## TUNNEL THROUGH SELKIRKS FOR ITS DOUBLE TRACK ROAD

Gigantic Engineering Feat Will Eliminate Steep Grade Through Roger's Pass: Surveys Have Been Completed: Expect to Have Project Completed Within Four Years

Vancouver, B. C., Sept. 8 .- It is un- | will be operated by electric locomo derstood in well-informed Canadian Pacific circles that the vast improvements in building the double track of the Canadian Pacific Railway between Calgary and Vancouver, to be carried out during the next four years, wil include the driving of a double-track tunnel a little over eight miles long through the summit of the Selkirks, in over Rogers pass, the scene of many dangerous snowslides. Surveys for the proposed undertaking have been com-pleted by engineering parties working under the direction of F. F. Busteed Pacific division and now engineer in charge of the double-tracking survey,

with headquarters at Kamloops. The proposed tunnel will extend from Bear Creek, east of the summit, to a point west of Glacier station. The cost is estimated at over \$1,500,000 a mile. The major portion of the tun-nel will have a gradient of 1 per cent,, with a central section of a short distunce with a gradient of about 2 per

nel, engineers have reported, requires to be provided with grades in order to thsure better ventilation than could be Trains through the proposed tunnel

It is expected that the driving of the

#### Roosevelt Tells All He Knows About Campaign Contributions of 1904-12

HE charge against Mr. Penrose was a direct charge. This charge was not merely that he took \$25,000 from the Standard Oil Company, but that at or about the time of his taking it, while a member of a committee of the senate which was formed to investigate industrial affairs in the United States, he was in constant communication with Mr. Archbold on the subject, and that he submitted to Mr. Archbold, for his approval, in advance, a copy of the report of the commission. If these statements are true, of course Mr. Penrose is unfit to represent the people in the United States senate: and the testimony against him is direct. Apparently, however, the commission is the commission of the coming winter. The right of way is cleared to the crossing of the Athabara mittee is investigating not this charge aganst Mr. Penrose, which was sustained by direct evidence, but Mr. Penrose's countercharge, which was sustained by no evidence at all, and only by the repetition of second-hand gossip.

"As regards the statement of Mr. Penrose and Mr. Archbold that with my consent or knowledge Mr. Bliss asked the Standard Oil people for \$100,000 or other sum, or received such sum from them, it is an uncursible of the coming winter. The right of way is cleared to the crossing of the Athabara in the fact that a large part of the system is now controlled by telephone despatching would make little difference, as the tle-up would come in those parts controlled by the telegraph, and the whole system would necessarily be involved.

Should the trouble come and he are sufficient to result (local telegraphers state that the fact that a large part of the system is now controlled by telephone despatching would make little difference, as the tle-up would come in those parts controlled by the telegraph, and the whole system would necessarily be involved.

Should the trouble come and he are sufficient to result (local telegraphers state that the fact that a large part of the system is now controlled by telephone despatching to the crossing of the Athabara in the coming winter. The right of way is cleared to the crossing of the Athabara in the coming winter. The right of way is cleared to the crossing of the Athabara in the coming winter. The right of way is cleared to the crossing of the Athabara in the coming winter. The right of way is cleared to the crossing of the Athabara in the coming winter. The right of way is cleared to the crossing of the Athabara in the coming winter.

any funds were received from the Standard Oil company, or if any one else connected with the national committee in 1904; it was not merely done without my knowledge but was done against my express direction and prohibition, and in spite of the fact that I was assured that no such request had been made, and that no such contributions

Should the trouble come, and be prolonged before a settlement was reached, it is understood that the commercial offices would be affected, for the commercial operators would likely join the railway men in a sympathetic strike, which would completely demorable to the fact that I was assured that no such request alize business of every kind for the few days it.

"In my letters to Mr. Cortelyou during the campaign the only allusion that I can find to campaign contributions is in one in which I tell him that I have heard a rumor that Senator Dick of Ohio has been collecting money from office holders, and that if so he must be warned to stop, or he will get into trouble. "I communicated with Mr. Bliss very infrequently, and never made any allusion to contributions in any letter that I wrote him or any conversation I had with him. From Mr. Bliss, as from Mr. Cortelyou, I received the explicit statement that no promise had been made and no obligation entered into, directly or indirectly, in connection with any contribution that had been reeived, or would be entered into in connection with any contribution that might

be received in the future Asked No Contributions for 1904 or 1912 "I have never discussed the question of contributions with Mr. Perkins, save connection with discussing the accusations brought before your committee I have never, drectly or indirectly, asked him for a contribution, and I did not far as I can i I was running for president or for vice-president, or during the recent primary,

"Mr. Hearst has published much interesting and important correspondence of the Standard Oil people, especially Mr. Archbold, with various public men. I have in times page criticised Mr. Hearst, but in this matter he has rendreed a public service of high importance; and I hope he will publish all the letters dealing with this matter which he has in his possession. If Mr. Hearst or any body else has any letter from me dealing with Standard Oil affairs I shall be delighted to have it published; and if anyone can suggest any question as to any letter I have ever written or received on the subject, and will give me the approximate date, I will at once try to look it up, and if I can find it will publish it.

Attack on Dead Man

"I wish to emphasize the fact that the testimony of Mr. Archbold and Mr. Penrose in this matter is an attack on Mr. Bliss, who is dead, and is also unwitingly the severest possible reflection on themselves.

"Mr. Bliss never asked me for a favor of any kind, and all his public and private acts, so far as I had knowledge of them, were on the highest plane of just and honorable dealing. Mr. Bliss never even asked me this about the Standard Oil company, and never in any way alluded to the Standard Oil company, and never in many way alluded to the Standard Oil company, and never from the Standard oil compent from Mr. Rogers, alleging as his justification that this was not money from the Standard oil company from Mr. Rogers being an old friend and party associate of his."

Surveys for a proposed duplicate of the improvements which is expected to be finished at the end of the property and the property of the spiral tunnel on the "Big Hill." at the summit of the Rockies, between the conditions will be report the found of the work and the property and the doctors fear the well to complete the grade and steel w Canada feel the same toward the re-port of the board of conciliation which

Laggan and Field, have also been made. This work is also included in the proposed improvements to provide low grades between the prairie provinces and the coast.

The reason the men are turning down the award so unanimously is that, while it gives the men what appears to be a ten per cent. increase, in reality they are getting only four or five per cent. The award allows an increase to all but despatchers in scheduled offices. Very few of the offices in smaller towns are scheduled.

The increase would have to be divided to the first summer and ready for steel work, and it is expected that rails will reach there next and ready for steel work, and it is expected that rails will reach there next and ready for steel work, and it is expected that rails will reach there next and ready for steel work, and it is expected that rails will reach there next and ready for steel work, and it is expected that rails will reach there next and ready for steel work, and it is expected that rails will reach there next and ready for steel work, and it is expected that rails will reach there next and ready for steel work, and it is expected that rails will reach there next and ready for steel work, and it is expected that rails will reach there next and ready for steel work, and ready for steel work and ready fo ed among the whole, hence it works out to be a very small increase when the whole of the 1,800 employees are considered.

The whole of the 1,800 employees are considered.

The works will early next May.

Grading has been completed for 27 miles of the Peace River branch which leaves the main line at Onoway 40.

Should there be a strike, it will be leaves the main line at Onoway, 40 Should there be a strike, it will be several weeks before a strike decision could be arrived at, and there are hopes that the company will re-consider its decision rather than the up the system by a complete break with the men.

Should there be a strike, it will be leaves the main line at Onoway, 40 miles west of Edmonton, and is being carried on to a point beyond the Macleod river, 87 miles from Onoway. Princess Planned Long Ride.

Among those feeling the disappointment at not being able to go into camp at Cochrane is Princess Patricia, who with the Duke, intended to ride the 17 miles horseback and engage in the outing around camp. The Duchess was to make the journey by automobile.

The site selected is an ideal place for a quiet outing undisturbed by the public. Situated on the Ghost river, there is but one ranch within miles. The location was chosen by Inspector Perry of the R.N.W.M.P., and is in charge of Inspectors Duffus and Newson.

There is a central tent for dining, and on each side of this is the quarters of Princess Patricia and the Duchess communicating with that of the duke. It was decided that the party remain aboard the train and await the weather. It the latter does not improve the camp will be abandoned.
