

Adenomyoma, uterus preserving relatively normal contour, histological ap-  
 partances, 5  
 islands of glandular tissue in, 6  
 thickening in, 7, 8  
 uterine mucosa in, 5  
 vaginal discharge in, 173  
 Abstinence, periods, 31, 30, 30, 32, 87, 84, 97, 103,  
 109, 138, 149, 215  
 Age at which adenomyoma occurs, 174  
 Atrophy of uterine mucosa, 133, 210, 211, 244  
 Bicornuate uterus, adenomyoma in one horn  
 of, 203  
 CANNAL OF REICHENHANSSEN'S,  
 Carcinoma and adenomyoma, differentiation,  
 173, 185  
 squamous-cell, of cervix, diffuse adenomy-  
 oma of corpus, 200  
 Cervical adenomyoma, 165  
 Cervix, double, 161  
 Hypertrophy of, and diffuse adenomyoma,  
 200  
 squamous-cell cancer of, diffuse adenomy-  
 oma of corpus, 200  
 Cervix, enlarged, 161  
 Cervix, epithelium and adenomyoma, differ-  
 entiation, 181  
 Cyst, granular follicle, 87  
 of ovary, 34, 30, 60, 87, 93, 97, 166, 238, 245,  
 246  
 Cystadenoma of ovary, 97, 238  
 with carcinomatous changes, 238  
 Cystic adenomyoma, subperitoneal, 178, 137  
 glands in adenomyoma in which uterine pro-  
 cesses relatively normal contour, 6  
 interstitial adenomyoma, 118  
 spaces in uterine horn, 119, 243  
 Cyst-like spaces in adenomyoma in which  
 uterine processes relatively normal contour, 5  
 Cysts, multiple, in subperitoneal myoma, 178,  
 137  
 Decidua developing in stroma of adenomyoma  
 of uterine horn, 246  
 Diagnosis, 173  
 differential, 177  
 from abortion, 183  
 from cancer, 185  
 from chorio-epithelioma, 181  
 from endometritis, 184  
 from large venous sinuses in the mucosa,  
 179  
 Hemorrhage, into and thickening of uterine  
 mucosa, 24  
 HARTMANN'S, von REICHENHANSSEN, 7  
 Hemostasix, 109  
 Granular follicle cyst, 87  
 uterine body, 75, 97, 178  
 contour, 6  
 which uterine processes relatively normal  
 Granular tissue, islands of, in adenomyoma in  
 fermentation, 180  
 of stroma of mucosa, adenomyoma and, dif-  
 ferentiation, 180  
 uterine, large and dilated, with overgrowth  
 relatively normal contour, 4, 5, 7  
 uterine, large and dilated, with overgrowth  
 in adenomyoma in which uterine processes  
 relatively normal contour, 6  
 dilated, in adenomyoma in which uterine  
 processes relatively normal contour, 6  
 glands, cystic, in adenomyoma in which uterine  
 processes relatively normal contour, 6  
 244, 245  
 Granule-like spaces in uterine horn, 240, 241,  
 246  
 Glass hypertrophy of endometrium, 140, 149,  
 246  
 Granule-like spaces in uterine horn, 240, 241,  
 246  
 tubes, condition of, in adenomyoma, 171  
 accessory osium of, 244  
 Fallopian tube, left, pregnancy in, 246  
 Endometrium, gland hypertrophy of, 140, 149,  
 246. (See *Mucosa*)  
 subacute, 64  
 slight, 27, 41, 117  
 chronic, 45  
 Endometritis, and adenomyoma, differentiation,  
 184  
 Forax of uterine mucosa, 50, 128, 133  
 Funiculus, 164  
 Double cervix, 161  
 Discharge in adenomyoma, 173  
 preserves relatively normal contour, 6  
 Dilated glands in adenomyoma in which uterine  
 processes relatively normal contour, 6  
 180  
 with overgrowth of stroma of mucosa,  
 from very large and dilated uterine glands  
 from tubal pregnancy, 184  
 from sarcoma, 183  
 from salpingitis and endometritis, 184  
 from polyp, 178  
 from myomata, 187  
 from the stroma of the mucosa, 180  
 Diagnosis, differential, from marked prolap-  
 tion of the stroma of the mucosa, 180
