City Clerk Kent will make an appointment with Judge Snider to-day to hear the appeals. So far 105 appeals have been filed. This number is in excess of pre-vious years. The appeals are well dis-tributed over the wards of the city with the exception of ward 2. There is only one from there.

"Well, I guess L have drawn my last pay from the city." said Consulting En-gineer Barrow this morning after he came down from the treasurer's office. Mr. Barrow served the city for nearly thirty years in the engineering depart-ment. Last May when City Engineer Macallum was appointed to succeed him it was arranged that Mr. Barrow should be retained until the end of the year in the capacity of consulting engineer. Mr. Barrow will go in business for himself. He seems quite satisfied to be relieved of the worries and care of a civic office.

The horse, Nimble Dick, ran second in the King's Plate, and was of an excitable disposition, and, al-though ridden in saddle, had not been harnessed. They encountered consider-able trouble harnessing the horse, and Foyster, who was standing near, kept shouting out advice and calling them names because they did not do it the way he thought it should be done. How-ever, the horse was finally hitched to a high cart and driven as far as the end of Napier street, where it refused to turn. While they were endeavoring to get it to turn, Foyster ran up and in-sisted on being allowed to help, claiming that he was a horseman of considerable experience. He was allowed to get into the cart, and the lines were handed over to him. Then the trouble started, which resulted in Foyster's injuries. As soon as they let go he commence to yell and hit the horse with the lines. The horse was surprised at such treatment, reared on its hind feet, dropped down and kicked, one of its feet going over the dash board. It then started off on three legs, but went only about 30 yards before it fell, throwing Foyster out and List of Titled Owners of the Land

three legs, but went only about 30 yards before it fell, throwing Foyster out and injuring him. In answer to Mr. Kerr's questions, he said the horse was a very fiery one, and it was dangerous for any man to at-tempt to drive it, but his reason for al-lowing Foyster to do so was that he claimed he could do so much he wanted to see him demonstrate his ability. H. H. Bonder, inspector for the Domin-ion Guarantee Company, said Foyster had told him that he borrowed the horse to go for some washing. The reason he recommended the company not to pay the money was because he considered the man had been under the influence of liquor, and the policy was not good under such conditions. Judgment was given for the plaintiff for \$90 and costs on the Division Court scale.

At this morning's session of the Coun-ty Court the case of Stockwell vs. Cope-man was taken up. The plaintiff, a rela-tive of the defendant, entered into a partnership deal with him whereby he was to supply the material and Cope-man the labor for building. Stockwell had some old material and it was agreed to erect two houses, the men sup-plied by the defendant to be paid not more than \$2.50 a day and board. Cope-man charged \$2.25 a day for the men and Stockwell claimed that he only paid about half the amount to them. When they applied for the remainder he notified them that Stockwell had settled with him and they could not press their 30,157 45,837 with him and they could not press their claim against him, but would need to go

William Smith said he had charge of William Enith said he had charge of the mechanics who were working on the job, but received his instructions from Mr. Copeman and was hired by him. In addition to himself three others were em-ployed. The time occupied was 148 days and the work was done remarkably well for such material as was supplied them, he said. Of the total, \$333, that was owing them they were paid \$14].50. When they asked Copeman for the re-mainder of the money he referred them to Stockwell, saying that he had made a settlement with him. Stockwell, when they went to him, drew their attention to the fact that plaster had fallen off the walls. He (witness) went to see the the walls. He (witness) went to see the amount of plaster that had fallen down amount of plaster that had faller down. It had apparently been caused by the frost, as it was late in October when the plastering was done. Other defects were also pointed out to him later on. William Taylor gave it as his opinion that the houses were poorly constructed. When court adjourned for luncheon there were still six witnesses to hear. TRUE BILL.
