

THE ACADIAN

WOLFVILLE, N. S., AUG. 2, 1889.

EDITORIAL NOTES.

John Lewis, of the Toronto Daily Globe staff, is on a pleasure trip, taking in the Maritime Provinces. He paid us a visit on Thursday and is much pleased with the varied beauties of the Annapolis Valley. He intends writing up his trip on his return to Toronto.

We notice that the Wolfville Water Commissioners are advertising in the Halifax papers for tenders for a loan of \$25,000,—the sum authorized by the Act. In other places the Commissioners have also advertised in the local papers; but as our Commissioners are doing all their work a little different from what was ever done in any other town, their action in this respect is in full accord with their other doings.

It is with sorrow that we learn of the death of Mr Henry S. Piper, editor and proprietor of the Bridgetown Monitor, which occurred on Sunday morning last. Mr Piper was a comparatively young man, being only in his 37th year, and leaves a wife and family. He was a general favorite among journalists, and under his management the Monitor was one of our best exchanges. We tender our heartfelt sympathy to the bereaved family.

The Dominion Illustrated Company is keeping its promise to make its journal worthy of the Dominion. Some of the grandest features of Rocky Mountain scenery are a theme for artist and writer in the last number. The Minister of the Interior, of whom a capital likeness is given, represents the progress of the North-West. The Kelopore Cup reminds Canada that her sons are doing their duty in the Old World. A good number on the whole. The Dominion Illustrated deserves to be encouraged.

On our first page this week will be found the first half of the "Wolfville Water Supply Act," which will be concluded next week. As this Act is likely to take an important place in the future history of our town we think it only right that it should be read by every resident of the place. Those of our readers who reside in other parts of the county will also not doubt be interested in it. We would advise our readers resident in the water district to preserve the papers containing the Act for future reference.

Gaspereau Chips.

Mr E. A. Davison has in his garden corn standing over six feet in height, with ears well formed and nearly fit for use.

The pickling establishments are now in full operation and are likely to receive all the cucumbers there are capable of converting into pickles this season.

Martin's Steam Barrel Factory is now running full time; but owing to the difficulty of getting stock last winter probably a lesser number of barrels will be turned out than usual.

Mr Jowdry met with a painful accident on Friday last, by which he came near losing a portion of his left hand; as it was two of his fingers were badly lacerated. He was splitting a narrow board with his small circular saw when the saw caught his hand inflicting a bad cut; but fortunately not sufficiently bad to render medical attendance necessary.

Mr Rufus Forsyth has a small piece of tomatoes containing some 200 hills which for luxuriance of growth and quantity and quality of fruit cannot be equalled in this valley, if indeed it can be in the county. A portion of the fruit is now large enough to gather and will very soon be ripe of cucumbers as is usually seen anywhere, and he has sold already over 700 lb of fruit to Davidson's pickling establishment.

Long Island Items.

Vegetation of all kinds has been extremely rapid and the prospect for a large yield of vegetables is well assured. The shad fisheries have been almost a total failure on our shores this season, the tidal catch seldom exceeded 20 to 25.

Alexander Fullerton is building a new barn near the main road, which, when completed, will be one of the best in the neighborhood.

All are busily engaged at haymaking and are nearly done, having secured one of the largest crops for a number of years and saved it in excellent condition.

The lacinate trees, which a few weeks ago were almost entirely destitute of their foliage on account of a new insect pest which had attacked them, are now putting on new foliage, giving our forests the appearance of early spring.

A larger number of pleasure seekers have visited us this season than before and the desire to rusticate with our farmers for a few weeks during the heat of the season is on the increase. Quite a number have been stopping here for a few days and many more applications have been made which could not be accepted.

TAKE NOTICE.—If your razor is dull, take it to J. M. Shaw's Barber Shop, and he will put it in first-class order for the small sum of 15c. 10

Vacation Jottings.

New Mines, July 23.—"So this is New Mines?" Our guide said it was, so out of our conveyance we leaped to see the place and get acquainted with it. Up on one of the lofty summits of the Cobequids, the view is grand and sublime. Away to the west we can see the waters of the bay and across the faint outlines of North Mountain, standing faintly against the gray background of cloud and sky. It is beautiful. Before I know it I am looking for Blomidon, but it is not there. The peak from which we view is not lofty enough. Still I involuntarily strain my eyes in scanning the opposite shore, for just beyond us is home. And it doesn't seem far. But nothing familiar meets the gaze. The view however is beautiful and our guide is looking at it. If Blomidon came within its range, it would be perfect.

We mount again and drive on. On every hand is beauty and grandeur and sublimity. The road sometimes is damp, green, and in many places not wide enough for two carriages to pass. On one side the steep mountain running up almost perpendicularly, on the other a deep ravine, as steep and precipitous. We shudder as we come upon some place in the road unusually wild and dangerous and look into the depth at our feet and the summit at our right. But we have confidence in our guide, Mr Guest, the genial and obliging goods deliverer of the firm of G. W. Cox & Co., Acadia Mines. He has been over the ground before, he says, and we guess he is right. He acts like it. As we reached one place where the road was unusually narrow and the bend around a mountain peak made it appear as if we had reached the end of it and it was no more and the precipice below had a tendency to make one's hair stand on end, he looked down into its depths, we broached the opinion that it would be rather a bad place to be travelling after dark with a slipshod horse. "Oh," he said, "it is kind of wild here, but nothing to what's ahead of us." This assured but not comforted, we proceeded, an undaunted party. The spirited animal which he drove went over these dangerous passes as gently and as carefully, under his guidance, as if it understood the danger, as no doubt it did, and when the road was once more safe and smooth would pick back its ears and speed on as if glad the danger were over and it was once more free to go its "kidd."

New Mines, July 24.—Truly scientific weather. Just enough rain during the night to lay the dust and just enough clouds to make it pleasant for tramping. A Providence clearly shows approval of Science. Astronomy occupied the first hour of the session. The subject dealt with by A. Cameron, Esq., Mineralogy, Chemistry and Botany then followed. The numbers were so large in attendance at the latter subject that a division was made in the class and two classrooms were required. The number of Nova Scotia botanists will certainly be increased in the near future, judging by the interest taken in this subject. The afternoon included Zoology and an explanation of Partridge Island.

A noticeable feature of the school is the method of conducting the lectures objectively. Whenever it is possible to produce the object alluded to, or illustrate the point spoken of by diagrams it is done. Thus Science simplified, its terrors are removed and work becomes play.

Thursday, July 25th.—At 8 a. m. 100 scientists boarded the train for Amherst, where they arrived at 11.30. Proceeding to the Y. M. C. A. Hall they received a hearty welcome from Senator Dickie on behalf of the citizens. President Eaton presented the thanks of the school. A magnificent banquet was then deposited by ladies from the elite of Amherst. The excellent management of this part of the programme was not unobserved. Every visitor felt entertained individually. Choice selections were rendered on a grand piano during the feast by Mr D'Anguerre. Introductions were general, and invitations for the afternoon drive were made personally.

At 2 p. m. the visitors were seated in the handsome tent collected in front of the Y. M. C. A. Hall. The lead was taken by Albert Black, Esq., chairman of the committee of management. The marshes and judges supplied pleasant variety until the old fort of Beaudouin was reached. Here the party alighted and drank in the delicious air and the uninterrupted scenery.

The visitors were invited to surround Judge Morse who delighted his audience with verbal pictures of the events that took place within sight. Dr Allison presented the Judge with a hearty vote of thanks. The last of the relics is a part of a wooden building standing in the middle of the fort which served as officers' quarters, and a stone powder magazine. These are fast disappearing from the depositions of relic seekers.

Leaving the fort, the party drove to the southern terminus of the ship railway. The particulars of this undertaking were thoroughly explained by the enterprising engineer, Mr Ketchum. The excavations proved interesting to the geologists who carried away pockets full of various colored mud, &c., and parts of a submerged forest. The return to Amherst was made at 6 p. m., when the citizens entertained their visitors so sociably at tea.

An open concert by the popular Amherst band was enjoyed in Victoria Square. After promenade to the inspiring strains an adjournment was made to the Y. M. C. A. Hall, where a short programme was carried out. Miss Knier, of Amherst delighted the audience with the exhibition of her fine dramatic powers. The faculty of the S. S. of Acadia occupied the platform. Hearty thanks were offered to the citizens for their magnanimous entertainment. It will be a day long to be remembered by those who participated in the pleasures of this Nova Scotia farewell at midnight. The delightful weather and star-light night added no little to the many enjoyments.

Friday, July 26.—Weather still fine. Students at their places in the classrooms manifesting the greatest interest in the subjects under consideration; analysis of flowers, dissection of grasshoppers, consideration of the formation

Summer School of Science.

Monday, July 22.—The Summer School of Science for 1889 opened at Parrsboro. A public meeting was held in the rink Monday evening. A cordial welcome was given the school by Councilor Upham. President Eaton replied on behalf of the school. Ex-president McKay followed with an impressive address delivered in his usual happy style. Invitations to visit Blomidon and Amherst were then presented, from the residents of Parrsboro and Amherst. A choir consisting of local talent assisted in passing a pleasant as well as instructive evening.

Tuesday, July 23.—Weather perfect. The first hour was passed in registering. About 100 have availed themselves of the advantages offered by the S. S. of Science. The programme for the morning included Zoology by A. H. McKay, B. Sc.; Chemistry, by Prof. Caldwell; and Botany conducted by E. J. Fry, Esq., assisted by Miss Ida Creighton. A great deal of interest was manifested in each subject, the rooms being filled. The afternoon included laboratory work from 4 p. m. when the students and teachers, armed with leopards, bottles, test tubes, bottles for insects, vascutula for botanical specimens, &c., took the main street by storm, exploring the surrounding country for two or three miles with successful results. In the evening Dr Sawyer delivered a popular lecture on "The effect of Science on the Moral." The learned lecturer dismissed a large audience well pleased with the evening's entertainment. On the occasion the Parrsboro band added not a little to the enjoyment.

Wednesday, July 24.—Truly scientific weather. Just enough rain during the night to lay the dust and just enough clouds to make it pleasant for tramping. A Providence clearly shows approval of Science. Astronomy occupied the first hour of the session. The subject dealt with by A. Cameron, Esq., Mineralogy, Chemistry and Botany then followed. The numbers were so large in attendance at the latter subject that a division was made in the class and two classrooms were required. The number of Nova Scotia botanists will certainly be increased in the near future, judging by the interest taken in this subject. The afternoon included Zoology and an explanation of Partridge Island.

A noticeable feature of the school is the method of conducting the lectures objectively. Whenever it is possible to produce the object alluded to, or illustrate the point spoken of by diagrams it is done. Thus Science simplified, its terrors are removed and work becomes play.

Thursday, July 25th.—At 8 a. m. 100 scientists boarded the train for Amherst, where they arrived at 11.30. Proceeding to the Y. M. C. A. Hall they received a hearty welcome from Senator Dickie on behalf of the citizens. President Eaton presented the thanks of the school. of the earth, resolving substances into their elements in the laboratory, testing of minerals, &c. July 26.—Saturday will be spent on Minas Basin by invitation from the citizens of Parrsboro. Water. It is generally known that the Act which "Vox Populi" says was secreted, was read at a public meeting, and that the contents are no secret. Since that time the Act has been read by many persons and could have been seen by anyone desiring to do so. Com.

HOSPITAL REMEDIES. What are they? The growth of intelli- gence in medical matters has given rise to a demand for a class of genuine, reliable medicine. The opportunity of the ignorant quack, who grew rich selling everything out of a single bottle has passed. To supply satisfactorily this demand this list of remedies has been created. They are the famous prescriptions of the most famous medical practitioners of the day, gathered from the hospitals of London, Paris, Berlin and Vienna. Prescriptions which cost the patients of those specialists from \$25 to \$100 are here offered prepared and ready for use at the nominal price of one dollar each. Not one of them is a cure all; each one has only the reasonable power of curing a single disease, and each one keeps its contract. Sufferers from Catarrh, Diarrhoea, Bronchitis, Asthma, Consumption, Rheumatism, Dyspepsia, Liver and Kidney Complaints, Fever and Ague, Neuralgia, Female Weakness, Leucorrhoea or Nervous Debility, should send stamp for descriptive catalogue to Hospital Remedy Co., 304 West King St., Toronto, Canada. If your druggist does not keep these remedies remit price and we will send direct.

NOTICE! THE PRIZE LIST! THE EXHIBITION! Kings, Hants & Annapolis Counties, At Kentville This Autumn, beginning on the 24th day of September next, has been issued. Twenty-five copies have been sent to each county councillor for distribution, accompanied by entry papers. A limited number of lists and papers will also be at the disposal of committees, and efforts will be made to have them placed at convenient centres in the county for distribution. They may be got at all times from the secretary C. F. Rockwell, Kentville, July 25th, 1889. 2 in
