

REES' Pictorial System for learning Languages.

THE great success attending the introduction of Rees' Pictorial Language System during the past few years has induced the Publishers to make more widely known the advantages of the adoption of one of the most practical methods of teaching the spoken language yet placed in the hands of teachers or the private student.

Each lesson deals with common surroundings, and with subjects most familiar to the Pupil, as the Family Circle, the School, Street, Railway Station, Four Seasons, etc., and is thus within the capacity of any Pupil.
