

THE ACADIAN.

WOLFVILLE, N. S., OCT. 4, 1918

Editorial Briefings.

A cable has this week been received from J. & H. Goodwin, Ltd., of Manchester, England, by their Boston house, advising that the authorities in Great Britain have definitely and finally decided to allow the importation of any Canadian apples this season.

Tabernacle Notes.

On Sunday evening, Sept. 29th, a Missionary meeting was held in the Tabernacle, which proved to be of great interest. The following program was carried out:

Singing by school and congregation.

Scripture reading—S. S. Sept. The Lord's prayer, repeated by congregation.

Duet, by Misses Fullerton and Payzant.

Impersonation of Mrs. Jones.

Impersonation of Mrs. Jones.

Singing by school and congregation.

Sermon—The Great Commission—Dr. Gates.

Duet—The Man of Galilee—Misses Fullerton and Payzant.

Impersonation of Hindu Convert—Miss Lillian Bishop.

Collection and singing—Just as the Stars are Shining—Benediction.

Miss Bishop, in her impersonation of a Hindu convert, told of the many trials the natives have to endure when they break caste and become Christians.

Miss Simmonds, wearing the graceful and becoming dress of a native Hindu woman, told the story of the life of Dr. Jones's wife. He is a native Christian doctor in charge of the Leprosy Hospital at Ramachandrapuram, and her narrative was well told and interesting.

The duets by the Missionary ladies were appropriate and sung with feeling and expression.

Dr. Gates' talk on the last command of our Lord—Go into all the world and preach the Gospel to every creature—should have caused all present to feel a personal responsibility in the missionary enterprise.

An offering amounting to \$4.55 was added to a fund sent to Miss Helena Blackadar, of Vicksburg, towards the special work undertaken by the Tabernacle Sunday-school.

Red Cross Notes.

The Annual Red Cross Meeting took place Monday, Sept. 30th, in the Opera House at 3.30. The president, Mrs. Chase, presided. There were 70 members present. Minutes of the last annual meeting were read and approved.

The secretary gave a short report and the treasurer gave a statement of the year, showing a balance of \$99.48. These reports were approved. The president gave a very interesting address. The work of the year was taken up. \$3 stockings were sent to Christmas 1917. In Oct. 9 cases of Christmas packages were sent to Wolfville. Mrs. Beattie's sum of money to Capt. Mary Plummer for presents to Canadian soldiers. Three French Red Cross boxes have been sent. \$75 was raised for the British Red Cross. The largest amount we have ever sent this fund. In Nov. Mrs. Sexton delighted us with a visit and spoke before a large audience on behalf of the Red Cross. In Dec. a number of Christmas stockings and 25 sets of pajamas were sent to the Kentville Sanatorium, which were gratefully acknowledged by Dr. Miller.

At our December meeting the I. O. D. E. were asked to resume work and take charge of the Field Comforts which for the past six months had been carried on by this Society. During the three months 122 pairs of stockings were sent overseas, leaving 26 pairs on hand which were sent to Halifax Relief.

At the Monday afternoon sewing 288 stretchers were made, under the direction of Mrs. Moore. The slippers for convalescent soldiers under the management of Mrs. Howard Barnes and Miss Dixon were a great success, 102 pairs having been sent to Halifax in our last box.

In July a Red Cross campaign was carried on to raise money for general work. Mrs. Moore being chairman, Mrs. Black, secretary, who are to be congratulated on the splendid work done, our towns raising \$4,300 and the county \$11,000. At the August meeting it was voted that we send \$30 monthly to the Prisoners of War Fund.

Our latest work—the sorting of Spaghnum moss—in charge of Mrs. Hildebrand, has occupied many pleasant hours.

A word regarding the Sunday afternoon "At Home" in the Tea room for the soldier, which Dr. McKenna kindly gave for the purpose. Through the generosity of Mrs. Parker, Mrs. Crawford and others, refreshments were provided and the room kept open all summer, much to the credit of Mrs. Moore and the G. O. D. "Spanish Influenza"

(Issued by the Department of the Public Health, Nova Scotia.)

In the last issue of the "Quarterly Bulletin" the opinion was expressed that this province was unlikely to escape an invasion by the condition known as Spanish Influenza, which at that time had for some months prevailed in epidemic form throughout Europe. Unfortunately the prediction has been fulfilled. The disease has found its way to the North American Continent, and has become epidemic in many localities. Nova Scotia has not escaped, and from several parts of the province it has been reported as quite prevalent.

The condition resembles in many particulars the old-fashioned grippe, but the bacteriological investigations which have been made have shown the influenza bacillus to be present in but a small percentage of cases, while other organisms, causative of inflammatory conditions of the respiratory tract, are quite common.

Classically the disease has been characterized by an acute onset, symptoms developing with such rapidity that the victim may have to stop work within a few minutes. Pain in the head, back and other parts of the body, dizziness and weakness, slight soreness of the throat and sensitiveness to light are commonly complained of. The temperature rises quickly to 103 or 104 F. Movements of the eyes from side to side, and suffusion of the whites of the eyes, are not infrequently noticed.

As a rule the attack is of short duration, but it is important to note that relapse is not uncommon, so the patient should be warned against too early a return to duty. Occasionally the course is somewhat erratic, with an irregular fever which may be due to bronchitis, bronchitis, bronchopneumonia or a bacterial invasion of the blood stream. The respiratory tract usually bears the brunt of the attack. Cases of gastro-intestinal influenza are looked upon with some suspicion in view of the likelihood of disturbance of the digestive tract being dependent upon food which is either more or less decomposed, or which, through the exigencies of the illness, is of a character to which the individual is unaccustomed.

The disease generally runs a favourable course, and fatalities have been rare. In contrast with previous experiences with influenza, serious complications and disabling sequelae have been unusual, though weakness sometimes persists for a considerable time.

In treatment, rest in bed is requisite and should not be abandoned too soon. A preliminary purge is advised. As soon as the patient feels better, and the discomfort, but care is to be exercised in the use of any drug which may add to depression, and such drugs should be taken only upon a physician's advice.

Crowding and imperfect ventilation appear to have a marked influence in spreading the disease. Prevention is therefore imperative as a preventive measure. The influenza element is given (1) particularly in discharges from the respiratory tract; (2) in the secretions of the nose, throat and eyes; (3) in the sputum; (4) in the urine; (5) in the sweat; (6) in the saliva; (7) in the tears; (8) in the blood; (9) in the milk; (10) in the sweat; (11) in the saliva; (12) in the tears; (13) in the blood; (14) in the milk; (15) in the sweat; (16) in the saliva; (17) in the tears; (18) in the blood; (19) in the milk; (20) in the sweat; (21) in the saliva; (22) in the tears; (23) in the blood; (24) in the milk; (25) in the sweat; (26) in the saliva; (27) in the tears; (28) in the blood; (29) in the milk; (30) in the sweat; (31) in the saliva; (32) in the tears; (33) in the blood; (34) in the milk; (35) in the sweat; (36) in the saliva; (37) in the tears; (38) in the blood; (39) in the milk; (40) in the sweat; (41) in the saliva; (42) in the tears; (43) in the blood; (44) in the milk; (45) in the sweat; (46) in the saliva; (47) in the tears; (48) in the blood; (49) in the milk; (50) in the sweat; (51) in the saliva; (52) in the tears; (53) in the blood; (54) in the milk; (55) in the sweat; (56) in the saliva; (57) in the tears; (58) in the blood; (59) in the milk; (60) in the sweat; (61) in the saliva; (62) in the tears; (63) in the blood; (64) in the milk; (65) in the sweat; (66) in the saliva; (67) in the tears; (68) in the blood; (69) in the milk; (70) in the sweat; (71) in the saliva; (72) in the tears;
