DYMAXION RESEARCH Ltd.

We market a broad spectrum of computer hardware and software:

- Mini computers
- Micro computers
- Printers
- Plotters
- Digitizers
- Terminals

- Word processing
- Accounting
- Engineering
- Graphics
- Communications
- Home finance
- Data base management

Dymaxion Research has been providing computer services to governments and local industries for over eleven years. During this time we have built a reputation for dedicated service to our customers, before, during, and most importantly, after a sale. It is company policy that we service all hardware we sell. Despite rumours earlier this year, Osborne Computer Corporation has not gone bankrupt. The company was purchased from the creditors by the company's employees. Osborne is back in production and is here to stay. If you buy an Osborne microcomputer from us we will pay for your first year's membership to Atlantic Canada's only CP/M user's group, the CP/Maritimes User's Group.

5515 Cogswell Street, Halifax, Nova Scotia (902) 429-3175
