

The trade mark that means  
lasting tractor satisfaction

# Reliable Cheap Power for All Jobs - Drawbar or Belt

**I**T is the all around usefulness, the same saving at *every job*, that makes the 5000 and over owners of Rumely OilPull tractors glad that their good judgment made them select the OilPull. They have found that the OilPull is not best at just one kind of work and poor at another—it handles *every job* that is put up to it with the same *high degree of efficiency* and the same *low cost of operation*.

## From Seed Bed to Grain Elevator

You can start out with an OilPull for your Spring plowing and it will handle every operation for getting the biggest crop returns, from preparing the seed bed as it *should be prepared*, to hauling the grain to the elevator.

The OilPull will economically and easily handle your plows, discs, harrows, packers, drills or any equipment you hook on—thorough, clean work at low cost. Then you can pull your binders with no thought of setbacks or delays.

And as for power for your separator, the OilPull is famous from one end of the country to the other for giving smooth, steady power, regardless of the load, *automatically* holding a separator to its *correct* speed all day long.

We've mentioned the low cost of operation—here's how we back it up—a *written guarantee* with every OilPull order.

### Guarantee

*We guarantee the OilPull Tractor to operate successfully at all loads under all conditions, not only on all grades of kerosene permitted by law to be sold in the United States and Canada, but on distillates and fuel oils free from earthy matter.*

Add to this big advantage the OilPull's strong construction and long life, oil cooling, close regulation, pre-heater and self-starter and we believe you'll see that your dollars can buy no better tractor value in the market.

## Use Your OilPull With Advance-Rumely Machines

The OilPull will deliver the goods with whatever you put on the drawbar or belt but we recommend complete Advance-Rumely outfits, because we know what they will do and stand back of them.

You can buy no better tractor plows than Advance-Rumely engine gang plows, both hand and power lift.

The Rumely Ideal Separator stands supreme by test—steady, thorough, clean threshing without waste, regardless of conditions. Built in five sizes with special models for rice.

Also included in the Advance-Rumely line are the well known Rumely clover and alfalfa huller, Advance husker-shredder and Advance-Rumely steam engines.

## A Size Tractor for Every Farm

For those who wish a smaller size tractor we offer the new one-man outfits—the Advance-Rumely "8-16" two-plow tractor and the "12-24" three-plow tractor.

Ask our nearest Branch for catalogs of any or all Advance-Rumely machines.
