Cushman Motor Works of Canada, Ltd.  
284 Princess St., Winnipeg

### Built Up To A High Standard Not Down To A Price

**The New Galloway SANITARY Cream Separator**

is made so good in my factory that I will send it anywhere in the Dominion without an expert to set it up, to any inexperienced user for a 90-day free trial, to test against any make or kind, that even sells for twice as much and let the user be the judge. It's the most modern, the most sanitary, the most scientific, the cleanest skimmer, the most beautiful in design of any cream separator made today and I have seen them all.

**Travel 20,000 Miles**

look over every factory in this country and all the foreign countries—you won't find its superior at any price. Made in our own factory from the finest material, on the best automatic machinery, by skilled workmen, in tremendous quantities, all parts alike, interchangeable and standard, and sold to you for less money than dealers and jobbers can buy machines not as good in carload lots for spot cash.

**Get My 1915 Catalog**

It's so good that no dairyman who owns 2 or 100 cows can afford to be without it. All I ask you to do is first get my proposition before you decide to purchase any cream separator of any make, kind or at any price. Just drop me a postal. Address: **Wm. Galloway, Pres. Wm. Galloway Co. of Canada, Ltd.** Dept. 11 Winnipeg Man.

stood that the minimum amount to be paid in any case shall be one dollar.

Clause 3. In case the owner or occupant of land in this classification fails to plow fire guards as above provided, and refuses to permit such fire guards to be plowed by the railway company, the company may, if it considers such action necessary for the protection of its own interests, report the matter to the board with a request for authority to enter upon such lands for the purpose of plowing such fire guards. Each such request shall state the name and post office address of the land owner or occupant in question, and the description of the land by legal subdivision and railway mileage. Pending the receipt of authority from the board, the company shall in such cases refrain from entrance upon such lands for the purpose of fire-guarding same.

Clause 4. The plowing of fire guards is not required on lands devoted to non-combustible crops.

### SUMMER CARE OF FOALS

The first summer is the time when growth can be put on the colt most cheaply and most profitably. Plenty of feed is necessary for best growth and development. Of all feeds, the mother's milk is of greatest importance. It is essential that the dam be cared for in such a way as will cause her to yield the biggest supply of milk possible. Mares suckling foals should be fed liberally on clean, healthful, and appetizing foods. It is permissible, and usually advisable that the mare be worked. She should, however, be in the hands of the most thoughtful, careful driver and should be handled with good judgment.

### Feed and Pasture

After the age of about one month the foal needs food in addition to what it can secure from its mother. Clean, bright oats make probably the best feed that is available on the farm. A mixture of oats, bran and oil meal in proportion of 6-3-1 is splendid if one will go to the trouble of preparing or mixing a feed. Ordinarily a colt will learn to eat the first mouthful from the mother's feed box, but he cannot get enough there. He must have a small box out of reach of the mare, or some place where larger and older stock cannot reach it.

Good pasture is highly important in securing gain and growth. In fact, there is no one thing so necessary aside from the mother's milk. If the mare is worked in the field, she and the colt

The successful development to maturity of a foal depends largely upon the treatment it gets during the first summer

should have the best grass pasture possible at night. Care must be given that pastures are not overstocked and that variety of grasses or succession of pastures is provided to avoid the dry grass in summer. The mare relishes grass and her milk flow is stimulated and increased by good pasture. The colt relishes grass, gets needed exercise and will thrive best where pasture is abundant.

If the mare and colt are running on pasture, supplemental feed will be needed just the same, especially when the grass begins to dry up. A feeding place should be constructed in such a way that young colts can enter and older stock cannot. Grain should be fed liberally in this separate pen.

### Management

Colts should not follow mares at work in fields during summer and fall. They should be left in clean stalls, pad-

## Deering New Ideal The Binder for Your Fields

TO say, "The binder for your fields," means that the **Deering New Ideal** will give you the best possible results at harvest time.

The main frame of the **Deering New Ideal** binder is made of tough, strong steel bars, hot-riveted together, forming a unit which the hardest usage cannot twist out of shape. Ball and roller bearings make the machine light running. The reel is strongly braced and can always be held parallel with the cutter bar whether working high or low.

A special Z-shaped cutter bar, almost level with top of platform, allows short grain to pass freely, without lodging on the cutter bar. Either smooth section or serrated knives fit the cutter bar. The famous **Deering** knotter works as nearly perfect as possible.

Cut down your harvest troubles with a **Deering** binder. Cut them still further by using **Deering** twine. See the **Deering** machines at the Deering local agent's place of business. Get catalogues from him, or, write the nearest branch house.
