Ald. William's Motion to Proceed With Pile Bridge Adopted by Council.

Work to Extent of \$12,000 to be Carried on by Day Labor at Elk Lake.

Bridge and waterworks matters were discussed at last evening's special meeting of the city council. Ald. Wilson was the only member absent.

Mayor Beaven reported that he had interviewed Mr. Alex. Dunsmuir, presi-. dent of the E & N railway company, with the object of securing an extension of time for the use of the railway bridge, and that Mr. Dunsmuir's an-swer was as already published.

Mayor Beaven also reported that he had interviewed the local officers of the Consolidated Railway Company with reference to the strengthening of the Point Ellice bridge. He was informed that none of the officers at present in the city had authority to arrange-for the company paying a portion of the cost, that their engineer, Mr. Keefer, had gone to Kootenay, but fhat the company will send to Vancouver for an engineer who will come here immediately to consult with the city's engineer.

A discussion arose as to whether the city would have to pay for the tramway company's consulting engineer, the mayor holding that such an idea was never hinted at before. Ald. Glover, however, believed that the expense would eventually fall on the city. Messrs. Yates & Jay informed the

to allow the Municipal Reform Association's injunction to be dissolved. Ald. Humphrey regretted that a man could be found in the city unpatriotic enganization as the Municipal Reform Association—an association of men who sought to embarrass the city and which was assisted in this work by certain The Honorable Minister of Public alderman on the board. Alderman Humphrey suggested that Aldermea Williams and Tiarks belonged to the Municipal Reform Association. Both aldermen, however indignantly repudiated the allegation. They had no con-

Ald. Marchant congratulated the aldermen on their repudiation. Ald. Williams then moved and Ald. Macmillan seconded the following re-

nection with it.

solution: "That the council deem it expedient that the city engineer should take the necessary steps to proceed to give ample additional strength to Point Ellice pile bridge (employing a night and day force more than support any demand made upon it, thus being prepared should the Consolidated Railway Company have the legal right to use the bridge, thereby avoiding delay during the settlement of the questions involved as to contribution |

Alderman Macmillan in seconding the resolution denied the assertion made more than once that the council were acting arbitrarily and attempting to prevent the tramway company from procuring transportation across the Arm. The council did nothing of the kind, and were only prevented from doing justice to all classes by the ill-advised actions of certain individuals.

Alderman Marchant regretted that they were compelled to support the resolution, but they must bow to the decision of the courts-a decision which many laymen and many others skilled in law, differed from. He also paid his compliments to the Municipal Reform Association. He was pleased to see the city engineer present, as he wanted the point explained regarding the strength of the pile bridge. He understood the Brown, with power to employ and disengineer to say that the bridge was strong enough to carry a railway train. supervision of the water commissioner the resolution in order to secure com-

munication with Victoria West. Engineer Wilmot in answer to Ald. Marchant stated that there were sufficient piles for tram car traffic, but the a first time and will be read a second stringers laid down were for ordinary traffic only. By putting down stonger stringers the bridge would be made suitable for tramcar traffic. The truss also would have to be strengthened, as it was designed for ordinary traffic only.

The following letter was then read: Victoria, B. C., Aug. 4, 1896. Sir,-I have the honor to enclose here with plans numbered 1, 2 and 3, and index map showing the position and general character of the two bridges that were constructed across the Arm prior to 1895 and the bridges proposed to be that was constructed by the provincial government prior to 1892.

The bents are 45 feet from centre to centre, the height of bottom of the Vigor and Organic Weakness. stringer above H.W.M. is about 11 ft., and the height of the corbel about 9 ft. 8 inches, leaving the clear passageway under the central portion of the span at

Awarded Highest Honors-World's Fair, DR:

MOST PERFECT MADE. A pure Grape Cream of Tartar Powder. Free Immonia, Alum or any other adulterant 40 YEARS THE STANDARD.

inches at the end of corbels to 2 ft. at the foot of the brace which extends from the pile bent to near the end of

Plan No. 2 represents the elevation of the second bridge built by the provincial government in 1885. This bridge has two spans of 150 ft. each and two of 120 each, besides the trestle approaches. The easterly 150 ft, span collapsed on May 26th last. This bridge has a clear headway under the 150 ft. spans of about 20 ft. above H.W.M., and under the 120 ft. spans of about 3 feet.

Plan No. 3 present the proposed bridges, one for ordinary vehicular, and pedestrian traffic and the other for electric tramway traffic only, which are erewith submitted for your approval. The pile bents are 20 ft. centres; the truss span is 70 ft. clear. The elevation of the bottom chord of the truss is the pile portion about 20 ft. 4 in., ex-

H.WM. From the fact that the last constructed bridge at Point Ellice, which was originally designed for a moving load of about 8 or 9 tons, has been subjected to loads of about 20 tons, many of the members have undoubtedly been strained beyond their elastic limit, rendering it unsafe to utilize the standing spans for traffic without supporting them with piles or practically renewing the structure, for which purpose the cylinder piers that support the 150 ft. on June 1, 1885, and was afterwards an important witness for the defence in the formed by a cluster of piles encased in

with concrete. As existing at present the concrete is disintegrated and water to adopt for the resumption of traffic would be the construction of the proposcouncil that Mr. Elworthy was willing ed pile structures, which in addition to being much stronger than the bridge that collapsed, even if repaired, would answer every purpose until such time They as the construction of a permanent ough to become the tool of such an or; bridge could be undertaken. I have, etc.,

E. A. WILMOT, City Engineer, Victoria Works, Ottawa.

In answer to Ald. Partridge, Mr. Mason, the city solicitor, stated that it would be well for the council to notify Messrs. Bodwell & Irving, solicitors for the Dominion government, that they intended to strengthen the pile bridge. The resolution then carried, Ald. Partridge alone voting against it.

A report from the finance committee recommending an appropriation of \$2,000 was then carried on the same

The finance committee also reported recommending an appropriataion of \$11,750 out of the water-works by-law: if deemed necessary) so that it shall \$5,000, expropriating land, \$6,000 and building dam \$750.

Ald. Cameron wanted some informa- fore disappearing. Mr. Coates went up tion regarding the expenditure of such a to Anderson Lake and found that allarge sum of money out of a loan which was running low. He thought that the present expenditure should be confined by the company, thus affording relief as to the least amount of land necessary quickly as possible to foot and vehicular and the building of the shortest possible Coates was determined to capture the road. The effort to preserve th weter was a right one.

Ald. Partridge pointed out that the mayor had ruled out of order a similar motion introduced by him. The mayor explained the distinction between the two motions and also explained why it was necessary that the work should be done in order that the filter beds could be used next year.

Ald, Partridge still remained unsatisfied, and the result was a heated altercation between himself and the may-

Ald. Williams suggested that if the council build a good road, the provincial government should be asked to assist. Ald. Macmillan moved that the recommendation of the finance committee be accepted and the work be proceeded charge men, the whole to be under the Ald. Partridge, although always op- and the city engineer. The resolution posed to the pile bridge, would support was seconded by Ald. Humphrey. The resolution then carried.

Ald. Tiarks' bridge by-law, authorizing the corporation to borrow \$150,000 to build a bridge at Point Ellice, was read time at the next meeting of the council. The council then adjourned.

A MESSAGE TO MEN. Proving That True Honesty and True Philanthropy Still Exist.

JAPAN AND PERU.

Treaty of Peace and Commerce Between the Two Countries.

Lima, Peru, Oct. 9.-Via Galveston. Texas, Oct. 9.-At a secret session last night, the Peruvian congress approved a treaty of friendship and commerce between Peru and Japan.

Their gentle action and good effect on the system really make them a perfect little pill. They please those who use them. Carter's Little Liver Pills may well be termed "Perfection."

The Man Captured by Ex-Sergeant Anderson 1, T. Johnson 2. Haywood is a Well Known Adventurer.

A Resident of the Province for Many Years-Some of His Mining Deals.

James Talyard, who was arrested yes

As far as can be learned, he made his first appearance in the province about the time Mr. Moberley made the prelim inary survey for the C. P. R. through South Kootenay. He worked for Mr Moberley for some time and afterwards prospected for quartz mines on Koote nay Lake. He was in the vicinity of the Blue Bell claim when Hammill was shot important witness for the defence in the case of the Queen vs. Sproule. Sproule a cylinder, the voids being filled was found guilty and hanged for the murder of Hammill, after a most bitter and prolonged trial. Talyard stuck to leaks into it and out of the cylinders at his friend to the last, doing everything different stages of the tide. Under the in his power to liberate him. His ancircumstances it was considered that the | xiety to secure Sproule's liberation at quickest and most economical method tracted very general attention at the

Talyard afterwards made his appearance on Rock Creek, Yale district. He and others located what was afterwards known as the Laura hydraulic mine. sold it to some Victoria parties, Talyard's share in the Alice and Emma quartz mines adjoining being included in the deal. He then cated a quartz mine near Yale. He used to come to Victoria nearly every winter, and would disappear for months at a time, taking occasional trips to

Honolulu and the States. Two years ago he took rooms in the Hoffman House, Vancouver, and hung out a shingle as mining engineer. He disappeared from the Terminal City about Christmas, 1894, and the general public heard no more of him until arrested yesterday afternoon. But there were private individuals who had lost heavily by his schemes and were anxious to know of his whereabouts. Mr. J. A. Coates, of Victoria, was one of the many who went into the company organized by Talyard for the purpose of working an hydraulic mine at Anderson Lake for raising the East Saanich road Mr. Coates invested \$1000, paying \$700 to Talyard in advance. Talyard secured about \$6000 in the same way be-

> though the claim was staked it had not been recorded and was practically worthless. The other Victoria directors deman and spont consideral with that end in view. He employed Pinkerton detectives in the search, but their efforts were unsuccessful. dently considering himself safe after a long absence, Talyard put in an appearance at Vancouver a few days ago. He was at once spotted by ex-Sergeant Haywood, and Mr. Coates and the pro incial police were communicated with Mr. Coates went up to Vancouver, intending to secure Talyard's arrest, but the latter boarded the Warrimoo at 4 clock in the morning. Mr. Heywood, however, was watching his man and als: took passage on the steamer. Just as

wharf Mr. Haywood went to Talyard's room and placed him under arrest. Although about \$1500 was found on the prisoner, he is supposed to have over \$5000 secreted somewhere-money tained through his mining deals. Several of his victims called at the provincial police station to-day, all anxious to present their claims.

the steamer was nearing the outer

Talyard was transferred to the city police station this morning, having been turned over to the city police. He appeared before Police Magistrate Macrae this afternoon and was charged by Mr. Coates with securing \$700 by false pre-The case was remanded until Monday next.

SAANICH FAIR.

Closed With the Annual Ball in Agricultural Hall.

The 29th annual exhibition of the North and South Saunich Agricultural Society came to an end yesterday evening. The auspicious occasion was cele brated by a ball held in the society's duced from a drawing in the Lands and charge the plan pursued by which I by decorated. The suppers of the ladies was completely restored to perfect of Saanich are on record, so mention of health and manhood, after years of suf- that would be superfluous. Suffice it to say that with the good music, good floor and happy throng of guests it would be difficult to prevent anyone who was present from enjoying himself. President Simpson and the officers of the society welcomed the many guests, the attendance being fully as large as it was during the afternoon. The field sports were the drawing card of the afternoon, and many city people, enticed probably by them, went out by train, bicycle and every other conceivable mode of conveyance to share in the enthusiasm. Several very interesting events were brought off on the society's three-quarter mile track. Local horses only started. The first event was a running dash for home horses, their mounts being pioneers of 50 years of age and upwards. This went to G. Harrison, with W. Thomson good second. When the flag dropped Mr. X. Marcotte got away well and was nicked out at once as a winner. He. however, had hard luck, his mount proving unmanageable and throwing him very heavily.

The trotting race brought out a field of five starters with all sorts and conditions of vehicles, Mr. Fred Turgoose's mare, the same, by the way, which took the prize for the best buggy horse yesterday, again proved a winner. Mr. T. Tunstead was second: he deserves great redit as his vehicle was not of the

lightest The next event was on the programme for Lo's benefit, a race for Indian pon-ies. Four entered, all members of the

aanich tribe. Sam took first place and Mitchell second.

The track was too soft to allow of bicycle races, and a sprinting race took place instead. The result was George

· FOR CRIMINAL LIBEL. Earl Russel Has His Mother-in-Law Arrested.

London, Oct. 10 .- Lady Scott,, mother-in-law of Earl Russell, was arrested yesterday evening and taken to Bow street police court. The charge against her is criminal libel, preferred by Earl Russell. She was arraigned in Bow street police court this morning in com pany with two youths, who are included terday afternoon for obtaining money in the charge. Earl Russell attained under false pretences, is a man with a much unpleasant notoriety through divabout 19 ft. above H.W M., and the ele-vation of the bottom of the stringers of the pioneers of the province, had busi-him by his wife, formerly Miss Mabel ness connections with many of them. April, 1895. Later in the day Lady Scott was released on furnishing bail to the amount of \$5,000.

## AN AGED SUICIDE

Alexander Fraser, a Stonecutter Found Dead in His Cabin.

He Was Once a Member of a Prosperous Firm of Contractors In England.

Alexander Fraser, an old Scotchman. 66 years of age, who, until a short time ago worked on the new parliament buildings, has committed suicide by

hanging himself. The method he chose was rather a strange one. Procuring a short bar of iron he placed it between the door and the lintel, then looped it to a strap to which ferred to the supply committee was attached a short thong of leather, made a noose and put his neck in it, thus causing death by strangulation. Deceased lived in one of the cabins on the corner of Humboldt and McClure streets. Two of his neighbors, John Littlewood and Fred Robinson, not having seen him as usual for some time became alarmed at his continuous absence from among them, and imagining that something must have bappened to him, as for some time past his health had not been any too good, they looked in through-his window and saw his form stretched out on the floor. He had only his underclothing on. Fraser, while working on the parliament buildings, saved money; he did not spend any more than it took for the necessaries of life. About a month ago he sent about \$300 to relatives in Scotland, and a letter found tells that this was received. His body is now lying ir the morgue, to where cided to let the matter drop, but Mr. it was brought by the city police this morning. It is thought that he has friends in Stockton, California, and the of that town will be wired to in order to ascertain if such is the case. Deceased has been a stonecutter for many years. In company with his

brother he was at one time one of the prosperous contractors of Glasgow, many buildings in that city and other cities of Scotland being built by them. The old man of late, however, seemed to be in his decline, and was at times quite childish. As those who worked with him in this city are well aware, if was his pet thought that soon he would again be on the way to Scotland. Many times he all but made up his mind to go at once, but seemingly thought over it and waited. When he left work some time ago he became slightly touched with the desire to go prospecting, and he went up country for a short time, returning about a month ago. Since then he has not done a stroke of work and brooded over his misfortunes

considerably. Fraser was a member of the A. F. & A. M., his apron being found in his cabin. On his body was found \$247. The inquest to inquire into the cause of Alexander Fraser's death was held this afternoon. J. Littlewood, a witness, said that on Wednesday, the last

time he saw Fraser alive, he, the deceased, told him he was going to California shortly to see his wife and family, who are at Stockton, and thence to The following verdict was rendered: That Alexander Fraser came to his

death by hanging himself during a fit of

UNITED STATES AND TURKEY. Bancroft to be Kept in the Vicinity of Constantinople.

Washington City, Oct. 8.—The action of the Turkish government in giving it to be understood that no guardships of the powers, except parties to the treaty of Berlin, shall be admitted to passage through the Dardanelles, is looked upon here as a shrewd piece of diplomacy. The fact is that thus far the United States has not made any formal request to have a guardship at Constantinople, and this announcement in advance of the preference of a request renders it improbable that one will be preferred. The urposes of the government in sending the little Bancroft to Turkey have been carefully concealed, both by the state and navy departments, and even now it not possible to secure an official admission that it was intended to send her Constantinoplé.

Beyond doubt, however, it was the urpose to have her near Constantinople, so that if events assumed a serous phase Minister Terrell might seek the firman necessary to insure her safe passage through the straits. This purose was at last made clear yesterday when the little boat sailed from Gibraltar for Smyrna, only about 150 miles distant from Constantinople, an easy day's sail, and this is probably the rea-son for the semi-official announcement of the position of the Turkish govern-

Cost of Making the Necessary Repairs to the North Ward School Building

Resignations.

The Board of School Trustees held a meeting yesterday evening in the office of the secretary. All the members were present and Mr. Hayward was in the chair. A communication was received from Mr. and Mrs. Sault, who complained that their boy had been severely cained by Principal McNeill. The letter was received and a committee appointed to enquire into the matter and report. W. W. Northcott, the building inspector, wrote saying that the North Ward school building was now, in his opinion. perfectly safe. Principal Netherby sent a letter to the

board referring to the practice of boys throwing stones at Chinamen. A letter was read from a teacher named Duffey, of New Brunswick, enquiring if "the supply of teachers was equal to the demand." This was re-

ferred to the superintendent of educa-Peter Hansen wrote saying that he had some 200 cords of wood for sale which he offered at \$2.85 a cord. Re-

power to act. The resignations of two of the teachers. Miss M. Sanderson and Miss S. Kermode were received and accepted. A statement was submitted of the cost of repairs to the North Ward school building which showed a total of \$1,826.49, of which \$979 went to the of native soliders at Mindanao Island workmen for wages, \$140 to the archi- in the Malay archipelago, and the sec tect for his services and the remainder end largest of the Phillipine Islands for the material used. A balance of have mutinied and killed their officers, \$1,070 will be still on hand after paying all outstanding accounts, which will be required for sundries, etc., until the close of the year.

During the month of August it was shown by the attendance reports that 2,135 pupils had attended the schools, and 2,176 during September, the average

per teacher being 45.33. Mr. McMicking, of the repairs committee, recommended that the boiler at the Central school be repaired immediately, the cost to be about \$75. A motion that this be done was carried. He also recommended that the roof of the is in a bad condition. This matter was referred to the alterations and repairs

Bills amounting to \$943 were read and ordered to be paid. 'The bill for repairs to the North Ward school building was included among these.

Then with closed doors the board went into committee to discuss the applications for positions on the teaching Mr. Belyea moved a resolution "that

hereafter no application for a position on the teaching start of the public schools of this city be considered uness the applicant holds a certificate not ower than second class Grade B." After discussion this was carried. The appointments were as follows:

Mr. Apgus Galbraith was appointed to fil Miss Dowler's position until the end of the present term, Miss Dowler being promoted to the position vacated by Miss Sanderson, resigned. Miss Abbie F. Gardiner was appointed to the position vacated by the resignation of Miss Kermode. These changes are to take effect on November 1st.

NEW SENATORS.

Men Who Are Likely to Secure the Vacant Seats.

Toronto, Oct. 10 .- The Mail's Ottawa correspondent says: The name of Robert Jaffray, of Toronto, president of the Globe Publishing Company, is mentioned in connection with the vacancy causdespendency in his cabin on McClure ed by the death of Sir David McPherson. The general opinion is the appointment would be commended irrespective Pure Coffee, 40c. per lb. of party. Another senatorial vacancy M. M.
