the copper-nickel matte. The production of the mines was as follows: Tons. International Nickel Co. 1,230,509 Mond Nickel Co. 882,913 Alexo Mining Co. 8,818 British-America Nickel Corp. 21,000 This total of 1,843,000 tons is interesting as showing the increasing production of the British-America Nickel Corporation, in which the British government holds a controlling interest. The company is erecting a smelter at the Murray mine, and at Deschênes, Quebec. This refinery will operate the electrolytic process of recovering the nickel and copper from the matte developed by V. N. Hyblinette in Norway.

Of the precious and rare metals in the Sudbury ores, it is well known that besides gold and silver there are platinum and palladium. In point of value, platinum and palladium are at the present time worth, per ounce, six times as much as gold and one hundred times as much as silver. Exact figures cannot be given for the precious and rare metal contents of the mattes produced at Sudbury. The whole subject of the occurrence of platinum, and especially of palladium in the

Sudbury ores, is not as yet thoroughly understood. For the three years ending 1915, the average contents of the precious and rare metals in the Canadian Copper Company mattes were 0.10 oz. platinum per ton, 0.15 oz. palladium, 0.05 oz. gold, and 1.75 oz. silver. At this rate the mattes produced by the company in 1916, amounting to 56,405 tons, contained 5640 oz. platinum, 8460 oz. palladium, 2820 oz. gold, and 98709 oz. silver.

In the Orford process of refining, the platinum and palladium pass into the nickel and monel metal and are lost, but the Mond process affords opportunity for a full recovery of these metals, which are concentrated in the residue. These are periodically removed, and have been disposed of to Johnson, Matthey & Co., London, by whom the residues are refined. Recently the Mond Company installed in their works at Clydach, Wales, a plant for treating the residues, and henceforward will be in a position to recover the precious and rare metals themselves. Analysis shows the Mond Company's mattes to be richer in both the precious and rare groups than those of the International Nickel Company, but the quantities obtained have not been reported.

WALKED ACROSS BAY.

Two Boys Narrowly Escape Freezing to Death While Coming From the Island.

Despite the fact that the temperature on the island was 20 below Friday night and early Saturday morning two young boys slept on the island in a vacant house. John Tunstead, 23, Monteth street, and Walter Higgins, 28 Monteth street, the two boys, walked across the bay to the city Saturday morning, and the cold wind got the best of them. They went to a factory on Parliament street, and when they arrived they were warned of the hazardous condition. They were taken to the furnace room and then taken to their homes in the police ambulance.

WESTMINSTER CHURCH WILL BE REBUILT

The management of Westminster Presbyterian Church, which was destroyed by fire Friday night, has already decided to rebuild at once. The World was informed on Saturday by Rev. Dr. John Neil, the pastor, and George Barron, who has long been connected with the management. The new church will extend farther east than the old church, the Bloor property having been purchased just before the war with this object in view. A number of years ago plans were made to build a school room on the south side and five properties facing on Hayden street were acquired as a site, but this proposal was abandoned and more frontage was purchased on Bloor for the extension. The church owns altogether 160 feet on Bloor by a depth of about 200 feet. It is likely the Hayden street properties will be sold, Mr. Barron informed The World.

COLLAPSED IN STREET CAR.

Thomas Williams, aged 60, of 78 College street, collapsed on a Queen car at the corner of Gerrard and Pape avenue Saturday morning and died before a doctor arrived. Dr. Brooks, 469 Pape avenue, pronounced death from natural causes. The body was removed to the morgue.

PIPE CAUSES FIRE.

An overheated stove pipe caused fire which spread to three houses at 240, 242, and 244 Maria street Saturday morning, causing \$350 damage. The fire broke out in No. 242 and spread to the adjoining houses. The loss to No. 240 was \$100; No. 242, \$200, and No. 244 suffered to the extent of \$50.

Human experience. Like the stern lights of a ship at sea, insurance only the path which we have passed over.—Coleridge.

TWO INJURED WHEN CAR RAN OFF RAIL

Twenty-Five Others Had Narrow Escape When Collision Took Place.

Two people were injured and 25 others had a lucky escape Saturday morning, when a westbound Queen car skidded off the frozen rails at Queen and Bathurst streets and collided with a northbound Bathurst car. Motorman Richard Gray of the Queen car, living at 124 Paton road, was most seriously injured, having both legs fractured. Estella Wilson, 40 Niagara street, a passenger on the car, received a deep gash under the eye from flying glass.

At the time of the collision, Miss Wilson was standing in the front vestibule about to get off the car. Motorman Gray seeing an accident was inevitable, at once put his arm out and pushed the girl back into the car. Otherwise, her injuries might have been more serious. The entire front of the car was smashed and Gray was buried in the ruins. Several carmen got him out and he was taken to the Western Hospital.

Conductor Thompson of the Queen car, in describing the accident, said Gray applied the brakes and reversed the motor 50 feet from the crossing. The car skidded this distance and rammed the Bathurst car with such force it shoved the body of the car half off the tracks. Thompson said he could not understand why the air brakes did not work, as the motorman

did not seem to have trouble bringing the car to a stop at different stops before the Bathurst crossing.

WOMAN IN THE CASE HAS BEEN ARRESTED

Florence Stock, aged 21, of 206 Dufferin street, was arrested Friday and looked up in Court street station on a charge of vagrancy. The young woman is alleged to be the woman who went thru the romantic wedding ceremony Thursday with David J. Gregson. Gregson met his wife Thursday afternoon on Yonge street, married her, and after going to look up a home, got into a fight, got beaten up, and in addition to losing his wife, got arrested. Friday morning in police court he sat in the dock with a bandaged head and heard a charge of "being drunk" read out against him. As his bride was still being looked for by the police a remand of the case was made until this morning to allow detectives to look for Florence Stock. An effort will be made in court to settle the case.

Building Permits Show Better Building Conditions

Building permits issued during January 1920, surpass all city records in number and value. The former record was made during January 1913, when permits to the value of \$1,276,000 were issued, but January of this year passed that figure by \$191,230. The value of permits issued during January 1920, is an increase of 481 per cent. over January 1913. Permits granted during this month are as follows:

No.	Value.
Brick dwellings	44 \$194,700
Roughcast dwellings	4 11,700
Factories	3 150,000
Garages	60 34,275
Stores	20 88,500
Warehouses	7 460,500

MANY PRECIOUS METALS DISCOVERED UP NORTH

The Mond Nickel Company, which has a process of its own for recovering the rare metals, platinum and palladium, and the precious metals, gold and silver, from its Sudbury mattes, does not furnish information to the government. The Canadian Copper Company (International Nickel Company) does; but the rare and precious metal contents of the Canadian Copper Company ores are not as high as those of the Mond copper-nickel. From 1907 to 1918, inclusive, the Canadian Copper Company made the following recoveries of rare and precious metals:

Gold	31,570,738 ounces.
Silver	1,085,220
Platinum	6,397,216
Palladium	8,209,923
Rhodium	1,819,899

Some promise of future benefits to Ontario from the recovery of a large and unaccounted for production of rare and precious metals from ores mined in Sudbury district may be expected from the recovery process invented by Prof. George A. Guesse, of Toronto University.

Experiments have been made with Prof. Guesse's process at one of the Sudbury smelting plants, which are said to have been successful, and it is hoped that a more extended trial will be made. A three-fold advantage is claimed for the process: (1) It saves time; (2) it reduces the cost of refining; (3) it enables the rare and precious metals to be recovered.

INTERMENTS IN CEMETERIES.

During January, 1920, 558 interments took place in the various Toronto cemeteries as follows: Mount Pleasant, 130; Necropolis, 9; Prospect, 183; St. James, 23; St. John, 100; Mount Hope, 65; St. Michael's, 11; Park Lawn, 52.

WAS NOT AWARE OF HIGH MILK PRICES

Attorney-General Replies to H. H. Dewar's Request for Investigation.

Hon. W. E. Ransay, Saturday, sent a letter to H. H. Dewar, Liberal leader, replying to the suggestion of a board of commerce probe into the Hamilton Dairy Co. capitalization increase. Mr. Ransay says: "The inference which you intended the public to draw from the statement contained in your letter 'that the capitalization of the Hamilton Dairy Company, Limited, had been increased from \$40,000.00 to \$250,000.00, is I suppose, that the difference between these figures is represented by bonus stock issued to the shareholders. My information is that that is not the truth, and I venture to suggest for your consideration whether it was quite fair to make what is practically a public charge of that nature against a private company without having some evidence in hand to support it. But waving that point, which, after all, is one for your own good judgment and sense of fairness, and board of any competent, as to milk prices in Hamilton, where I understand, as here, there is an order of the board of commerce fixing both the buying price and the selling price, but if, nevertheless, on the opening of the inquiry into the matter of the alleged 'grossers' combine you will appear before the board and ask for an inquiry into the conditions in the milk business in Hamilton this government will interpose no obstacles in your way."

AGREEMENT SIGNED HELDT RIVER

Belgium to Have Equal Outlet to the North Sea. Yet Signed.

PLANS PROJECTED

1.—The Dutch press text of the new treaty and Belgium, which is ratified. Its principal stipulations are as follows:

Belgium to have joint navigation on the Scheldt river with the Netherlands. The movement of goods from Antwerp to Rotterdam is likely to result in a large increase in the traffic. The treaty is left to the future League of Nations; both Belgium and the Netherlands are to be free and equal in the Scheldt. Two new large canals are to be constructed at the speediest moment. Belgium is to have an equal outlet from Antwerp to Rotterdam with the North Sea, from the Rhine, across the Scheldt to Antwerp, and from Antwerp to the North Sea. The canal is to be constructed in such a manner that an additional canal is to be deepened to allow larger ships, and in such a manner that the cost of construction and maintenance is to be borne equally by both countries, and that the time and pilotage is to be made as uniform as possible.

to the German Rhine. The canal is to be constructed in such a manner that the cost of construction and maintenance is to be borne equally by both countries, and that the time and pilotage is to be made as uniform as possible.
