

Headaches, Dizzy

Headaches and dizziness have been my afflictions for 22 years. Often I would fall in a sudden faint and several times narrowly escaped being burnt on the stove. No medicine gave me more than a few days relief, and I laughed when a friend urged me to try Hood's Sarsaparilla. Put I took it and in six months I was free from all headache trouble, faintness or dizziness. I am now perfectly well. I cannot say too much in praise of Hood's Sarsaparilla. It is worth its weight in gold to me. Mrs. R. H. HANES, Paris, Ont.

Two Miles Behind

Dunraven's Valkyrie Defeated by the Defender

After Leading the Yankee Boat for an Hour.

The English-Canadian Cricket Match Ends in a Draw.

Shabel Completes His 1,000-Mile Run—Baseball, Golf and Other Sporting Events.

DEFEATED BY THE DEFENDER. New York, Sept. 8.—The aluminum and bronze boat defeated Valkyrie III, 3 minutes, 49 seconds, in the first of the races for the America's Cup yesterday. Twenty thousand people on the great flotilla that ever assembled on Sandy Hook, witnessed the race, and there was a scene of hilarious joy when the Defender crossed the line fully two miles ahead of Lord Dunraven's boat. The joy of the multitude was undoubtedly increased by the fact that the Defender led the Yankee boat for the first hour. A hush fell over the marine amphitheater when the boats started, and all the joys of yachting seemed to be concentrated in the Defender's bow. The British boat was easily moved to the front and showed her heels to the Defender. Cheers and enthusiasm were missing for a full hour while the British boat was leading.

There was only a five-knot breeze at the start, and, as predicted, the Valkyrie was going through the water faster than the Defender in the light air. There was a lumpy sea on and quite a swell came in from the ocean, but the buffeting of the waves against the Britisher's bow did not keep her back. She outpointed and outfooted the Defender's boat to the amazement of the great crowd of spectators. But after establishing a lead of a good quarter of a mile, the wind having freshened, the cup hunter failed to hold her own, and the Yankee began to gain. Then a cheer went up, and the tug boat whistles screamed.

As both yachts were beating to windward it is impossible to say just when the Defender overhauled the British boat, but it was about 1:25 p.m., when the boats had covered nearly half of the fifteen miles of windward work. Once the Defender got her salt there was no catching her, and as the wind continued to freshen she opened up a very large gap between her stern and the bow of Lord Dunraven's boat. When the Defender reached the outer mark she had an advantage of 3 minutes and 27 seconds. There was a big demonstration as the Yankee boat made the turn. The wind having shifted, the run home became a broad reach, and it was a constant gain for the American boat. Going home, the gain was 4 minutes and 55 seconds. With the time allowance of 29 seconds, the Defender's victory was 8 minutes and 40 seconds.

The wind was ten knots at the finish. The day's race showed that Valkyrie III, moved like a ghost in a wind of less than six knots, and that she seemed speedier than the Defender in that wind. It also showed that with a wind of from eight to ten knots in both windward work and broad reaching, the English boat could not keep the pace set by the Defender. Both yachts were somewhat interfered with by the attendant fleet, but the patrol yachts kept a fairly clear course open, except at the start and finish. Summary:

Start. Finish. Time.
Defender 12:20:50 5:21:14 5:00:24
Valkyrie 12:20:46 5:29:36 5:08:41
Defender won by 8 minutes, 40 seconds. Valkyrie allows 49 seconds.

The next race will be on Tuesday at 11 a.m. under the same conditions as Saturday's except that the course will be a triangle of ten miles to a side.

CHECKERS

TWO CHAMPIONS MEET. London, Sept. 8.—A match at draughts for \$100 a side has been played here between J. F. Reed, the American champion, and the English champion, Alfred Jordan. The match was the best out of twenty games, and resulted in a victory for Reed, who scored five wins to one for his opponent. Eleven games were drawn and three were not played, as even if Jordan won all of them he would still have been one behind.

Harry N. Pillsbury, of Brooklyn, who

has just won the chess championship of the world in the tournament at Hastings, met Reed in the Cypress Cafe in this city, where he engaged in a friendly game of draughts with Reed, but could make no headway in the game. Pillsbury will sail for New York on the 21st, and Reed will go to Edinburgh, where he will meet the Scotch champion at draughts.

GOLF.
VICTORY FOR THE CANADIAN. Queen's Royal, Niagara, Ont., Sept. 8.—The concluding day of the international golf tournament furnished to the large gathering of spectators play of a very high order. The event of the morning was the ladies' single competition, in which Hobbs, the Canadian, defeated one of Chicago's most expert golfers, met the pick of the Canadian players, Miss Geale, of Niagara, the latter winning by 11 to 65.

BASEBALL.
The best game of the season took place Saturday afternoon at the Asylum, between the Orioles and the home club. Each club alternated in the lead, till the eighth, when the Asylum made 5 runs, and 2 in the ninth. The features were a neat double by the Sippl brothers, Flaherty's home run, and the umpiring of Scotty Ross. Score:

GUELPH VS. GALT.

Guelph, Ont., Sept. 9.—The last league game between the Galt and the Guelph Maple Leafs, played here Saturday afternoon. Attendance 1,500. Score:
Leafs..... 3 2 1 4 1 3 3—19 15 5
Galt..... 1 0 3 0 2 1 1 0—9 10 13
Batteries—Wood and Powers; Burdett, Humphries and Lyons. Umpire—Reld, London.

ELYS.

St. Thomas will try to get the Alerts to play there on Saturday next.

Snyder, the clever captain of the Guelph Maple Leafs, was hit in the eye by a stone after the Guelph-Galt game Saturday. He will likely lose the sight of the eye. The stone was thrown by a boy at the Galt "bus in which Snyder was riding.

ROD AND REEL.

A singular incident took place the other day on Damorisotta Lake, Maine, which shows the voracity of the bass. A party from the Kennebec were fishing from a boat, when one of them caught the end of his fishpole in his watch guard and flung his gold watch overboard. About an hour after, and a quarter of a mile distant, they caught a six-pounder, and, noticing its fullness and peculiar appearance, he was opened, and there was the gold watch, still going.—Boston Herald.

THE WHEEL.

RODE A THOUSAND MILES.

Toronto, Ont., Sept. 8.—Shabel, the Frenchman, finished his 1,000 mile ride on his half-past eleven o'clock. He had been off the wheel in all 16 hours and 21 minutes, his total riding time being 64 hours, 45 minutes. His

last ten miles were done in 41 minutes, the last mile in 3:05 1-4, and last quarter in 33 3-5 seconds. He was much delayed by rain in his riding.

IN FRANCE.

Paris, Sept. 9.—At the Velodrome du Seine yesterday Banier, the American bicyclist, won the Grand Prix of the Union Velocipede, which is worth \$200. This prize was won by Zimmerman last year.

In a 24-hours bicycle race at Bordeaux, which was finished on Friday, Hurst covered 861 kilometers, 856 meters, winning the prize.

SPOKES.

Loughead reduced the class A quarter-mile standing start record 1 3-4 seconds at Buffalo on Friday, doing the distance, behind a tandem, in 30 1-5. Rastus, the Wanderers' mascot, made himself so popular with the American racing men at the circuit that the American of Wright team have advised him, and he will finish the season under their charge.

A London cable says that the Herne Hill track Saturday, Brooks, a bicyclist, with a standing start, covered a mile in 1:59 4-5.

TAE TURF.

At the Sheepshead Bay race track Saturday a special race was arranged between the 4-year-old colts, Henry of Navarre and Rey el Santa Anita. It was for a sweepstakes of \$4,000 each, with \$5,000 added by the Coney Island Jockey Club, at a mile and a furlong, and will be run on Wednesday, Sept. 11.

WINDSOR RACES.

Windsor Race Track, Ont., Sept. 9.—A crowd of over 3,000 people attended the races Saturday. Summaries:

First race, 3-4 mile—Atterley 1, E. H. Smith 2, James V. Carter 3. Time, 1:18 1-2.

Second race, 5-8 mile—Say Belle 1, Uncas 2, Duchess of Montrose 3. Time, 1:05.

Third race, 6-12 furlongs—Helen Wrenn 1, Lay On 2, Spitfire 3. Time, 1:24 1-2.

Fourth race, 5-8 mile—Subito 1, Hester 2, Bandala 3. Time, 1:03 3-4.

Fifth race, mile—Montespenco 1, Kimberley 2, Lady Rose 3. Time, 1:45 1-4.

Sixth race, 3-4 mile—Hallow'en 1, Pete Kelly 2, Fiction 3. Time, 1:16 1-4.

CRICKET.

ENGLISHMEN VS. CANADIANS.
Rosedale Grounds, Toronto, Sept. 9.—The match between the Canadians and the Cambridge-Oxford Universities teams was resumed at 11 o'clock Saturday morning, the Englishmen concluding the first innings.

In their second inning the Canadians scored only 36 runs, leaving the Englishmen with 20 runs to get and 10 wickets to fall. Another rain storm, however, with no operator. As the ground in such a wet condition that it was decided to make the match a draw.

MET AFTER 40 YEARS.

Dr. Charles Mott Asked to Pick Up a Diamond.

When He Handed It to a Woman He Recognized His Lost Wife.

Winamac, Ind., Sept. 9.—"By the accidental dropping of a diamond ring at the station here today a husband and wife who had been separated for 40 years, met and recognized each other for the first time on the noon train."

"Dr. Charles Mott, formerly of Boston, stepped from the Chicago train on the Pan Handle road to leave a housewife, with an operator. As he walked towards his car a woman leaned from the window of another car and asked the doctor to hand her a diamond ring which had just slipped from her finger and was lying at his feet."

"Dr. Mott picked up the ring, and the inscription on the inside caught his eye. It read: 'Charles Mott to Vera L. Mott.'"

In amazement he looked at the woman who had dropped the ring, and at the same time she cried out, 'Charles, my husband!'

"Dr. Mott hastily sprang up the steps of the car and clasped in his arms the wife who had fled from him in anger 40 years ago. There were a few hurried questions on both sides, but the joy of reunion overshadowed every other feeling, and the happy couple sat talking rapidly and tenderly to one another as the train rolled away toward Massachusetts."

Dr. Charles Mott was a well-known young physician of Boston, with a good practice and a position in society. He fell in love with Miss Vera Burns, of South Canterbury, Conn., and they were married, but the happiness of the union was marred by the fact that Mrs. Mott was jealous of her husband, and many bitter quarrels resulted. One stormy night, when her husband was alone, the wife determined to stand it no longer, and packing a few personal effects she started out into the storm, leaving no trace of her whereabouts.

For years the doctor sought for his wife. He gave up his business and traveled, seeking in every town and city some trace of his wife.

"At last he gave up the search, and sought fortune and a new life in the mountains of Montana. He became very wealthy in a few years, and has of late spent much time in traveling. Today he was on his way to New England to revisit the scenes of his childhood when the happy incident occurred."

PORT WORK AND WAGES.

Port Huron, Mich., Sept. 9.—The local typographical union inaugurated a short-lived but successful strike here. The members of the union became dissatisfied with the wages paid by the Port Huron Times, which had most of its local news set up by girls who were not paid the union scale, and a strike was decided upon. Editor Sherman, however, made an proposition to accept the union's terms, to take effect two weeks from Monday. The proposition was accepted, and on and after that day all girls remaining in the employ of the Times as compositors will be paid the union scale.

DYSPEPSIA AND INDIGESTION.
Dr. W. Snow & Co., Syracuse, N.Y., write: "Please send us ten gross of Pills. We are selling more of Parmenter's Pills than any other pill we keep. They have a great reputation for the cure of dyspepsia and indigestion."—Dr. W. Smith, Lindsay, writes: "Parmenter's Pills are an excellent medicine. My sister has been troubled with severe headache, but these Pills have cured her."

THE STEAM BOILER.

Causes of Explosions and Incrustation—How to Avoid Them.

The prime causes of boiler explosions are divisible into the following categories: 1. Through the influence of thermic action. 2. Through the influence of chemical action. 3. Through the influence of physical action. 4. Structural defects. 5. Defective supervision.

Why do boilers explode while getting up steam or soon after, or upon pumping in cold water, or when the engine is started or shut down? Can a boiler withstand 100 pounds pressure this week and explode with 50 pounds pressure the next week? Yes, because the boiler can become suddenly reduced in strength. The mystery of boiler explosions consists in a want of sufficient strength to withstand the pressure.

This lack of strength may be inherent in the original construction, but is most frequently the effect of weakening of the iron struts due to unequal expansion, caused by unequal heating of different portions of the boiler, or it may be due to corrosion from long use or improper setting.

If steam boilers are properly proportioned and constructed, they will, when new, be safe against considerable more pressure than the safety valve is set to; and the hydraulic test, properly applied, may discover faults in the boiler, or the weakening effects of corrosion, but against the danger resulting from unequal expansion, ordinary boilers have no protection; a fact not properly appreciated by engineers or the public.

In getting up steam many boilers will be very hot in some parts, while other parts will be actually cold; of course, under these conditions, enormous strains must occur in some portions of the boiler, which are thereby weakened; and these strains being repeated, will eventually so far destroy the strength of the line or point of greatest strain that rupture must result, generally small and gradual, but sometimes large and productive of disastrous explosions.

When firing, a quantity of cold air is admitted through the doors, which has a tendency to suddenly cool the bottom sheets, and after a time to cause the iron to become crystallized, and finally to crack. The upper damper should be partially closed when firing and the fire handy and the firing done quick. Sudden and great variation of temperature should be avoided as much as possible in any boiler furnace. Boilers should not be blown off on a Saturday night and then filled again with cold water in order to cool them quick. It bakes the mud and incrustation, which otherwise would be quite soft and easily removed; besides it cools the shell of the boiler too rapidly and is apt to crack it. Feed water should be heated and the water level not permitted to vary greatly.

Incrustation and sedimentary deposits are the great bane of most steam users and the most general and frequent cause of damage to boilers. It means loss and waste of fuel, excessive repair accounts, and certainly shortening of life of a boiler.

Nearly all natural water contains more or less mineral matter in solution as well as organic and mineral matter in suspension. The latter may be removed by filtration, or settling, but matter held in solution can only be removed from water by the agency of heat. Bottom and surface blow-offs, when used intelligently, can do a great deal towards removing sediment and preventing scale, but it means a waste of water already heated and at the same time increasing the duties of the attendant, which often leads to a gradual neglect of the means to be taken.

Feed water heater is to be recommended, if the water can be heated to boiling point, and time and quiet must be given for the precipitation of the carbonates of lime. A mechanical boiler cleaner is very much to be appreciated. In fact, any apparatus which will prevent accumulation of scale or deposits in a steam boiler.

With a view of counteracting the injurious effects of the deposits contained in water used in steam boilers, let us look at their composition and action while in the boiler. The main ingredients are carbonates of lime, together with sulphate of lime, carbonate of magnesia, and in salt, or brackish water, chloride of sodium, or common salt. The carbonates of lime and magnesia alone do not form a hard scale; they are soft and form a scale at all except when baked on to the hot surface of iron by the removal of water. While the boiler is steaming the carbonates, which are quite light and of impalpable fineness, are carried and thrown in motion by the currents in the boiler and are constantly thrown to the surface, until they can find a quiet place in the boiler removed from heat, where they can settle; but when the boiler is allowed to cool down for a while they become precipitated on all the heating surfaces, where they are heated and baked into a more or less hard crust according to their purity. They include a mass of lime and salt at first, a good deal like the carbonates, as on separation from the water they appear as fine, impalpable powders, which are actuated by the currents and thrown to the surface; but as they become heavier than the carbonates, they settle more easily and attach themselves to the heating surface as a very hard and crystalline white scale.

Among the treasures of the Austrian crown are some religious relics that would make the fortune of a church. They include a nail from the cross, a fragment from the cross itself, a piece of wood from the manger at Bethlehem, fragments of the apron worn by the Virgin, and a tooth of John the Baptist.

GRAND'S GYPSY OIL

Whilst Visiting THE London Exhibition

DO NOT FORGET TO EXAMINE OUR TWO NEW STYLES OF

PIANOS.

THE EMPIRE STYLE

We show an extremely chaste and quiet-looking Upright Cabinet Grand, with panels ornamented with pressed woodwork, in Empire style. The instrument being of large size, it possesses a volume of tone almost equal to that of a Concert Grand Piano. Quality considered, its price is moderate.

THE COLONIAL STYLE

We show one piano only in this style, and we consider it one of the finest specimens of the piano makers' art ever exhibited at London. It is, musically, almost equal to a Concert Grand, and the case has been carved in the highest style of art.

MARQUETERIE PANELS

We also exhibit one large Upright Piano with beautifully inlaid panels, which we secured direct from France. The design is floral, and every petal, leaf and stem is delicately outlined with separate pieces of wood of various colors.

A WORD OF ADVICE

To purchasers—Always remember it is cheaper to buy from the manufacturer direct than from a dealer who has to make a middle profit. In cities where there are no manufacturers our goods
