ROBB'S STEEL FURNACE

Is the cheapest and best heating apparatus for country dwellings.

Being cased with brick it does not damage roots in cellar, the heat being carried up steady into rooms during the night even after the fuel has burned low. This furnace being made of PLATE STEEL is most durable, and being simple in construction does not permit of smoke or gas escaping, while it has a great advantage over more complicated furnaces, by the interior being kept free from soot. This is the reason why it will radiate as much heat after being used for some time as it will when first set up. There is great economy in fuel, and much labor saved in cutting the wood; in fact, it will burn wood that cannot be split or used in any other way.

We use only American Registers.
