Anchor Wire Fence.

(PATENTED SEPT. 7, 1894.)
The strongest and best fence yet devised. Simply and easily constructed.

The clamp before being used. It is made throughout of No. 9 Plain Galvanized Wire, both horizontal wires and cross wires or uprights. The steel clamp securely fastens the horizontal and cross wire, thus consolidating the strength so that the whole fence resists an attack on any part of it. As the strength of a chain is gauged by the strength of its weakest link, so a fence is only as strong as its weakest part. The Anchor Fence is equally strong throughout, and being constructed wholly of large wires, is much stronger than a fence in which small wires are used.
